«Statistics and ethics»

Key principles at statistical ethics:

- Honesty
- Objectivity
- Integrity
- Confidentiality

Defenders of statistical ethics:

United Nations
organization

PUBLIC LEVEL

Government laws

PRIVATE LEVEL

In case of a mistake :

1. Discussing with colleagues
2. Remember the principle of proportionality of response to threat

3. Establishing a written record (indicate how this error violates norms for statistical work)

Possible preventative actions :

- studying previous problems;
- providing training on ethics
- developing agency-specific mechanisms for responding to ethical concerns;
- further developing and applying a range of substantive, methodological, operational, and legal safeguards.

Thank you for attention!
