The background image shows the United Nations Secretariat Building in New York City. The building is a large, classical-style structure with a prominent entrance. Above the entrance, the words "UNITED NATIONS" and "NATIONS UNIES" are inscribed in English and French, respectively, flanking the United Nations emblem. In front of the building, there are two long rows of flagpoles, each topped with a golden globe. The flagpoles are filled with the national flags of various countries, creating a colorful display. The sky is a clear, light blue, and there are some trees visible on the sides of the building.

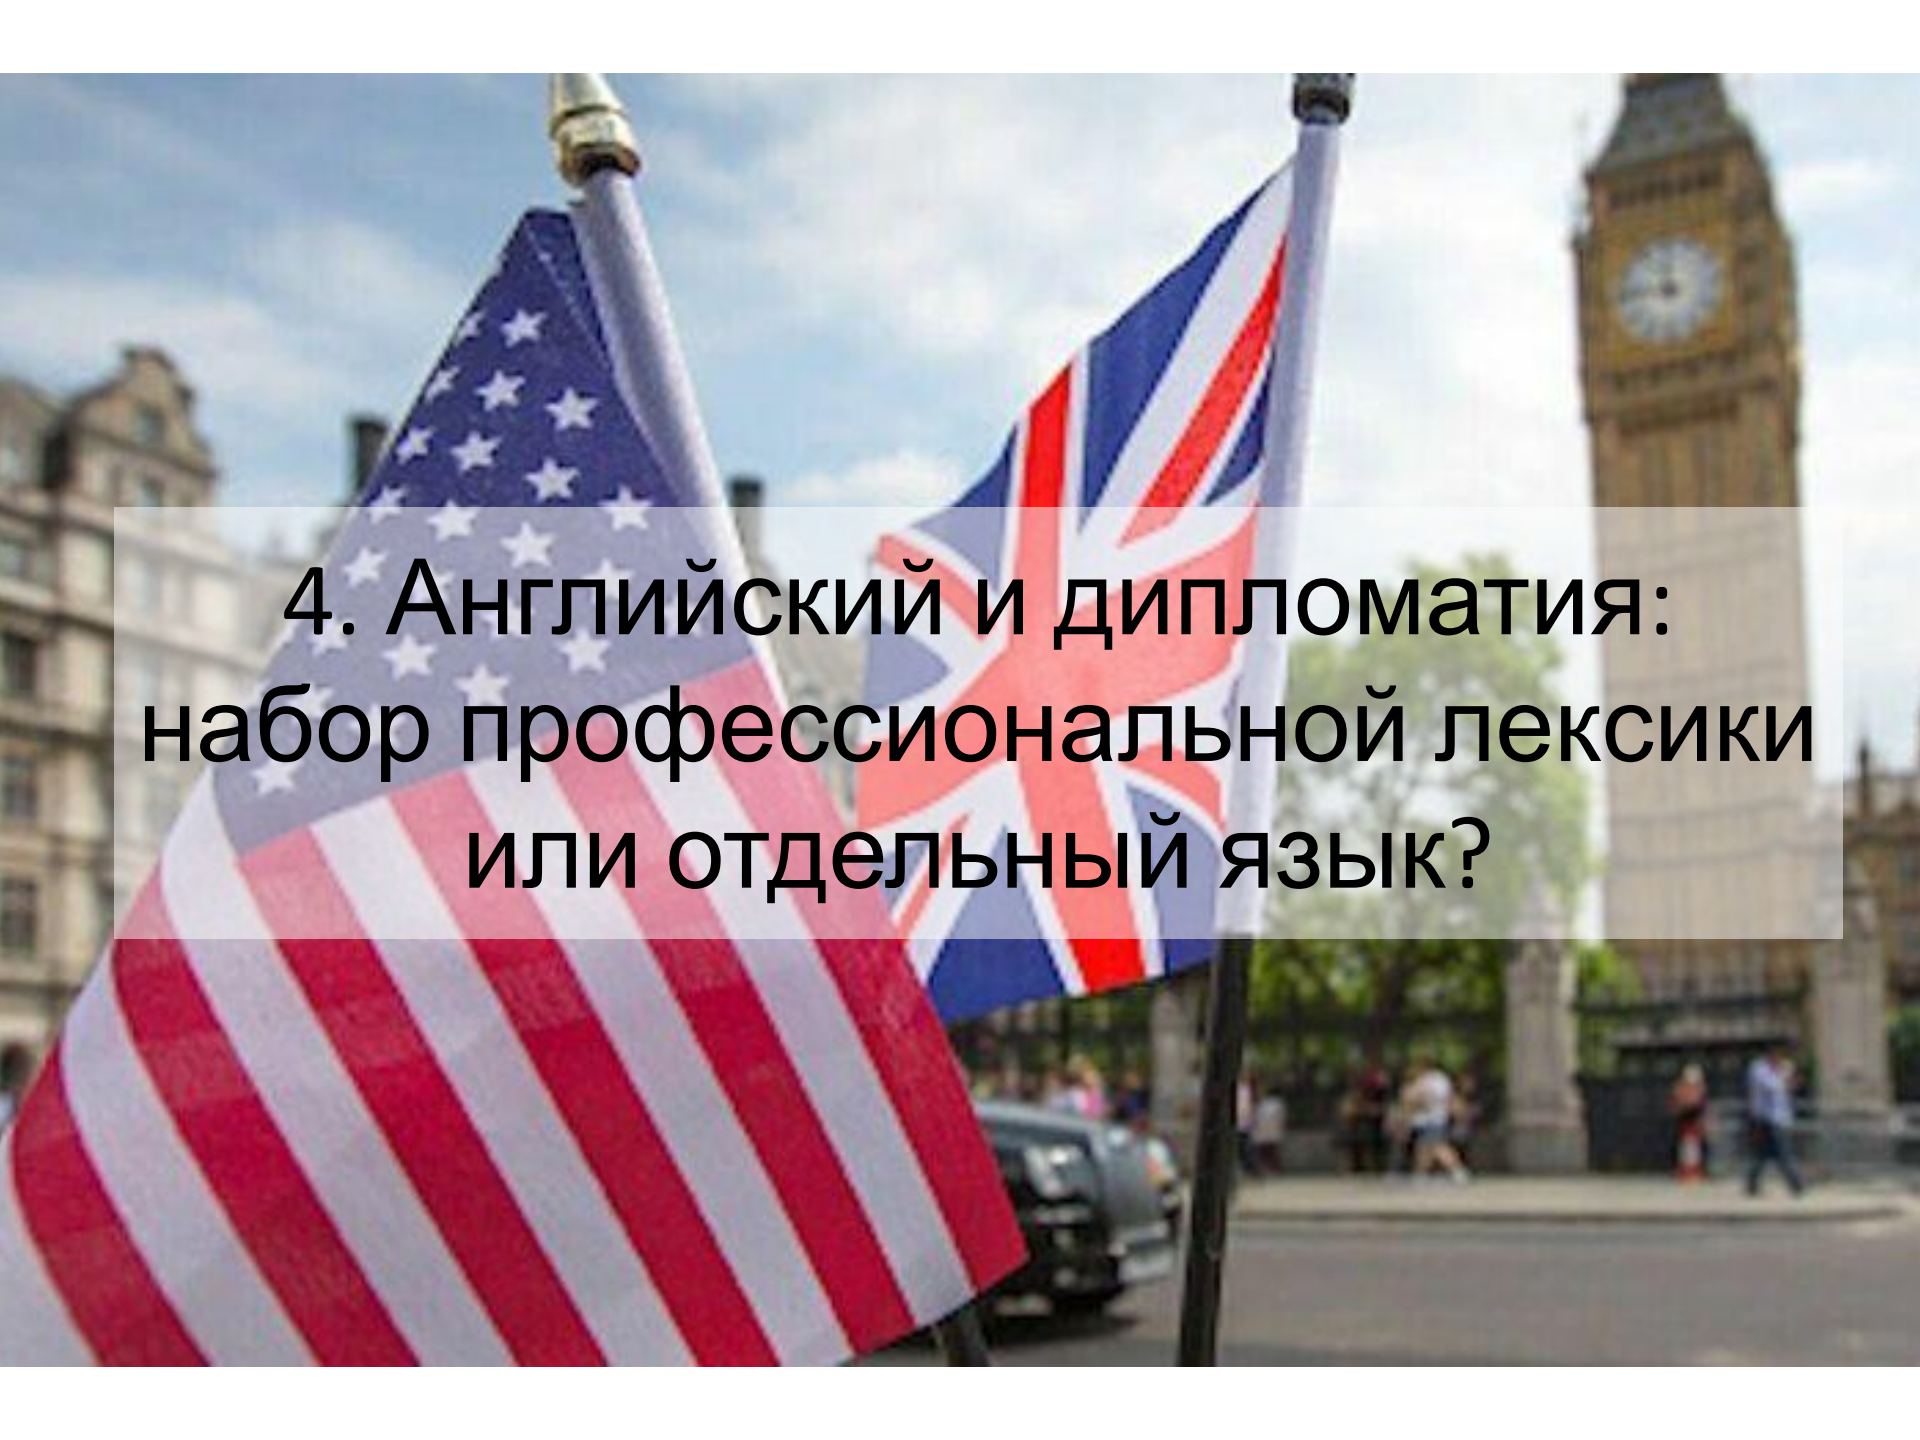

**1. ООН: История создания.
Правовой статус. Значение в
современном мире.**

The background of the slide features a low-angle shot of the United Nations Secretariat Building in New York City, a tall skyscraper with a blue glass facade. In the foreground, several national flags of UN member states are flying on tall poles. In the upper left corner, the United Nations emblem is overlaid in a semi-transparent blue color. The text is centered in a white rectangular box.

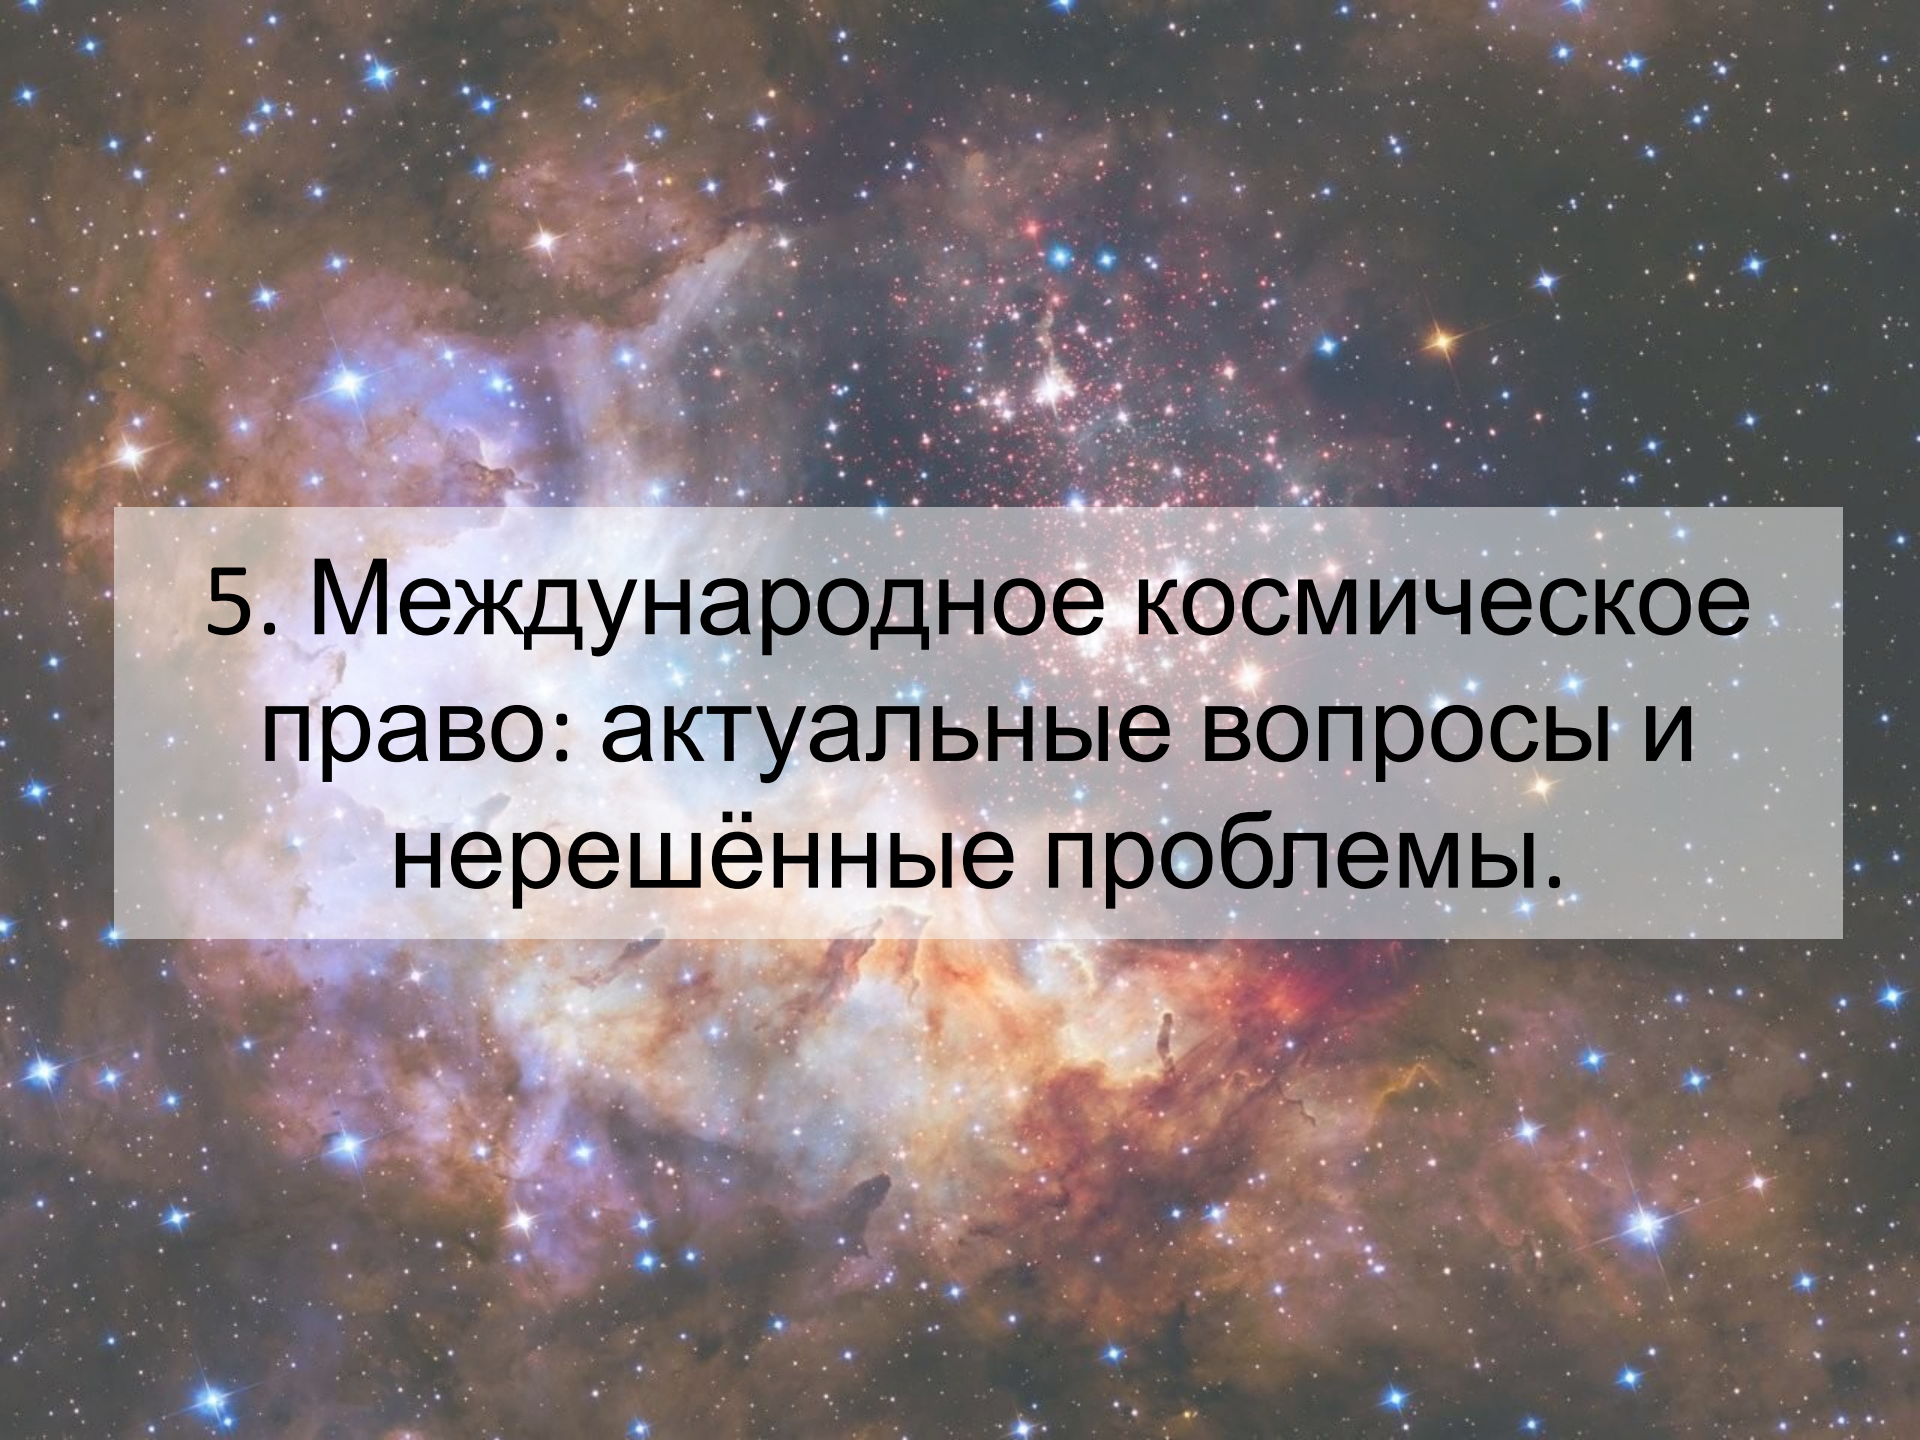

**2. Реформа ООН: назревшая
необходимость или
расшатывание устоявшейся
системы?**

3. Дипломатические привилегии и иммунитеты: вседозволенность или необходимость, продиктованная временем?

The image shows two flags on poles in the foreground: the United States flag on the left and the Union Jack on the right. In the background, the Big Ben clock tower is visible against a blue sky with light clouds. The scene is set in an urban environment, likely London.

**4. Английский и дипломатия:
набор профессиональной лексики
или отдельный язык?**

5. Международное космическое право: актуальные вопросы и нерешённые проблемы.

6. Где проходит грань между
воздушным и космическим
пространством?

A futuristic lunar mining base is visible in the background, featuring a large circular structure with a saw-like edge and various mechanical components. Two astronauts in white suits are on the moon surface; one is kneeling and examining a rock, while the other stands nearby. The moon's surface is covered in rocks and craters, and the sky is filled with stars.

7. Ресурсы Луны: общее благо или яблоко раздора?

A detailed illustration of a Mars colony. In the foreground, an astronaut in a white spacesuit stands on the right, holding a clipboard. To the left, several white, dome-shaped habitats are arranged in a line. A small rover is parked near the first habitat. In the background, more habitats are visible, along with solar panels laid out on the reddish-brown ground. The landscape is a vast, hilly desert under a hazy, orange sky, suggesting a sunset or sunrise on Mars.

8. Колонизация небесных тел: правовые аспекты.
