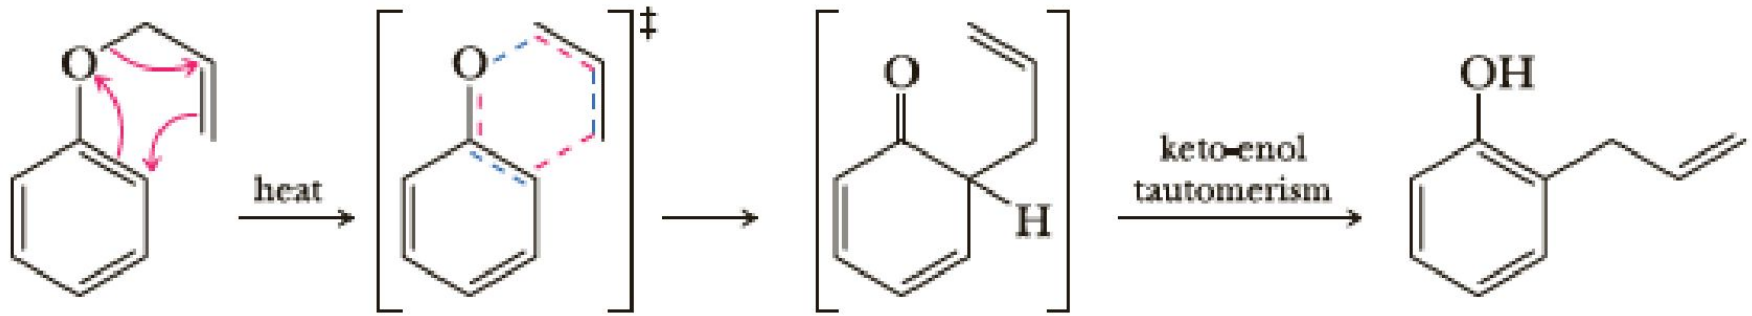
The Claisen rearrangement

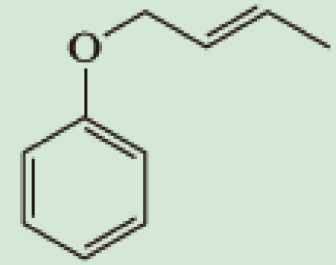


Allyl phenyl ether

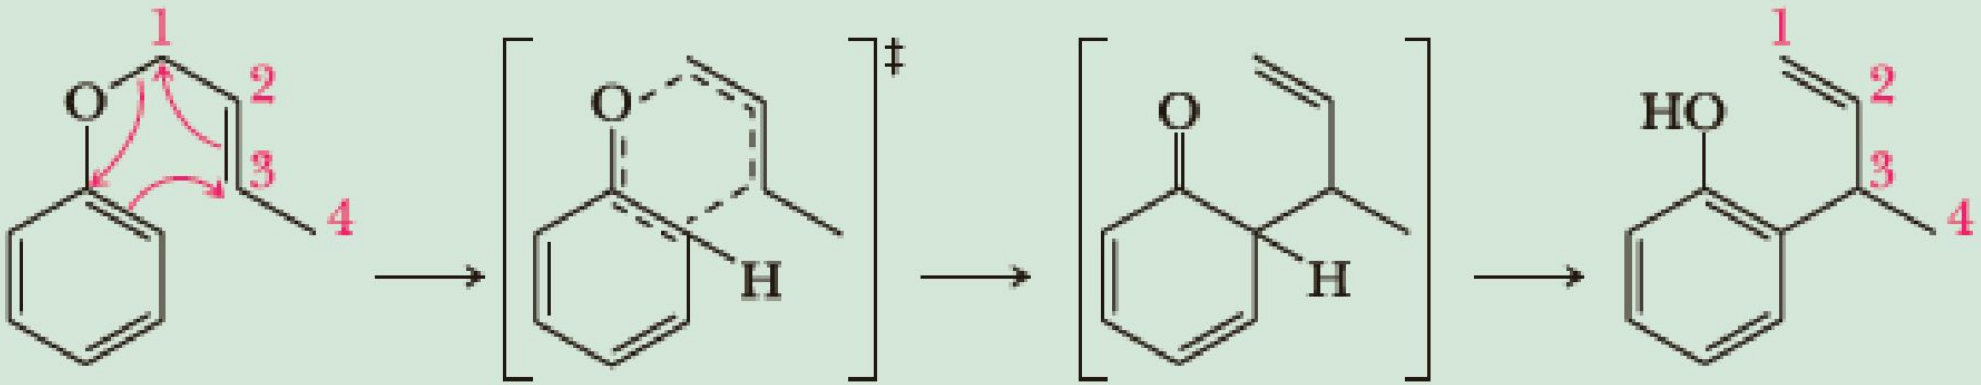
Transition state

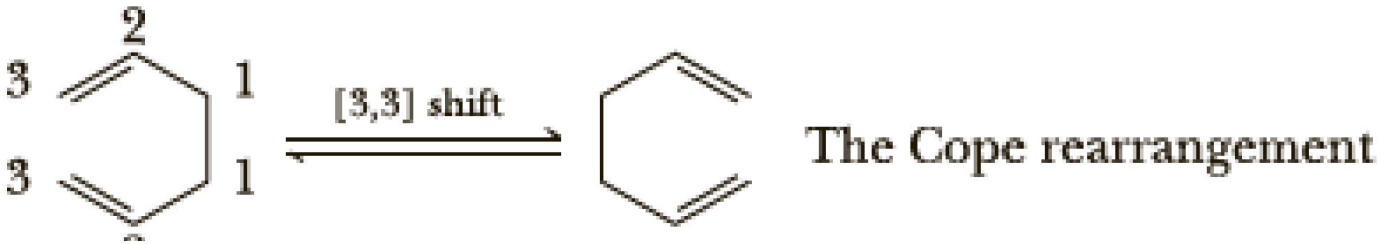
A cyclohexadienone intermediate

2-Allylphenol

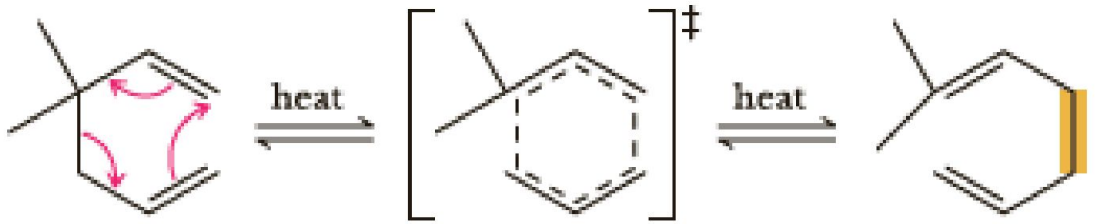


trans-2-Butenyl phenyl ether

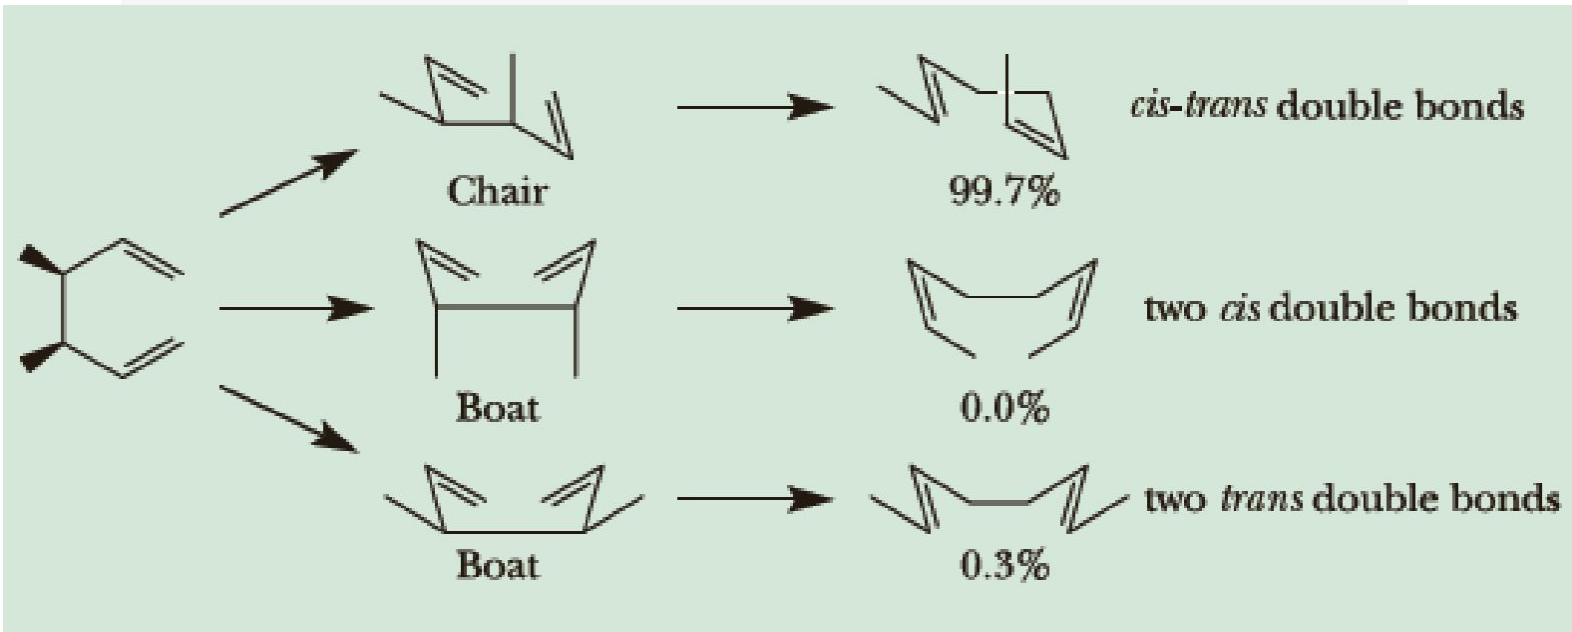


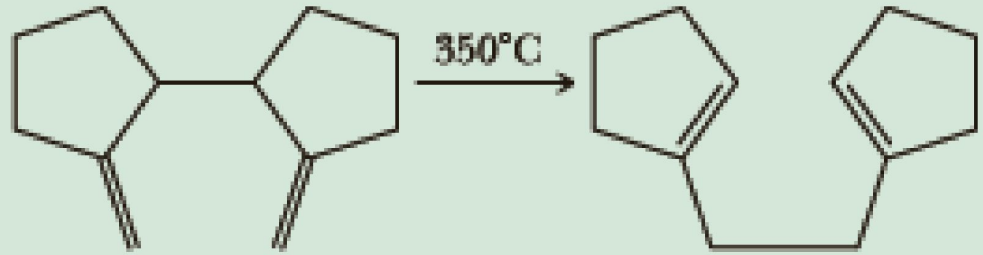


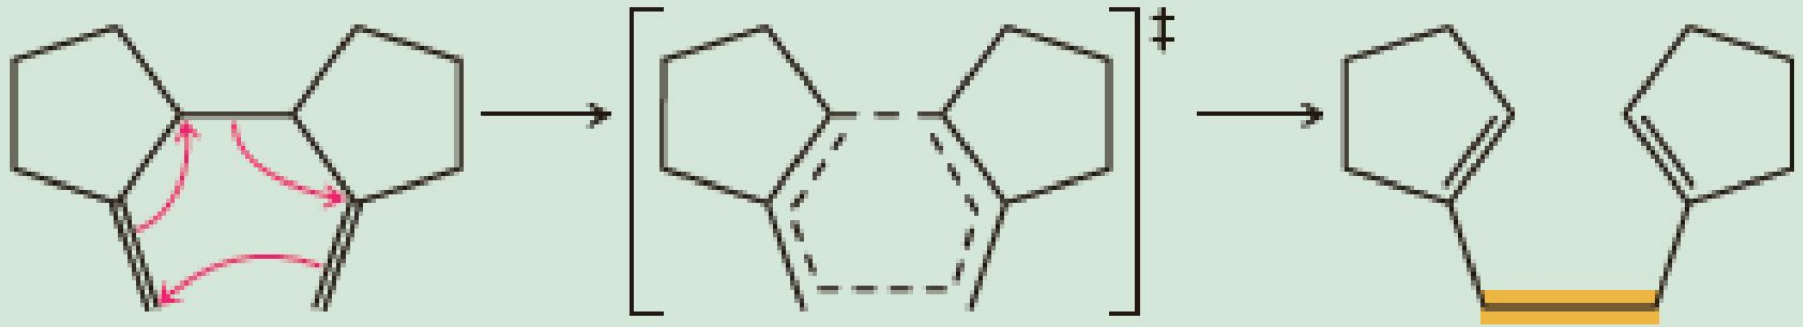
The Cope rearrangement



3,3-Dimethyl-1,5-hexadiene | **Transition state** | **6-Methyl-1,5-heptadiene**



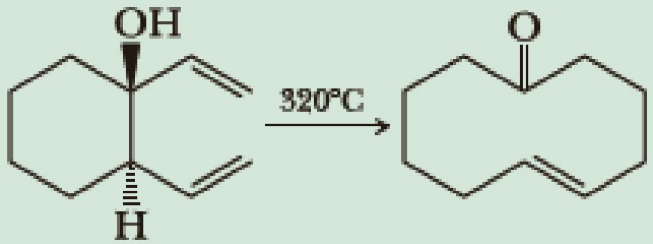




Transition state

Problem 20.11

Propose a mechanism for the following Cope rearrangement.



20.16 Predict the structure of the major product formed by 1,2-addition of HCl to 2-methyl-1,3-butadiene (isoprene).

20.17 Predict the major product formed by 1,4-addition of HCl to isoprene.

20.18 Predict the structure of the major 1,2-addition product formed by reaction of one mole of Br_2 with isoprene. Also predict the structure of the major 1,4-addition product formed under these conditions.

20.30 Draw structural formulas for the products of reaction of cyclopentadiene with each dienophile.

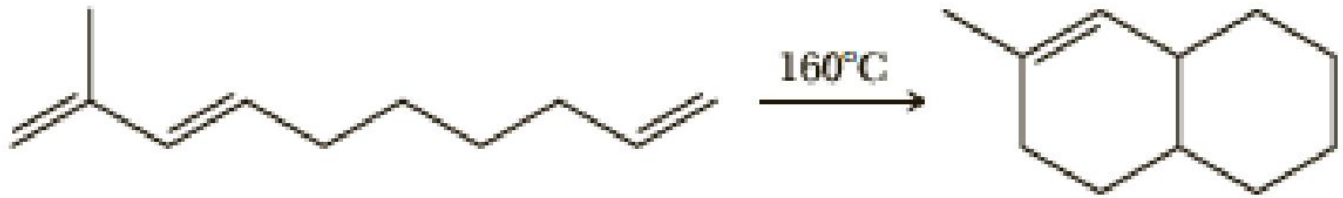
(a) $CH_2{=}CHCl$ (b) $CH_2{=}CHCOCH_3$ (c) $HC{\equiv}CH$ (d) $CH_3OCC{\equiv}CCOCH_3$

20.31 Propose structural formulas for compounds A and B and specify the configuration of compound B.

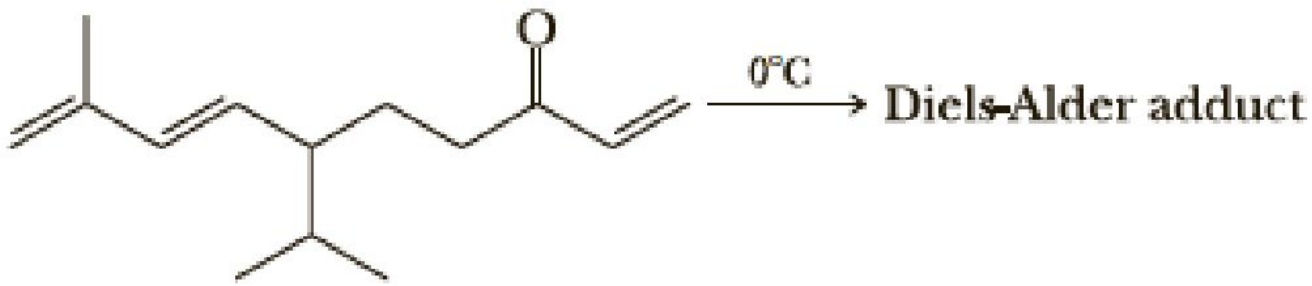
$$+\ CH_2{=}CH_2 \xrightarrow{200^\circ C} C_7H_{10} \xrightarrow[2.\ (CH_3)_2S]{1.\ O_3} C_7H_{10}O_2$$

(A) (B)

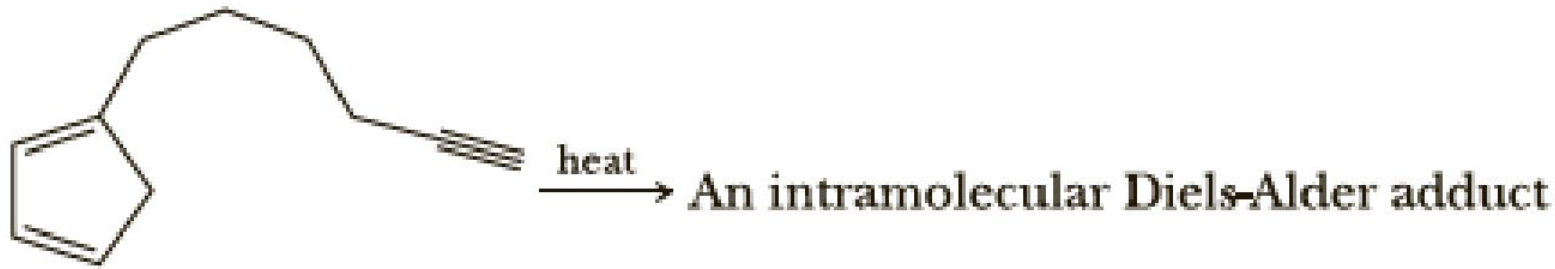
20.34 The following triene undergoes an intramolecular Diels-Alder reaction to give the product shown. Show how the carbon skeleton of the triene must be coiled to give this product and show by curved arrows the redistribution of electron pairs that takes place to give the product.



20.35 The following triene undergoes an intramolecular Diels-Alder reaction to give a bicyclic product. Propose a structural formula for the product. Account for the observation that the Diels-Alder reaction given in this problem takes place under milder conditions (at lower temperature) than the analogous Diels-Alder reaction shown in Problem 20.34.



20.36 The following compound undergoes an intramolecular Diels-Alder reaction to give a tricyclic product. Propose a structural formula for the product.



20.37 Draw a structural formula for the product of this Diels-Alder reaction, including the stereochemistry of the product.
