

Why you should deal with us

-
- Providing an Upwork Account

Providing an Upwork Account

– Sign Up and Lend it Us

The reasons why we want you to sign up and lend it us:

1. My team members are mostly based in China. In China, government didn't allow to access the freelancing marketing platforms like Upwork, Freelancer, Guru, etc. We already tried to use several kinds of VPN services, but those accounts have been suspended a few hours or days later.
2. Upwork is one of popular freelancing marketing platforms, it provides the remote jobs for freelancers. Because of the pandemic, we have lost local jobs. So, we are trying to find remote opportunities on freelancing platforms.

Looking for somebody based in Europe and America

The reasons why we are looking for somebody based in Europe and America

1. Most of the clients are looking for the candidates who are familiar with English. (has a good communication skills)
2. My buddies' hourly rate and salary is very low. For example, there are US Only jobs in Upwork for USA candidates. The average hourly rate is over \$50/hr. So, if that candidate can work full-time (40 hours per week), he can get about 8k per month.

What you will get from us

- Your Benefits

1. You will get a passive income every month. In the first period of using your account, the income might be low because the account doesn't have any reviews from clients. But if the number of reviews will be increased, then the income will be more and more.
2. There are two method you will get paid. The first one is a percentage basis and the second one is a fixed basis. We prefer to suggest the first method. Of course, if we will not get any income in a month, we will pay you some money for using your electricity, internet, computer, etc.

What we will guarantee

- Guaranteeing

1. We will ensure that we will not use your credit information for any other illegal purposes.
2. We will just use the Upwork account on the chrome browser. We will not touch the other stuff on your computer. If you can't believe it, we will use a clean computer. (no data, no personal information, etc.)

* If we will violate the above 2 terms, we will provide you 10k for the rewards.

Why we need to use your account on your computer

- How it works

1. The location detecting AI system was introduced in the Upwork platform, so if we log in to your account on my side(computer), they will block that account. It is very serious. If you have only one computer, you can create a new user or install a virtual box(or VMware) on your computer until we will get the first income from your account. No need for a high-performance computer because we will just use a chrome browser.
2. We can use your account on your computer using Anydesk or TeamViewer. We prefer to use Anydesk than TeamViewer. Anydesk is a remote control application. After installing Anydesk on your computer, it shows 9 digits. When you send me it, I can access your computer.

You may think all of this is incredible and a lie, but actually, there are many people working with us in this way. We are working hard to generate more income and trying to find more partners of ours constantly.

Then we will grow bigger and bigger. It will become the best development team in the world.
