The Great Barrier Reef.

The Great Barrier Reef has always been very popular with both locals and _____. It is hard to find another place where the unique _____ has been conserved since the beginning of times. But nowadays the Great Barrier Reef suffers from the same ecological issues, the rest of the planet does. The water pollution, caused by the chemicals is the reason of the coral _____. The humpback whales suffer from the _____ of the breeding grounds, sea turtles suffer from the plastic litter, floating on the surface of the once crystal clear water.

People must _____ find solutions for these problems; otherwise, the unique ecosystem will become extinct.
