МИД России

The image shows the United Nations Secretariat Building in New York City. The building is a large, classical-style structure with a prominent entrance. Above the entrance, the words "UNITED NATIONS" and "NATIONS UNIES" are inscribed on the facade, separated by the United Nations emblem. In front of the building, there are two long rows of flagpoles, each topped with a golden globe. The flagpoles are filled with the national flags of various countries, creating a colorful display. The sky is overcast, and there are trees visible on the sides of the building.

**1. ООН: История создания.  
Правовой статус. Значение в  
современном мире.**

The background of the slide features a low-angle shot of the United Nations Secretariat Building in New York City, a tall skyscraper with a blue glass facade. In the foreground, several national flags are flying on tall poles. A large, semi-transparent blue UN emblem is overlaid in the upper left corner. A white rectangular box with a thin black border is centered over the image, containing the main text.

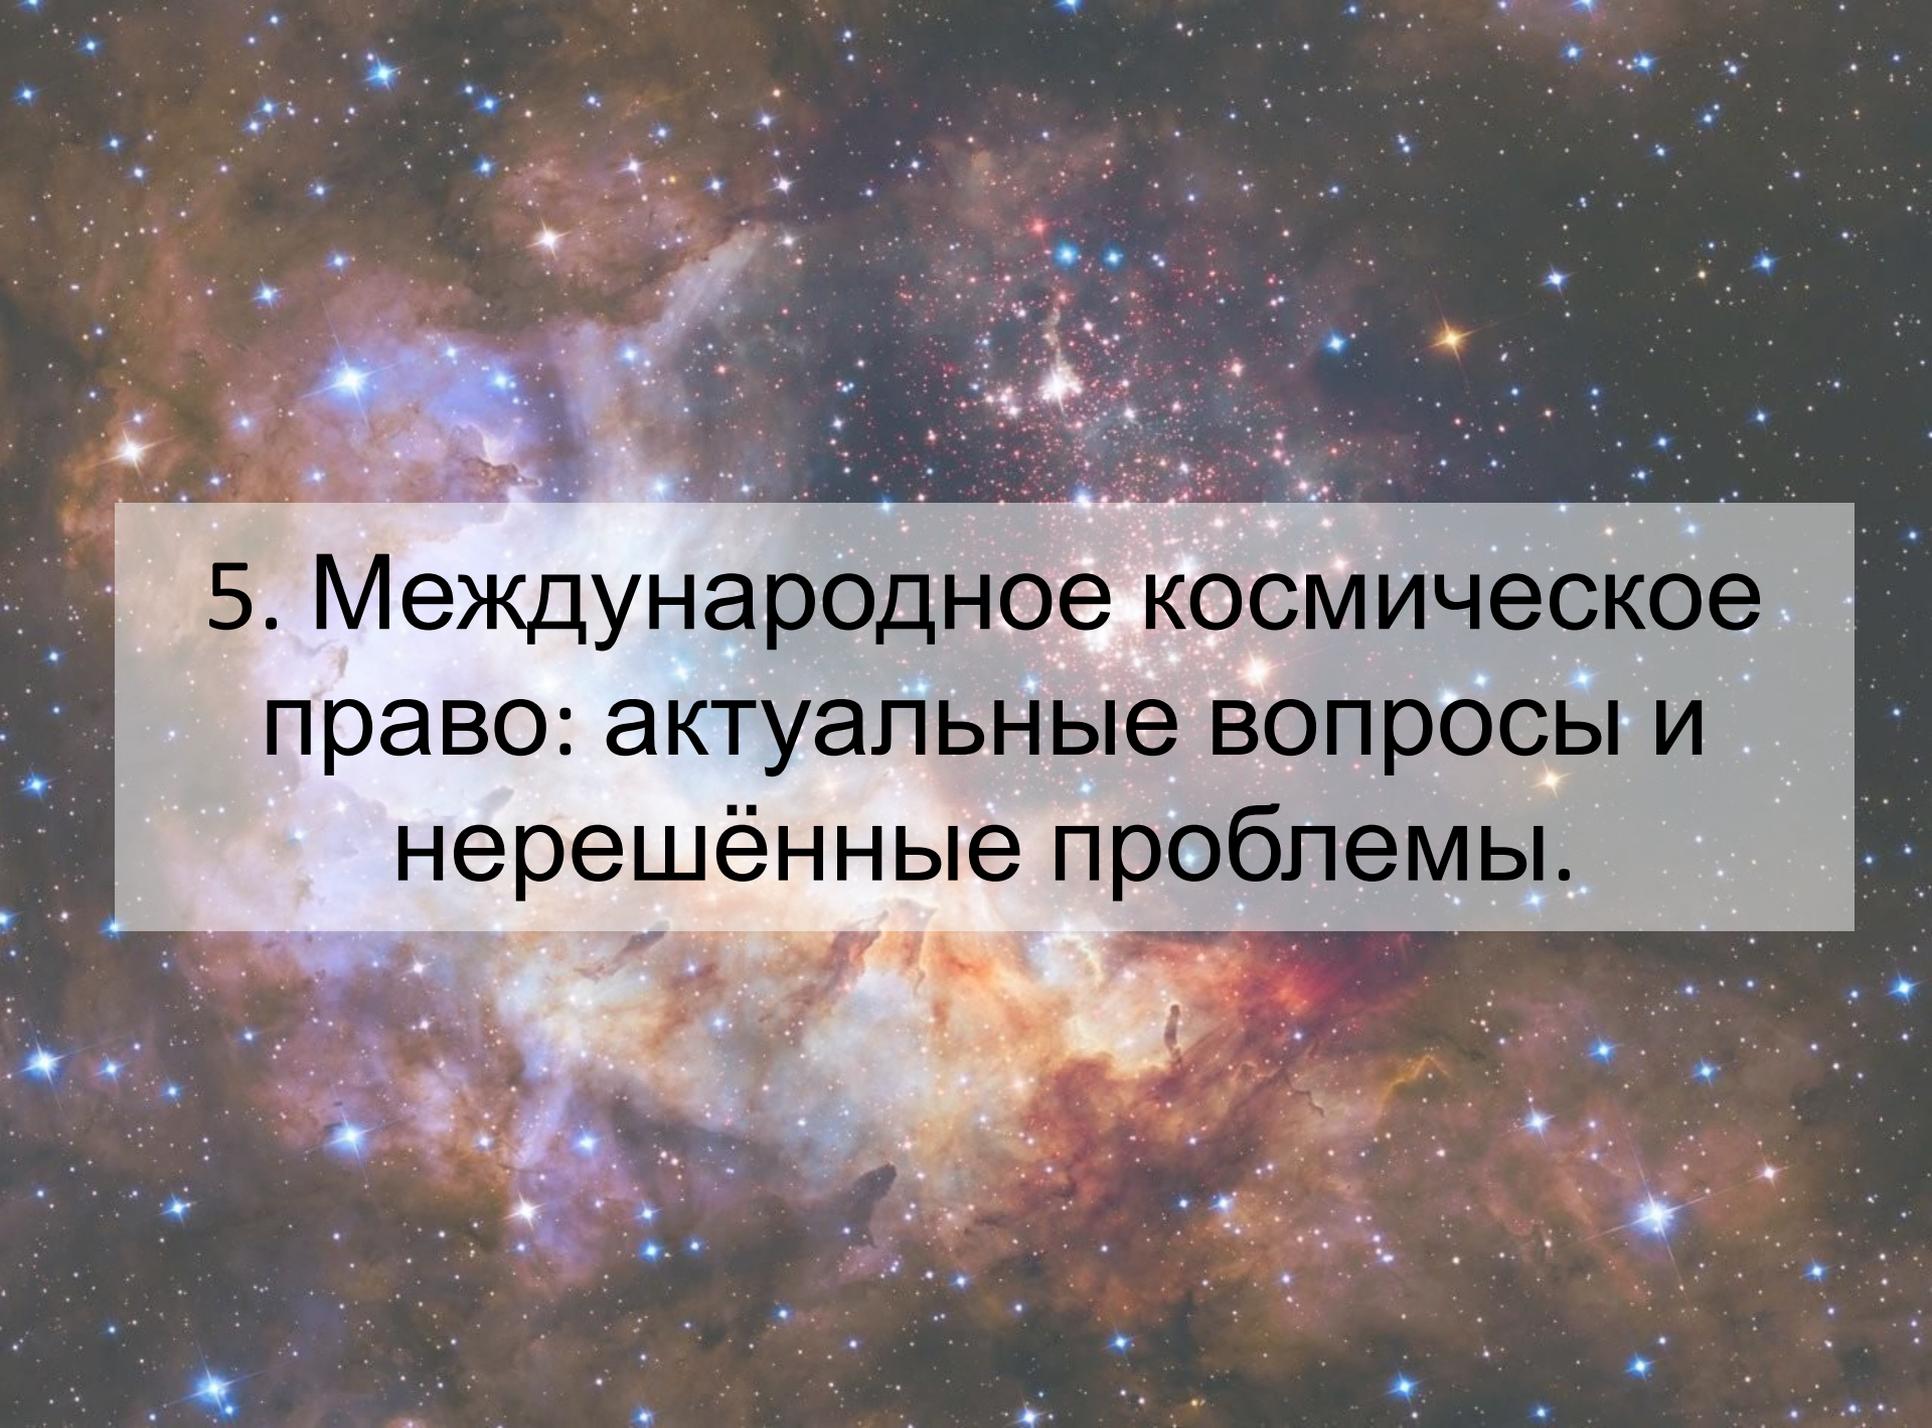

**2. Реформа ООН: назревшая  
необходимость или  
расшатывание устоявшейся  
системы?**

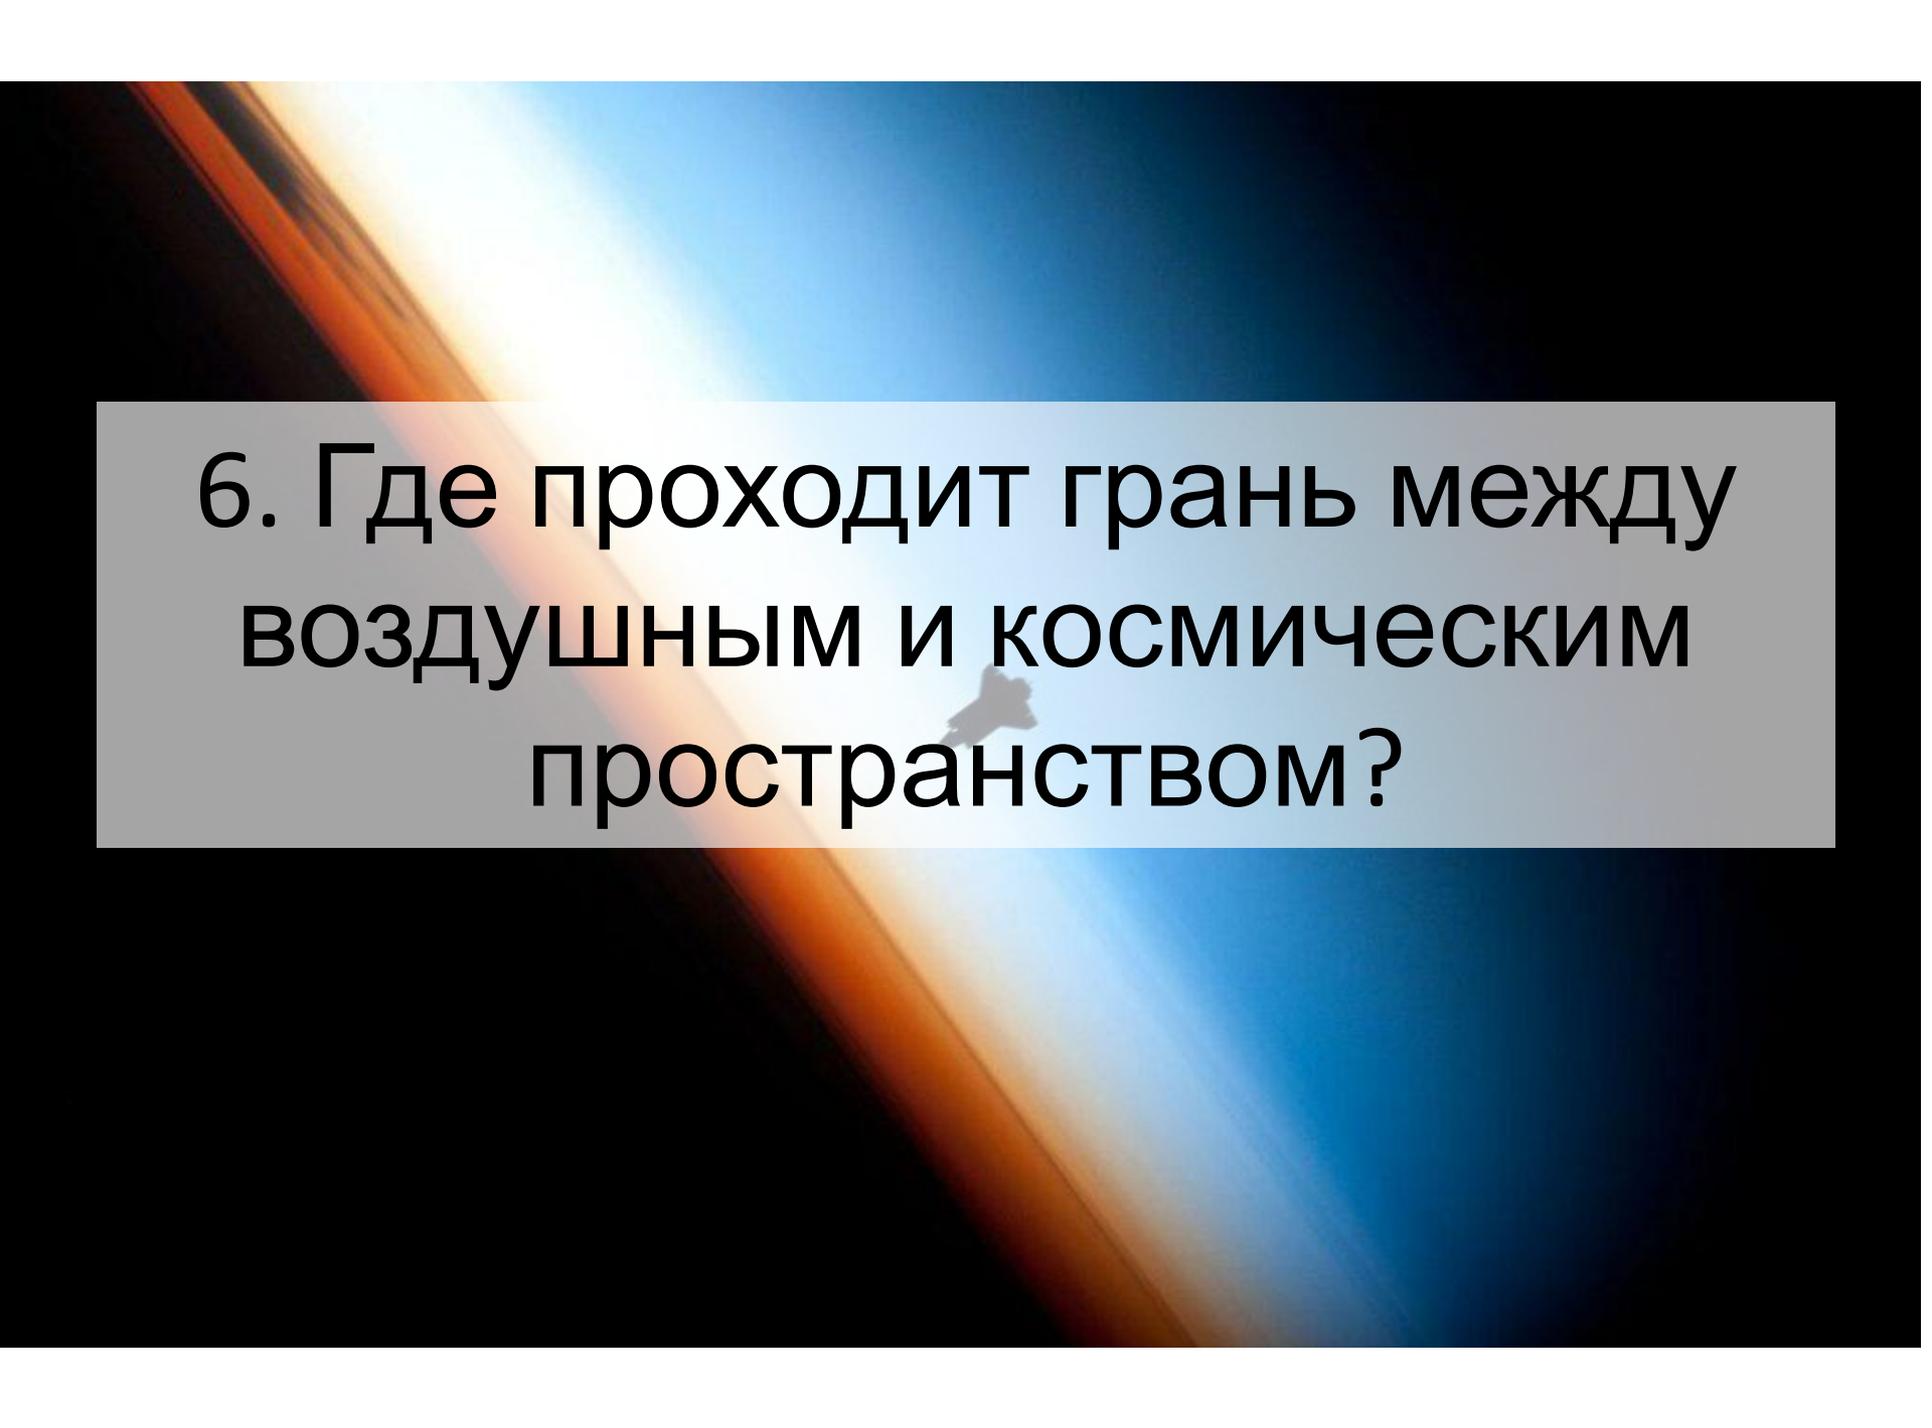

3. Дипломатические привилегии и иммунитеты: вседозволенность или необходимость, продиктованная временем?

The image shows two flags on poles in the foreground: the United States flag on the left and the Union Jack on the right. The background is a blurred city street in London, with the Elizabeth Tower (Big Ben) visible on the right side. A semi-transparent white box is overlaid on the center of the image, containing the text.

**4. Английский и дипломатия:  
набор профессиональной лексики  
или отдельный язык?**

5. Международное космическое право: актуальные вопросы и нерешённые проблемы.

6. Где проходит грань между  
воздушным и космическим  
пространством?

A futuristic lunar mining base is visible in the background, featuring a large circular structure with a saw-like edge and various mechanical components. Two astronauts in white suits are on the moon surface; one is kneeling and examining a rock, while the other stands nearby. The moon surface is covered in dark soil and rocks, with a bright light source illuminating the scene from the left. The background is a starry space.

7. Ресурсы Луны: общее благо или яблоко раздора?

A detailed illustration of a Mars colony. In the foreground, an astronaut in a full spacesuit stands on the right, holding a clipboard. To the left, several white, dome-shaped habitats are arranged in a line. A small rover is parked near the first habitat. In the background, more habitats are visible, along with solar panels laid out on the ground. The landscape is a vast, reddish-brown desert with rolling hills under a hazy, orange sky, suggesting a sunset or sunrise on Mars.

## 8. Колонизация небесных тел: правовые аспекты.
