ПРЕЗЕНТАЦИЯ ПРОЕКТА

«Я борюсь за две вещи в дизайне: простота и ясность. Великий дизайн рождается из этих двух вещей».
 Линдон Лидер (Lindon Leader)

A FACHADA
- Uso do vidro como material da primeira casca da fachada, remetendo à ideia da camada interna de um esqueleto, que é uma camada mais fina, que precisa ser protegida por outra camada externa.
- Colocação de venezianas que fazem o controle da entrada de luz no ambiente.
- Faixas pertencentes à esquadria unem o vidro e as venezianas, finalizando a segunda camada da fachada.
- Por último, tem-se a camada externa da fachada, que serve como proteção por todo o edifício.

This image suggests locations at Cantos aus from where the material for the morales walls could be collected. A large proportion of the site could be built from these existing resources. Further expansion on the site could coincide with the removal of more material as to the beach.
