at the screen

~ 32% engaging  
with the computer

# PHYSICIAN WORKDAY

**~ 49% - spent on  
EHR and desk  
work.**

**~ 27% - spent  
face-to-face with  
patients.**

**~ Spent the same time  
of the examination to  
scribe Notes.**

# "PAJAMA TIME" TO COMPLETE NARRATIVE NOTES

Besides taking notes during examinations & spending 4.5 hours on EHR tasks daily.

~ 1.4 hours per day outside of clinic hours

# CONSEQUENCES OF CLINICAL DOCUMENTATION BURDENS

Burnout takes a toll on physicians, patients, & practices.

Poor work-home balance

Impair access to care.

Lowering the time spent on direct patient care.

Dissatisfaction with the quality of care.

Lack of non-verbal communication "Eye Contact."

# HEALTHCARE LEADERS

Clinicians need immediate relief!!!

Restore the joy of care!

Restore the work-life balance of physicians!

Restore Patients satisfaction!

Improve access to care!

If not addressed, burnout will make it harder for patients to get care, cause health costs to rise, limit our ability to overcome future pandemics, and worsen health disparities.

# BREVI - Automation of Clinical Narrative Notes

"Immediately ease clinicians' burnout and simultaneously delight your patients."

# BREVI ADVANTAGES

Conduct Non-Linear consultations & keep the social element of dialogues.

Receive scribed notes within 2 minutes by "Speed Mode."

Eliminate the necessity to bounce between computer and caring.

Provide notes in understandable forms without medical jargon.

# BENEFITS FOR PHYSICIANS

Discover patients' concerns and interpret them more accurately.

Restores the Work-life balance and joy of care.

Considerably reduce paperwork & Eliminate **80%** of "Pajama Time."

# BENEFITS FOR PATIENTS

Express concerns without distraction & interruption.

Satisfaction with the improvements in the quality of care

Establish non-verbal communication "Eye Contact."

# FOR COVERED ENTITIES

Enhance the quality of care  
& Patients satisfaction.

Considerably improve  
access to care.

Automate & optimize  
providers' workload.

# PRICING

Physicians spend face-to-face with patients ~ 40 - 50 hours out of 160 hours per month.
