

Tour of my native village

The presentation was prepared
by Daria Belozeroва, a 9th grade
student

Teacher: Zolotova T. V.

Temple

In our village there is a Church that was built in 1774 at the expense of parishioners. Recently, the church was sent to restore. Money for repairs was collected all over the village, they gave as much money as they could. Even now it is being restored. They covered the domes and made repairs inside . The old fence was removed and a new one was installed . Planted trees next to the fence. Services are held on weekends and holidays. If you look at the photo that is attached to the slide, you can see a large mighty maple tree. From the photos, you can see how our church has changed over the years.

House of Culture

The walls of the old club, built back in 1968, have become very dilapidated over the decades. The club was recognized as an emergency, and it was closed. And now, finally, the villagers have found a new House of Culture. There is a library inside the building. In which anyone can come to read a book. There are also various quests on the knowledge of books. In the club itself, various holidays are held. Where artists sing songs, act out scenes, read poems. There is a different scenario for any holiday. People come to watch concerts to distract themselves from household chores.

Wild animals of our region

We also have animals. The photos depict animals against the background of the forest.

In the first photo, a roe deer runs in the autumn. A flock of wild boars runs from one forest to another. In winter, one wild boar came to the feeder to eat, which was built by the huntsmen. In our village there are many forests in which various animals and birds are found. The number is being regulated, because many animals are being bred. You can also go to the forest for mushrooms. wild rose grows on the outskirts of the forest.

Tea is brewed from it, because it is useful

Wildlife Harvest

Many people like the onset of early autumn, when it's still warm, the sun is shining, and the trees are wearing colorful outfits. This time cannot be compared with anything. Around September, work is underway to harvest vegetables. The forest has its autumn gifts. Rowan and viburnum berries turn red on the trees. And in our forests you can find an excellent harvest. Wild apples ripen not only in autumn, but can also be found in summer. You can also find berries. And rosehip is the most important thing in autumn. After all, it is so useful

Little Swift

An exciting world of living and inanimate nature! How I want to look at everything and learn something new! I really love animals, beautiful creations of our world! Birds symbolize flight, freedom, space. I am particularly interested in migratory birds. These creatures travel a long distance. They spend the winter in distant countries where there is plenty of food and warmth. A small strizhonok is sitting on his arm. He fell out of the nest. And he can't fly yet

School

There is a school in the village. It was built in 1980. The school has students from grades 1 to 11, with a total of 42 students. There is a hockey court on the school grounds. When winter comes, we go skating in physical education classes. There is also a vegetable garden where vegetables are grown for school. There is a large garden. There are cherries, currants, apples in the garden. I study in the 9th grade. I like school .

Romodanka River

One of the places betraying our village is the Romodanka River. The river is deep enough. There is a small island in the middle of the river.

You can swim to him by boat. There is also a place for swimming. In summer , a lot of people come to bathe in the river .A dam has been built on the river through which vehicles pass. And on the other side there are beautiful trees. Which add even more beauty to this place. From my house you can watch the Romodanka River

Harvesting in our village

Don't be such a profession as a combine harvester, next year, when the country's flour reserves run out. Such an irreplaceable product as bread will disappear from our tables. Bread is a loss of primary importance. Of course, except for millet, all other cereals will disappear. Only combine harvesters clean crops. The combine harvester profession has always been held in high esteem in the Soviet Union. Working behind the wheel of a combine harvester is very difficult. The workers of the village are combine harvesters. There is a proverb: bread is the head of everything. So the combine harvester is the head of everything in agriculture.
