

Please change the perspective from the other side, so we can see the other houses in the background.

The roof is too high. the roof will be only about 2/3 of the size/height

inside face of a window frame must also have the color

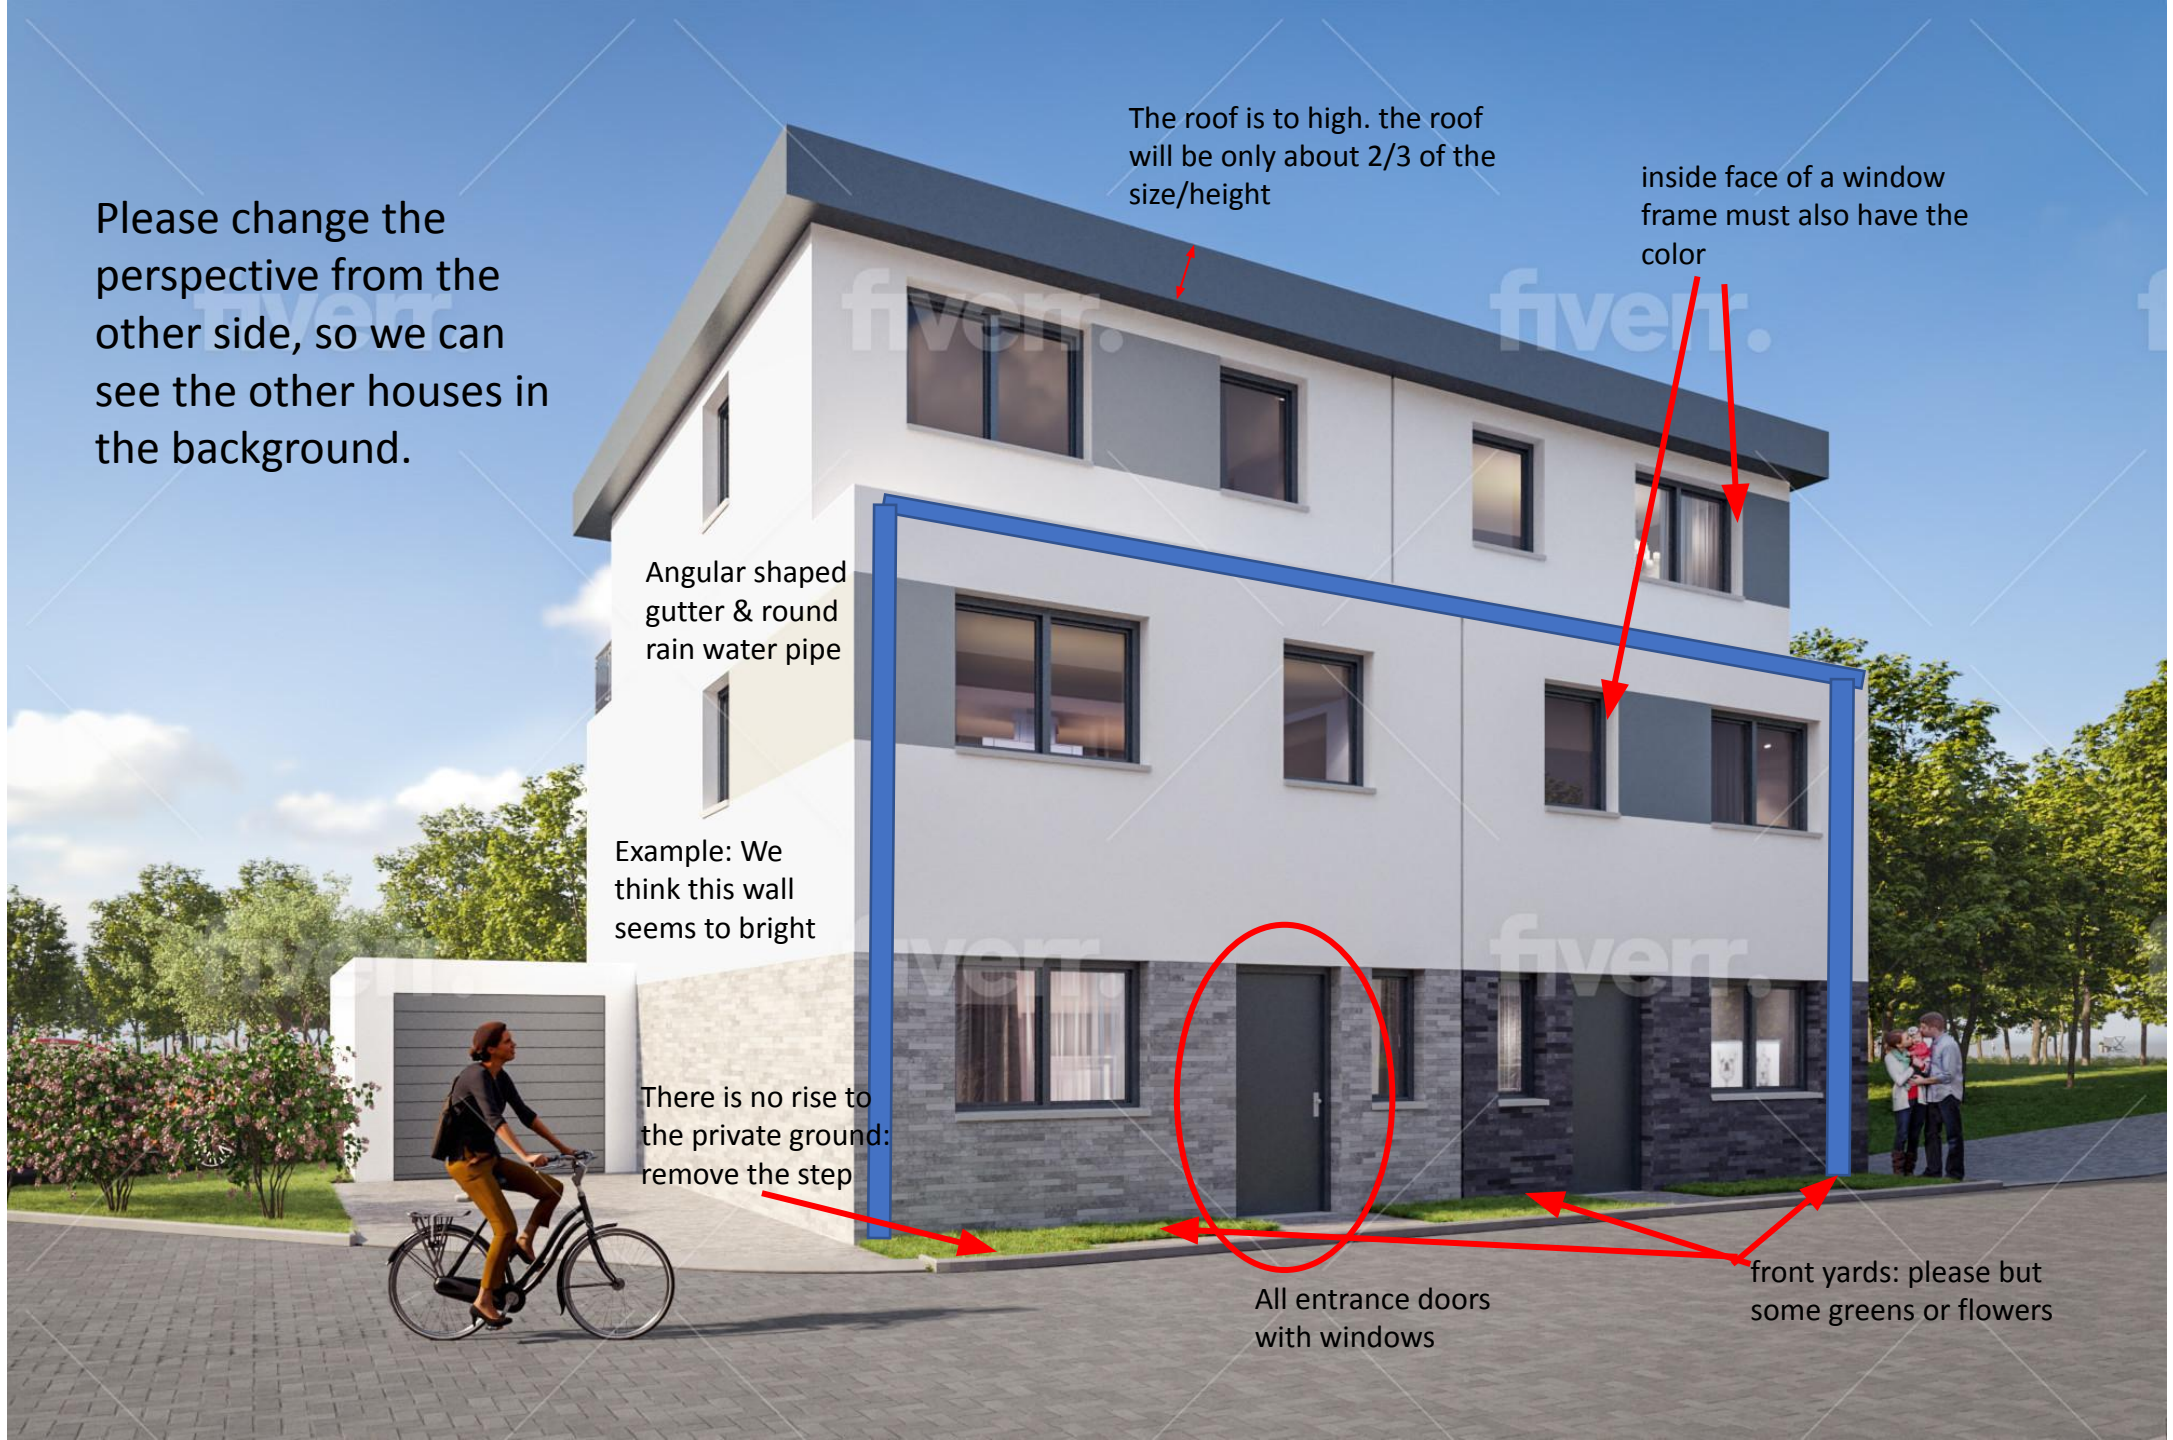

Angular shaped gutter & round rain water pipe

Example: We think this wall seems to bright

There is no rise to the private ground: remove the step

All entrance doors with windows

front yards: please but some greens or flowers

Please change the perspective: a little higher... we do not like the sharp angle of the roof (top, left)

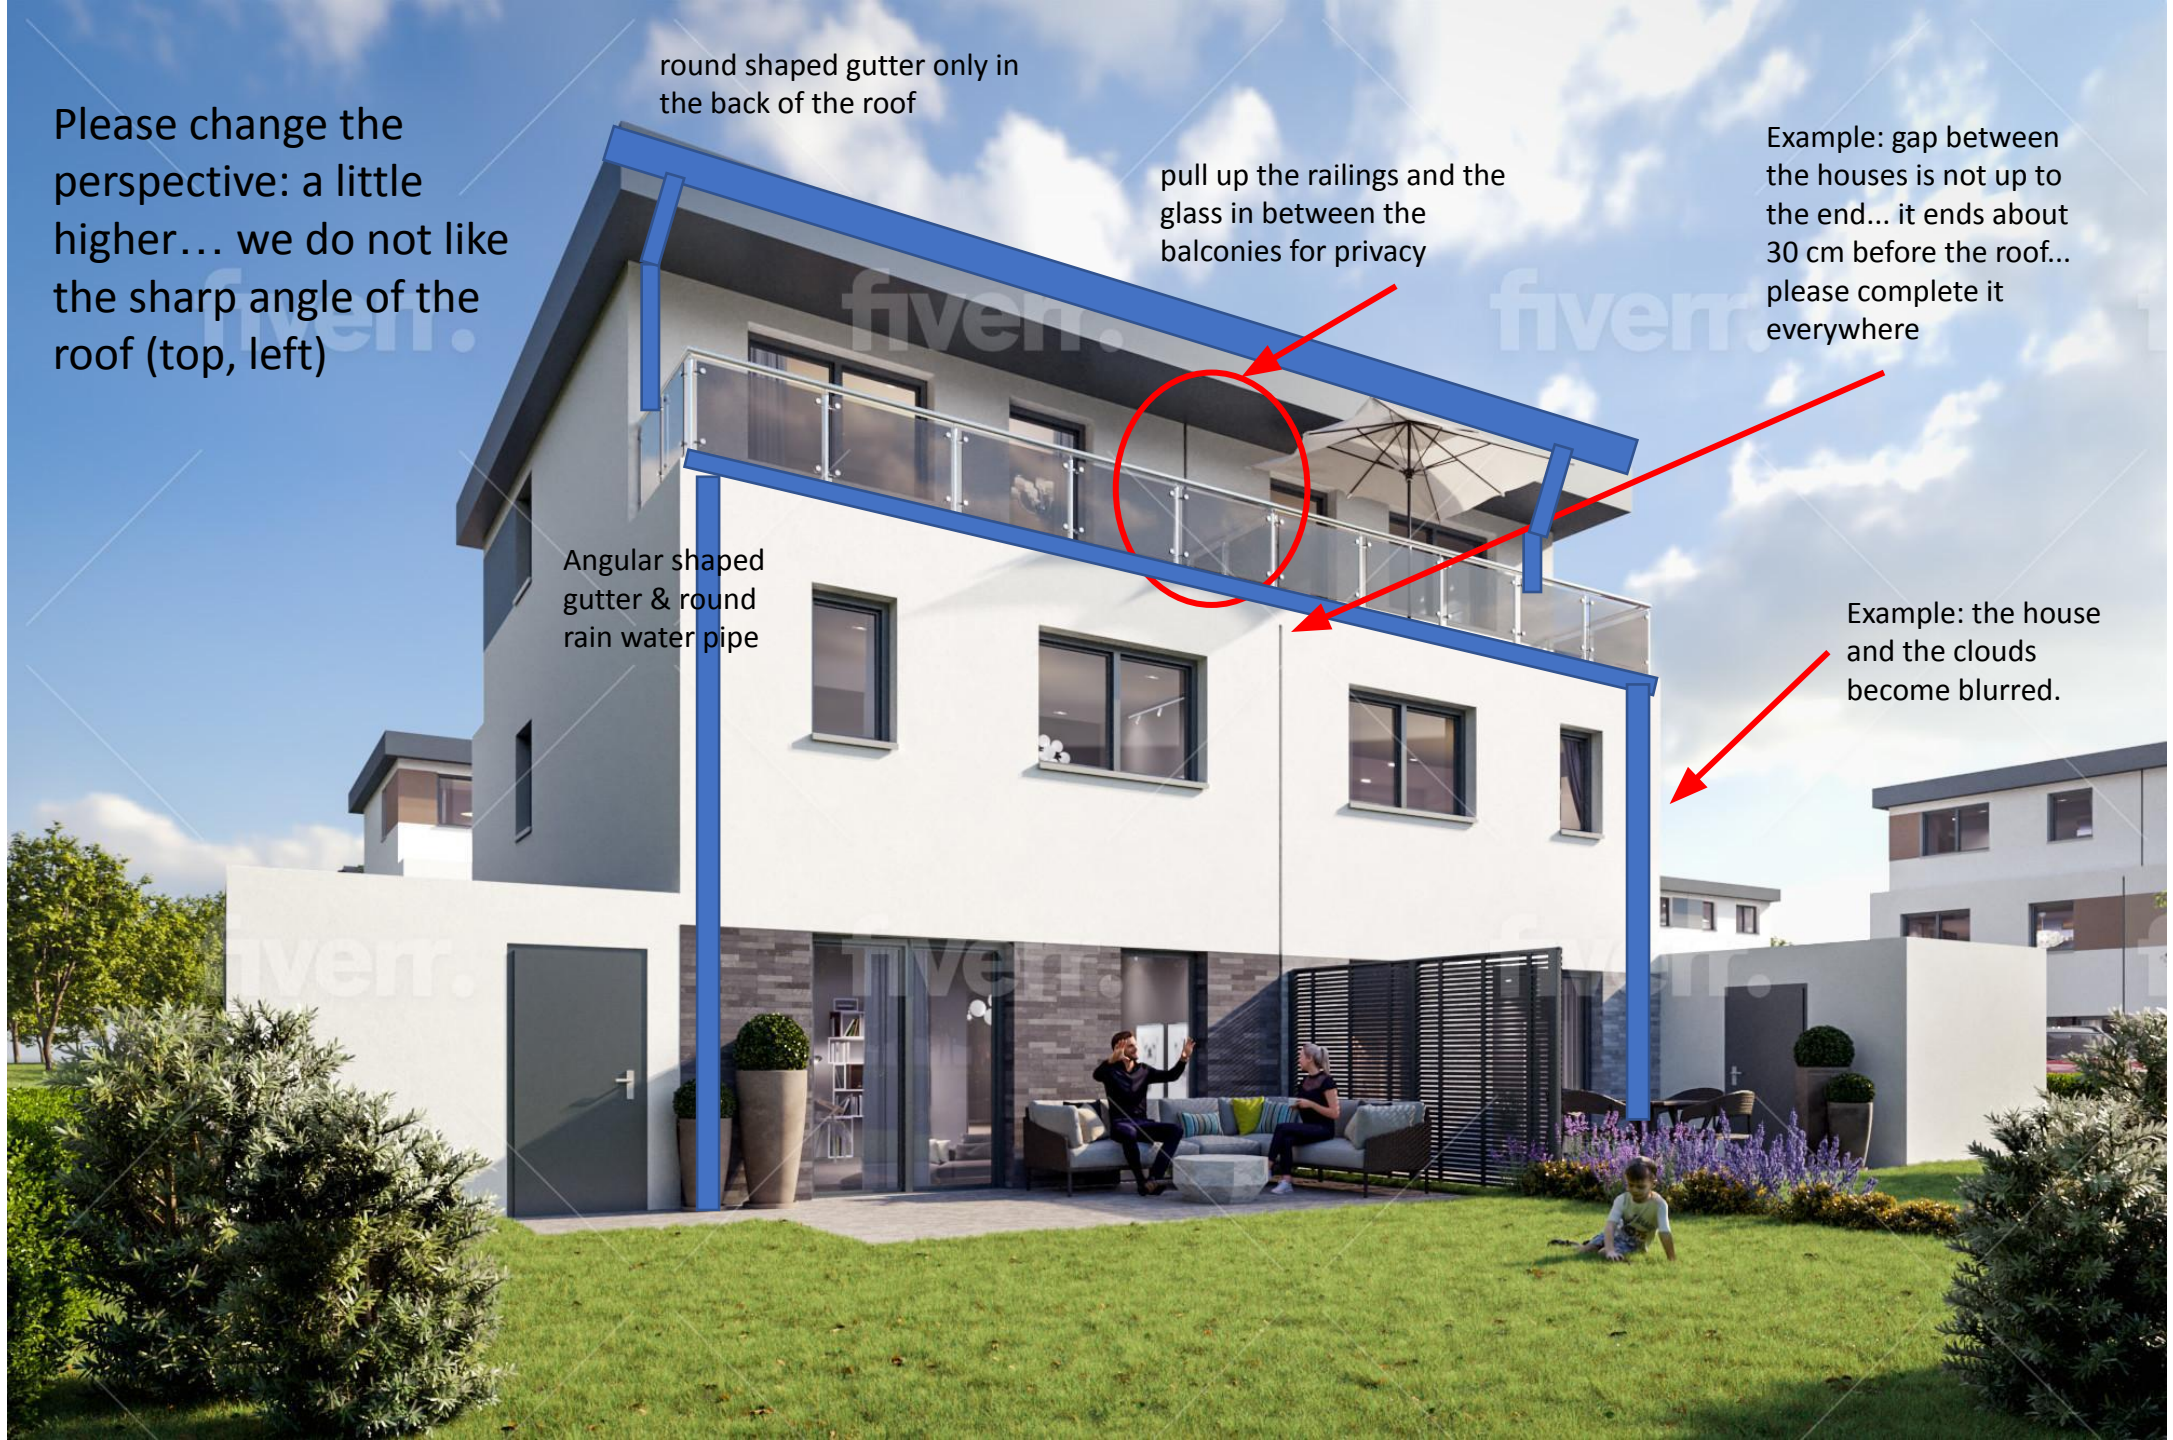

round shaped gutter only in the back of the roof

pull up the railings and the glass in between the balconies for privacy

Example: gap between the houses is not up to the end... it ends about 30 cm before the roof... please complete it everywhere

Angular shaped gutter & round rain water pipe

Example: the house and the clouds become blurred.

Put some big trees (blue circles) on the border of the property, so it looks not so empty.. Like here:

the bound in front of the single-family houses must be anthracite grey, like you did already with the multi-family houses.

So empty, please park a car or some people...

Street ends here...

Hedge must be on the private ground, so more to the right side.

Strange line on the edge

A small linden tree here

No curbstone please. This is to wide and to high... we will have a 8 cm wide border stone but same height as plaster

No border here in front of parking slots

Please change the perspective: a little higher... we do not like the sharp angle of the roof (top, left)

round shaped gutter & round rain water pipe

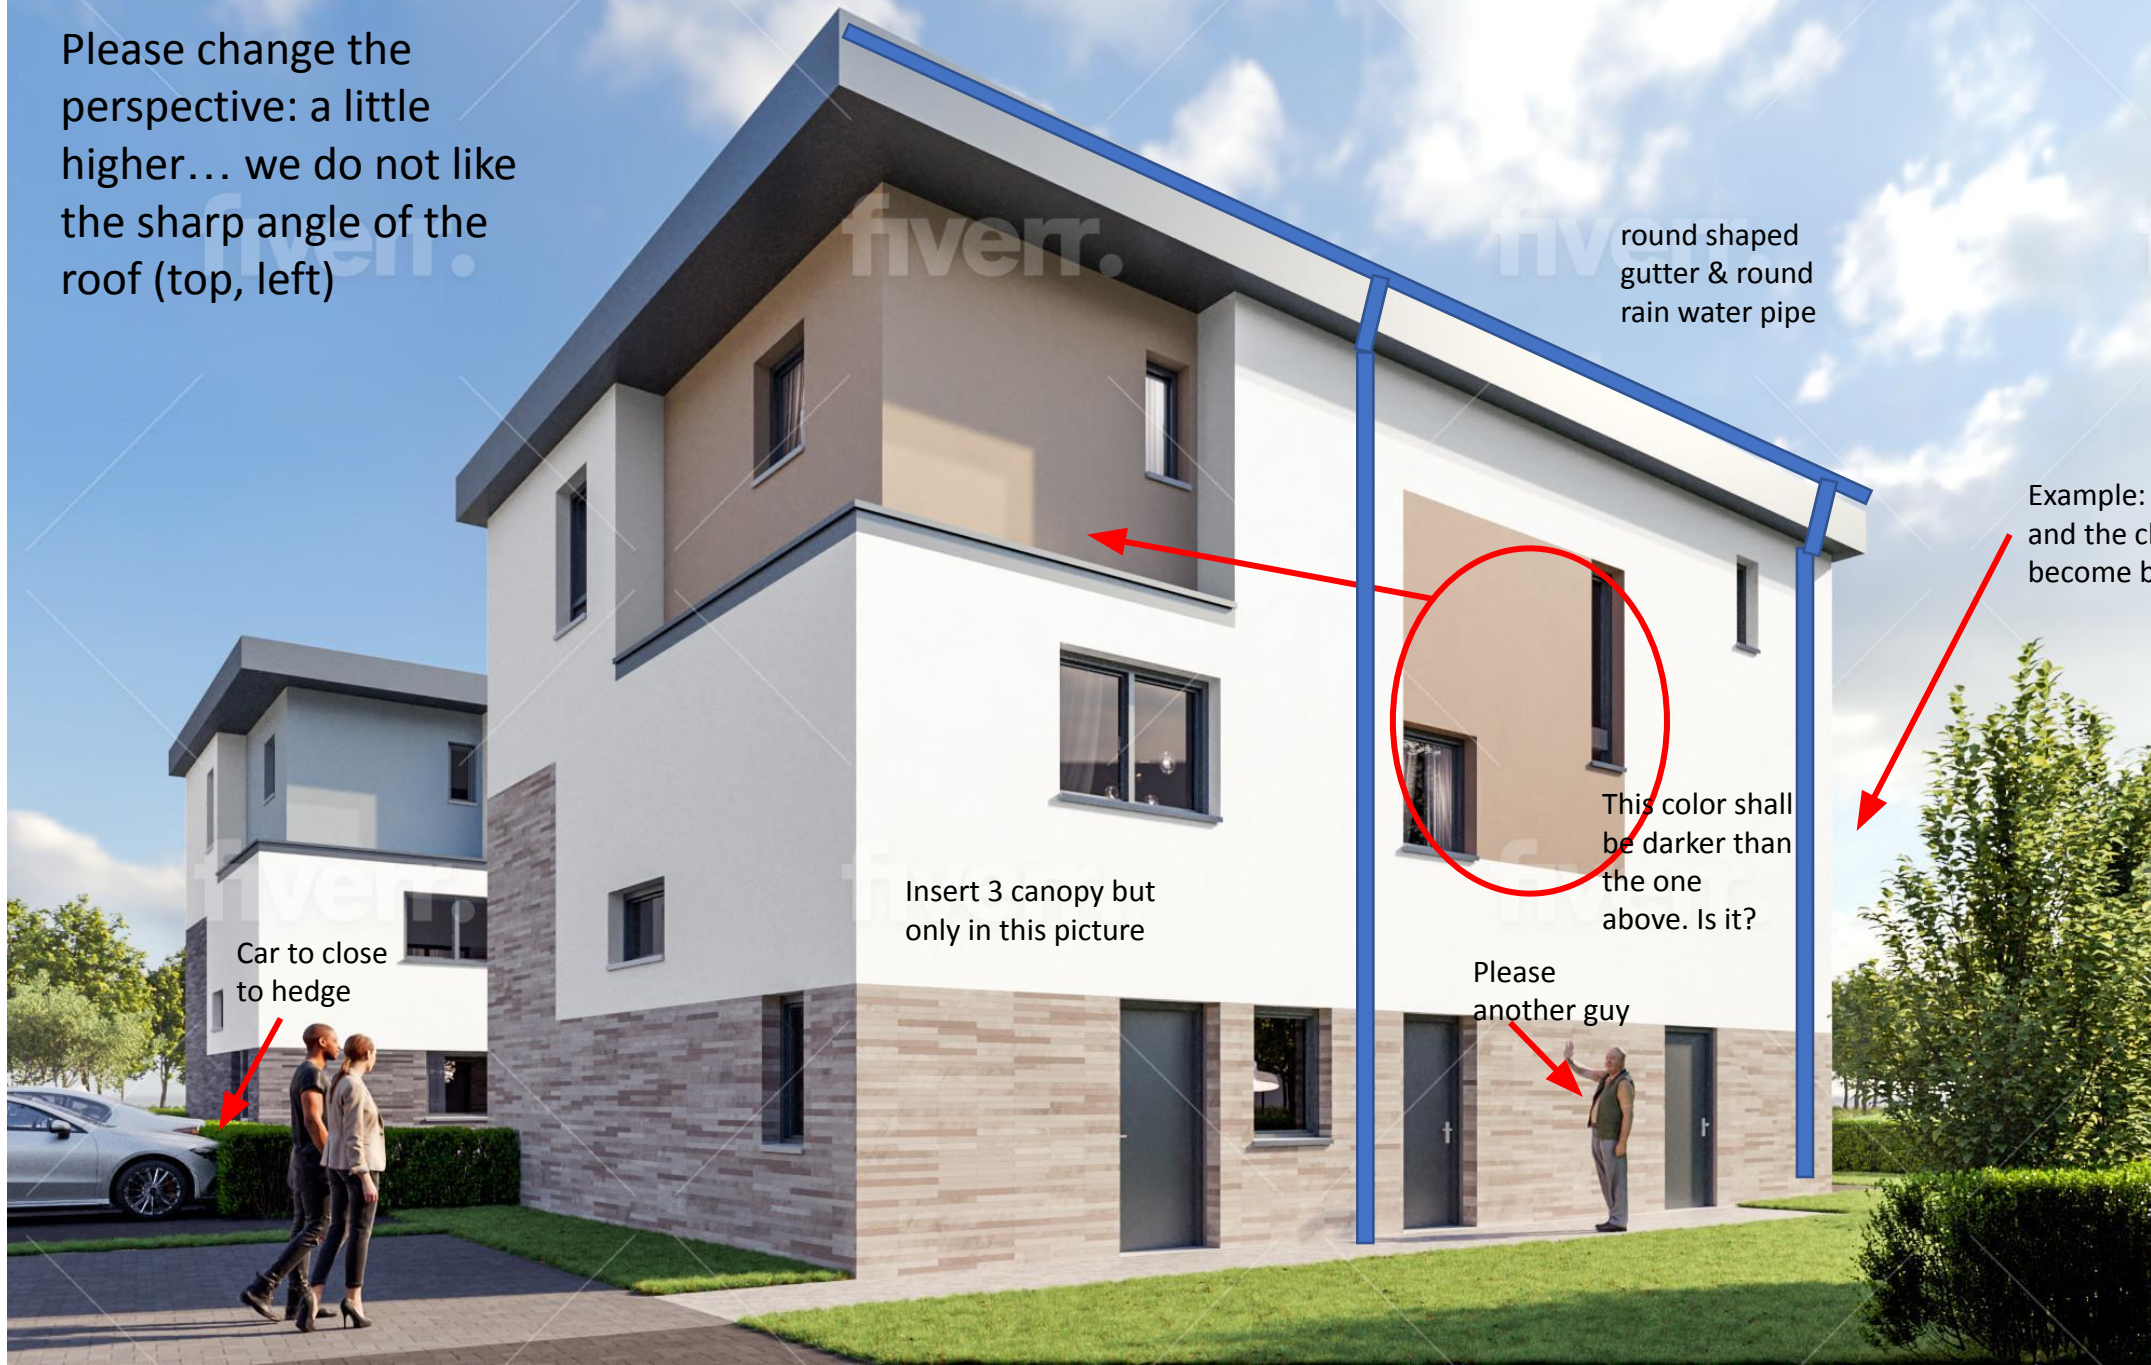

Example: the house and the clouds become blurred

This color shall be darker than the one above. Is it?

Insert 3 canopy but only in this picture

Please another guy

Car to close to hedge

Please change the perspective: a little higher... we do not like the sharp angle of the roof (top, left)

pull up the railings and the glass in between the balconies for privacy

inside face of a window frame must also have the clinker

Angular shaped gutter & round rain water pipe

Instead of privacy screen: concrete wall 20 cm width with bricks (5 cm attic in anthracit). height: same as windows

Please change the perspective: a little higher... we do not like the sharp angle of the roof (top, left)

round shaped gutter & round rain water pipe

Strange line on the edge

Angular shaped gutter & round rain water pipe

The colors of the brick seem so different, to the colors in the front, adapt the lighting please

inside face of a window
frame must also have the
color

The shade is so
strong...it looks like
these are different
colors.

This arrangement of
colors is wrong, the
blue color begins here.

Angular shaped
gutter & round
rain water pipe

put the bicycle on the
public street

Please but here a
car...and move the
lady and her pet to the
right...

No curbstone please. This is
to wide and to high... we will
have a 8 cm wide border
stone but same height as
plaster
