

## Structural model

- Input Layering Data (Well log, production)
- Structural interpretation based on seismic data
- Horizon model
- + Variations of seismic attributes analysis

## Gridding

- Gridding model
- + Variations of seismic attributes analysis

## Clay content Model

- Single well facies
- Seismic inversion results
- + Variations of seismic attributes analysis

## Petrophysics Model

- Porosity, Permeability (Relationship) model
- Saturation model
- + Variations of seismic attributes analysis

**NTG Model**
