THE AUTOMOBILE REVIEW
And Automobile News

December 15, 1903.

The Advance of *The* Ford

All the *best* things in this world are usually worth even more than the price you pay for them. A *cheap* automobile is dear at any price, but a car like the Ford is a bargain at any reasonable figure.

The advanced and improved construction, the higher grade of materials used in building the machinery and body, and the addition of heavy 3 in. detachable tires to its equipment compel us to make the price of the 1904 Ford

\$900 with Tonneau \$800 as a Runabout.

Lamps, Horn and Brass Trimmings Extra.

Mr. Ford made the first automobile in Detroit and the third in the United States. THE FORD MOTOR CAR of today represents the most advanced type of automobile construction.

WE agree to assume all responsibility in any action the Trust may take regarding alleged infringement of the Selden Patent to prevent you from buying the Ford. "The car of satisfaction."
