

All Best Universal Absolutely Always

- All the Best to All and
Anyone in any options
Anywhere Anyway Always

New World Economic System
With unlimited personal bank
account and general budget.
Best for The World in this time.

With unlimited money, the acceleration of
automation will begin and the transition to
the absence of money circulation due to
unlimited money for everyone. The transition
to the best standard of living for all at once
will take place.

Automatization

There are already many technologies for the transition to performing almost all the work with technology.

Unlimt will make the transition to new automatical systems really possible. Free up time for any other activity. The standard of living and happiness will rise. By improving the quality of products produced by equipment independently. The best of the best products will be produced

Level will be up in science and technologies.

Abundance

Implementation of the Unlimited Economic System will contribute to abundance and prosperity in all spheres.

The fastest transition to the best level.

Perfect

Moving to the best in all options for everyone and everything will lead to a better and happier life.

Benefits for the environment

Manufacturing the finest items with superior quality and durability will move the overall level of life for the better and with less waste.

Also likely that more attention will be given to caring for the environment, and for this there will be all possible resources.

Care for everyone

A vibrant rainbow arches across a bright blue sky filled with soft, white clouds. The rainbow's colors are vivid, transitioning from red on the left to violet on the right. The overall scene is bright and optimistic.

Taking care of everyone.

Protection of the rights and freedoms of everyone (Which can be in the Universe, the World).

Further, there will be a full transition to vegetarianism. (based on the rights and freedoms of everyone (all)).

Planet Earth now has human rights laws and animal rights laws in some countries.

With Unlimited Economy, it will become possible to implement a project with the construction of houses and feeders with a vegetarian type of food for all types of animals in their habitats or at a distance from human settlements. For their independent and prosperous life.

People can easily take care of themselves with unlimited economy and automation.

Perfecting of consciousness

Improved consciousness make it possible to move to the best living with perfect technologies. Will make life peaceful, happy and safe.

Super technology: electricity

A new way of working with the grid: teleporting electricity to receivers on equipment.

Benefits: Works wirelessly at any distance.

Electricity generators: magnetic, quantum and others, together with the transmission of electricity, teleportation will work even better.

Generators are better than other modern sources due to independence from wind and sun, safety (with a correctly tuned magnet that fits into the main field of the Planet, etc.), greater power and environmental friendliness.

Generation of electricity. Even better than generators. Devices can be create for everyone with teleportation transmission or individual at home and in each device.

Complete creation: without using the resource (the entire resource is created).

Creation. The device can be versatile and used to create anything.

Another way to transfer electricity wirelessly: like qee - wireless charging or wi-fi. For safe transmission in the room (the entire space will be filled), setting the power transmission to a safe clock frequency close to the natural for the Planet and man, with a difference of several units for the absence of "vampirism" from the receiver, or exactly the same, can help.

Also, for security purposes, the mechanism can have a filter: All the best Universally Absolutely Always and allow only such actions. With protection against substitution and reprogramming.

Unification into the World

Commonwealth

Peace and Harmony

Beautiful World

Happy life

Perfect times
