

My experience

I would like you to tell about my first experience of cooking soup with the pearl barley. It was a horror.

I took a glass of pearl barley and put it in the milk. After the 7 min. the pearl went out. The pearl went so fast that I have no time to took a plate with a spoon. I made a lot of shout and noise. All kitchen was in pearl.

But it was not been a soup it was a porridge and all kitchen was like a big piece of porridge. And I made the discovery. If you want to cook a soup you must take a little bit pearl barley!
