individuals**

NSTU IS ONE OF THE TOP TEN UNIVERSITIES IN RUSSIA. IT IS NOT ONLY A GREAT EDUCATIONAL BUT ALSO A SCIENTIFIC CENTER OF SIBERIA AND THE FAR EAST

IT WAS FOUNDED IN 1953 AND GOT THE NAME OF NOVOSIBIRSK INSTITUTE OF ELECTRICAL ENGINEERING

THE SAME YEAR IT OPENED THE DOORS OF TWO FACULTIES TO SCHOOL LEAVERS OF RUSSIA. THE NAME OF PROFESSOR GEORGY LYSHCHINSKY, THE RECTOR OF THE INSTITUTE FROM 1955 TILL 1990

At present NSTU trains specialists at 15 faculties: Radio Engineering, Power Engineering, Physical Engineering, Aircraft, Business, Electromechanical Engineering, Humanities and other

NSTU is located in 8 buildings, which have all the necessary equipment for high-quality training sessions. University-wide, faculty and department classes have been organized on the basis of modern personal computers (currently, only 3203). All 8 NSTU buildings and dormitories are connected to the local network of the university, which includes more than 443 servers of various levels and purposes; 2770 workplaces are connected to the World Wide Web. The laboratories of technical faculties are equipped with modern machine tools, control and measuring equipment, and industrial robots.

The first- and second-year students get knowledge in fundamental sciences such as mathematics, physics, chemistry and humanities

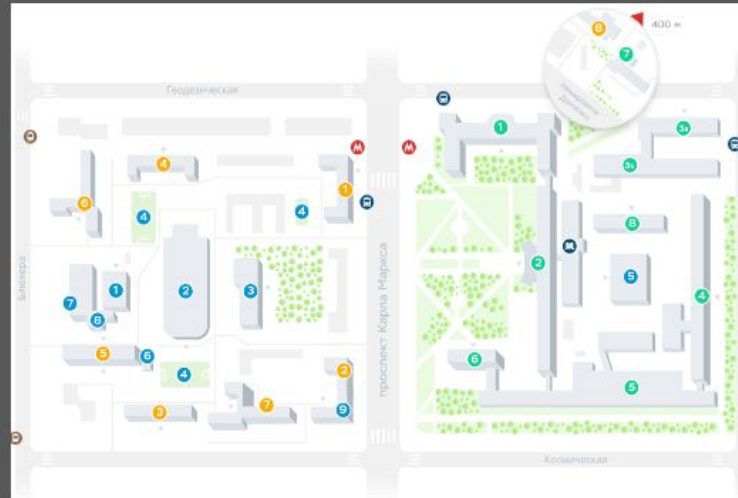

It also necessary say about foreign language study at our university. The students can study english, german or french for at least one year

I study at the Faculty of Aircraft, and I really like NSTU not only because it is an excellent presentation of knowledge, but also excellently conduct online lessons, this is very important in modern realities. Therefore, I recommend NSTU to you as its student. Come and we will play bowling

As you can see on the map, our institute has many buildings. The university also has many sports complexes.

- 1-8** Учебные корпуса
