

# Занятие 1

# Panic! At the Disco - High Hopes

[Chorus]

Had to have high, high hopes for a living  
Shooting for the stars when I couldn't make a killing  
Didn't have a dime but I always had a vision  
Always had high, high hopes (*High, high hopes*)  
Had to have high, high hopes for a living  
Didn't know how but I always had a feeling  
I was gonna be that one in a million  
Always had high, high hopes

Mama said, fulfill the prophecy  
Be something greater, go make a legacy  
Manifest destiny, back in the days  
We wanted everything, wanted everything

Mama said, burn your biographies  
Rewrite your history, light up your wildest dreams  
Museum victories, every day  
We wanted everything, wanted everything

Mama said don't give up, it's a little complicated  
All tied up, no more love and I'd hate to see you waiting

[Chorus]

## Понятие о гласных и согласных звуках

Все звуки речи делятся на два больших класса: **гласные** и **согласные**.

Все гласные звуки — звонкие. При их произнесении голосовые связки колеблются.

В зависимости от *положения языка* в полости рта **гласные** делятся на:

- 1) *гласные переднего ряда* — кончик языка упирается в нижние зубы, и в задней части полости рта образуется значительное пустое пространство — [i:], [e];
- 2) *гласные заднего ряда* — язык оттянут назад и его задняя спинка в той или иной степени приподнимается к задней части мягкого нёба, кончик языка при этом опущен и несколько отходит от нижних зубов — [a:], [ɔ:];
- 3) *гласные среднего ряда, или центральные гласные* — язык в той или иной степени приподнят так, что вся масса языка лежит максимально плоско — [ʌ], [ə:].

В артикуляции гласных звуков большую роль играют положение языка в полости рта, расстояние между челюстями, округление и напряженность губ.

В зависимости от *длительности* и *качества звучания* английские **гласные** делятся на **монофтонги** (краткие, полудолгий, долгие) и **дифтонги**:

- монофтонги:

- краткие — [i], [u], [ʌ], [ɔ], [ə], [e];
- полудолгий — [æ];
- долгие — [i:], [u:], [a:], [ɔ:], [ə:].

- дифтонги — [iə], [uə], [ɛə], [aɪ], [ɔɪ], [ei], [əu], [au].

Для **согласных** звуков характерно то, что при их произнесении органы речи либо смыкаются, образуя полную преграду (смычные согласные — [p], [d]), либо сближаются, создавая неполную преграду — щель (щелевые согласные — [f], [ʃ]). То есть в зависимости от способа образования преграды воздуху согласные звуки подразделяются на *смычные* и *щелевые*. Кроме того, преграда воздуху может представлять собой сначала полную преграду, затем — щель (русские звуки — [ц], [ч], английские — [tʃ], [dʒ]). Большинство согласных звуков являются звуками шума (*шумные*). Однако есть такие согласные, в которых музыкальный тон преобладает над шумом — [l], [ŋ], [n], [m]. Они называются *сонантами* (английские сонанты значительно музыкальнее русских).

По работе голосовых связок согласные подразделяются на *звонкие* — [b], [d] и *глухие* — [p], [t].

По действующему органу согласные делятся на *губные* (губно-губные — [m], [p] и губно-зубные — [f], [v]); *язычные* (апикальные, то есть произносимые кончиком языка, — [d], [n]; средняяязычные — [j]; задняяязычные — [k], [g]) и *фарингальные* — [h].

# Характеристика звуков. Установочные упражнения.

- [t] — глухой смычный взрывной согласный наподобие [th]; очень напряженный язык в обычном положении, кончик языка — на альвеолах. Воздух вырывается с сильным шумом.
- [d] — звонкий смычный согласный; язык в обычном положении (см. пункт 1 правила), кончик — на альвеолах. Звук очень аккуратный. Звуки составляют пару [d] : [t].
- [n] — носовой сонант, кончик языка — на альвеолах. Отличается от русского «н» большей музыкальностью и продолжительностью звучания.
- [l] — ротовой сонант, кончик языка — на альвеолах. Отличается от русского «л» большей музыкальностью и продолжительностью звучания. Имеет две разновидности: «темное» и «светлое» [l]. «Светлое», или смягченное, [l] произносится в начале слова перед гласным: **let** [let]; «темное», или более твердое, [l] произносится в конце слова: **tell** [tel]. «Темное» [l] по качеству немного напоминает звук «у», так как слегка огублено.
- [p] — глухой смычный взрывной согласный наподобие [ph]; губно-губной; напряженные губы размыкаются с сильным шумом.
- [b] — звонкий смычный согласный; губно-губной; губы размыкаются очень аккуратно. Звуки составляют пару [b] : [p].
- [i] — краткий гласный звук переднего ряда высокого подъема. Язык находится в обычном положении, губы — в плоском укладе, не слишком растянуты, расстояние между верхними и нижними зубами примерно 5 мм. Органы речи сильно напряжены. Отличается от русского «и» специфическим тембром.

## READING

**2A** Look at the photos and the headlines. Answer the questions.

- 1 What do you think the stories are about?
- 2 Do you think it was difficult for the tallest man in the world to find a girlfriend? Why/Why not?
- 3 What do you think 'third time lucky' means?

**B** Read the stories to check your ideas.

### TALLEST MAN FINDS LOVE

The world's tallest man married a woman who is twenty-five years younger than he is – and much shorter. Bao Xishun, who is 2.36m tall, married Xia Shujian, 1.70m.

Bao, who comes from Inner Mongolia, became famous when he appeared in the *Guinness Book of Records* as the world's tallest man in 2006.

Before that Bao was very shy. He didn't go out much and he didn't have a girlfriend. He worked in a restaurant, but he didn't make much money.

But when he became famous Bao started to earn good money doing advertisements. He decided to look for a wife. He advertised all over the world, but fell in love with a saleswoman from his home town, Xia.

After just one month Xia and Bao got married.

### Third time lucky

Jean and Bert Jolley from Blackburn, UK, recently married for the third time. The couple first married in 1972. 'I liked her straight away,' said Bert.

He asked her to marry him and she accepted. But eight years later they started to have problems. They argued a lot, so they got divorced in 1980. But a few months later they remarried.

Unfortunately, the couple started arguing again. So in 1986 they divorced for the second time. Then they got back together again – but did they get married? No, they didn't. 'He asked me, but I said no,' explained Jean. When Bert fell ill, Jean changed her mind. 'That's why we decided to marry again.' On Friday the couple married for the third and final time. 'I still don't like wedding cake,' said Bert, 'and I've tried a few!'
