

# Diptera Chironamidae

Fig. 1 <https://ru.wikipedia.org/>

Nemchinov Evgenii

## How it looks like?

Factors:

1. Temperature
2. pH
3. Troph
4. Anthropogenic influence

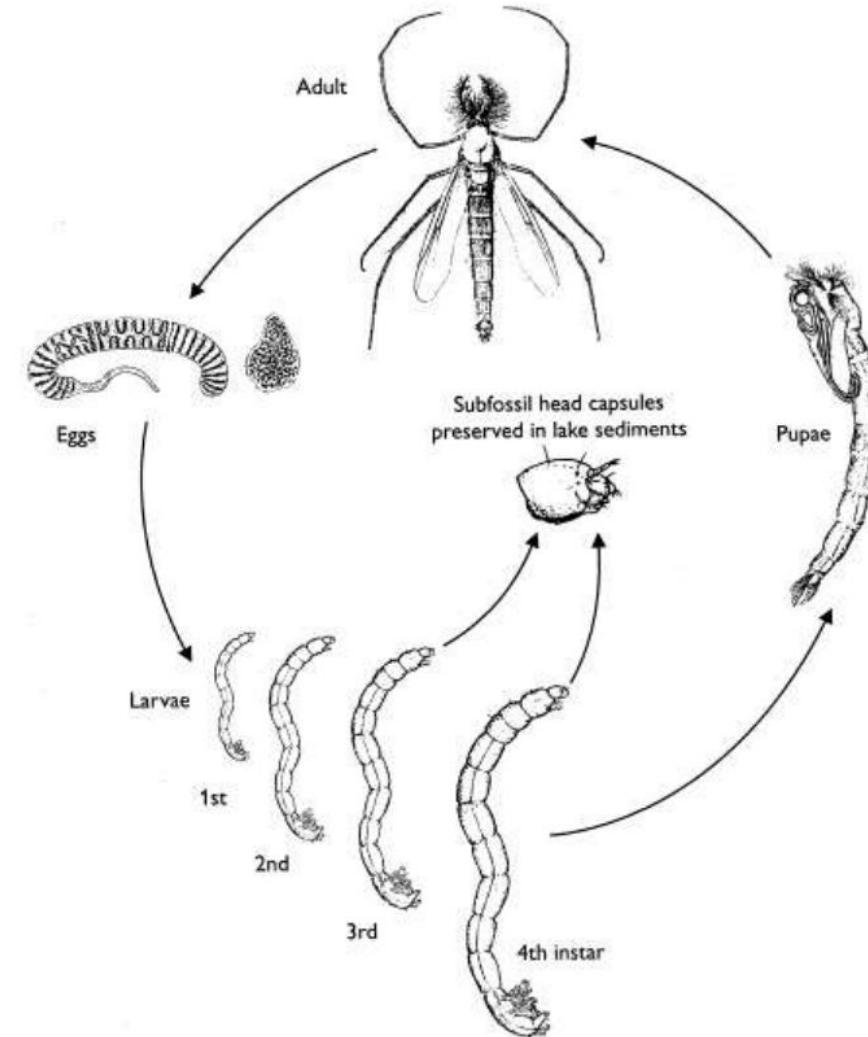

Fig. 2 Lifecycle of chironomedes

# Time frame

Late-ice period – p.d

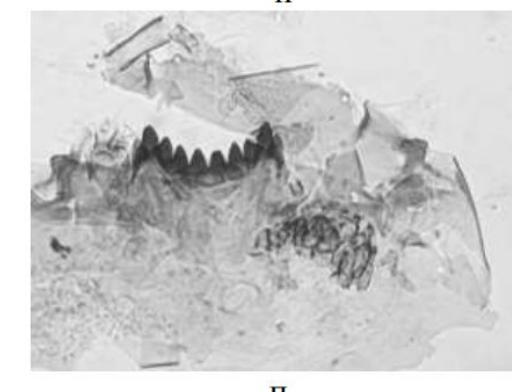

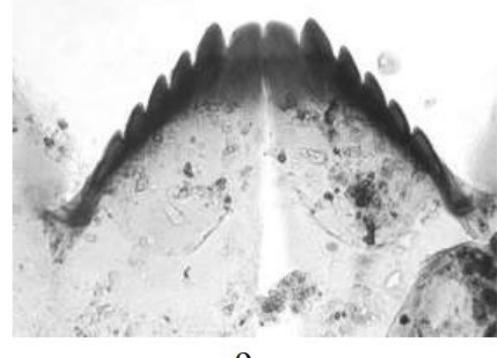

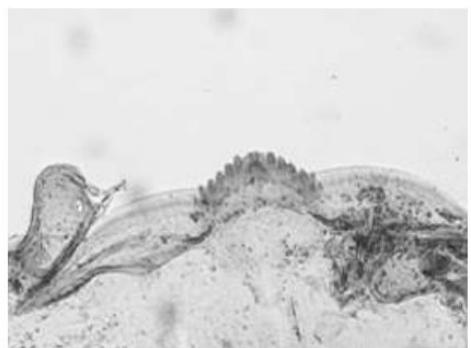

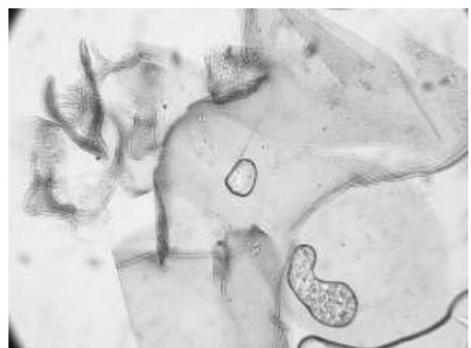

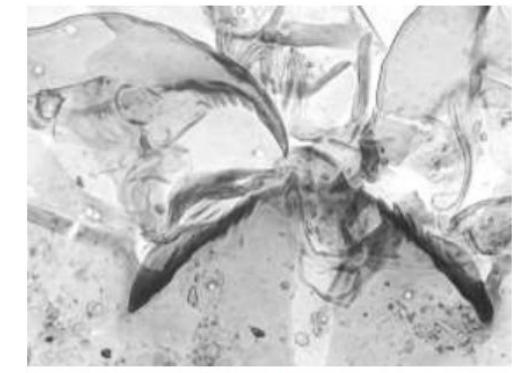

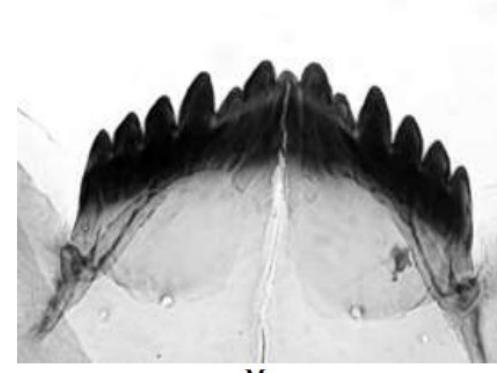

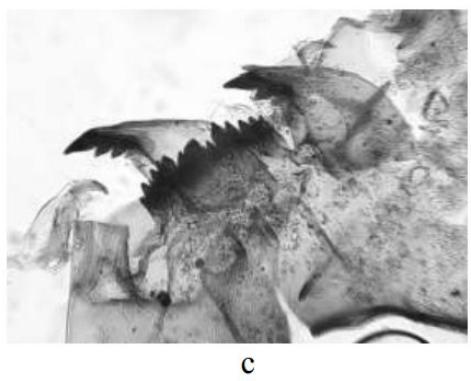

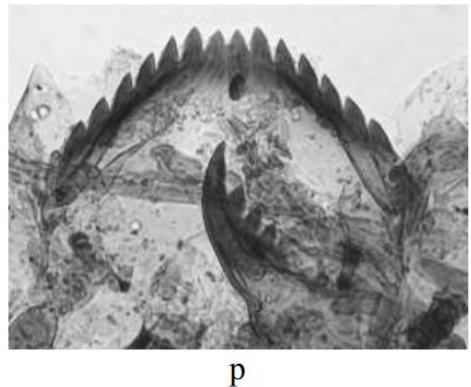

Fig. 3 Chironomidae sediments

# Advantages

1. Narrow tolerance
2. Prevalence
3. Good persistence
4. Lot's of literature (glossary)
5. Response locality

Thank you for attention
