The country where I want to live

Why I want to live in the USA?

- **Their 'Can Do' Attitude**

Positivity runs through the veins of almost every American. Where some see problems, they see opportunity. The country was founded on the idea that anyone can achieve anything they set their mind to, so it is no surprise that most Americans seem entirely void of self-doubt or negativity.

- **2) It's diverse**

The vastness of the country means that no two places are the same. That's why, across the States, you can experience very different weather systems, cultural groups and topography, which means you don't even need to leave the country to experience just about anything.

- **3) Opportunities abound**

The American Dream is still alive and well. If you are legal, hard-working and determined, there's almost nothing you can't achieve in the U.S.

4) Education

The standard of schooling is so high in America, you can be sure you or your child will receive a good education and qualifications recognized around the world.

- **5) Healthcare**

Healthcare in US is amongst the very best in the world. Well funded hospitals, well trained staff and world leading medical innovation means you can be confident you will receive the very best treatment should you need it.
