STATISTICS Trade and tariff data

The WTO provides quantitative information in relation to economic and trade policy issues. Its data-bases and publications provide access to data on trade flows, tariffs, non-tariff measures (NTMs) and trade in value added.

STATISTICS Merchandise trade

WTO provides data on imports and exports of goods, aggregated or individually by product and/or country. Annual data are updated in April and in July of each year, and broken down by commodity group and selected origin and destination in August. Quarterly data are updated every 2 weeks and monthly data are updated daily.

Databases and Time Series [back to top](#)

- [Statistics Database \(SDB\)](#)
Online database containing time series on international trade, country trade, tariff and [services profiles](#). Updated 3 times a year, in April, July and in August.
- [Short-term trade statistics](#)
Monthly data updated daily and quarterly data updated every 2 weeks.

Statistics database

Welcome to the WTO Statistics Database, which allows you to retrieve statistical information in the following presentations.

- The *Trade Profiles* provide predefined information leaflets on the trade situation of members, observers and other selected economies;
- The *Tariff Profiles* provide information on the market access situation of members, observers and other selected economies;
- The *Services Profiles* provide detailed statistics on key infrastructure services (transportation, telecommunications, finance and insurance) for selected economies;
- The *Aid for Trade Profiles* provide information on trends of aid for trade, trade costs, trade performance and development for selected Aid for Trade recipients;
- The *Time Series section* allows an interactive data retrieval of international trade statistics.

Коэффициент внутриотраслевой международной специализации,

%

Выводы

- 1. Швеция, экспортирующая примерно 50% своего производства, более вовлечена в международную торговлю, чем Норвегия, однако и более зависима от международных рынков.
 2. Экономика Швеции более открыта для международной торговли, об этом говорит импортная квота, колеблющаяся на уровне 50-55%, опять же, это обуславливает зависимость от импортной продукции.
 3. Коэффициент опережения темпами роста экспорта темпов роста ВВП у Норвегии во много раз больше, поэтому Норвегия более вовлечена в МРТ, чем Швеция.
 4. Коэффициент внутриотраслевой международной специализации показывает, что Швеция более склонна к импорту, чем Норвегия.
