

THE SELF-PRESENTATION

Childhood.

I loved to assemble Lego constructors, ride a scooter, bike, liked to do something with my own hands. I wanted to become a programmer from the age of five.

Study.

In primary school I studied at "4", but in high school I was an excellent student almost all the time. I have been preparing for exams for several years and still passed with a good score.

Vacation.

I rest, of course, at the computer. I listen to music, play computer games, watch movies and TV series. When everything gets boring, I just go to bed.

Minecraft

Oh,
yeah!!!

I like Minecraft.

—

Why did I enter KuzSTU?

Reasons:

- Lots of budget places
- Well fed
- Lots of freebies
- Not too far from home

Thank you for your attention
