

Chromotherapy

□ *Chromotherapy* is a non-invasive method of treatment of **light and color**.

Chromotherapy is a natural way of treatment.

- Method of color therapy is based on the fact that light as electromagnetic radiation penetrates the tissues and carries energy. *Chromotherapy* has no contraindication.

Chromotherapy is an action of light and colors. Every colour hue has special properties and has a stimulative effect on the nervous system. Red has a stimulating effect, orange is the color of revitalizing effect, yellow - calming effect, green - relaxing effect.

Treatment of sounds and flavors had been known for a long time. Treatment with effects of light and color - chromotherapy - has been used recently, due to a lack of scientific knowledge about the impact of colour and light towards the human.

All colors have its radiation that carries certain information. The impact of the particular color on a certain internal organ human may be curative.

Chromotherapy normalizes the activity of internal organs and has a great influence on them.

□ *For the first time the chromo-therapy was included in acrylic whirlpool baths at the end of the 1990s and since then it has become more and more popular.*

□ Chromotherapy is widely used in cosmetology and actively encouraged by leading cosmetologists of the world.
