

The background is a deep blue gradient with a subtle pattern of white dots, resembling a starry sky. Overlaid on this are several faint, white geometric elements: concentric circles of varying sizes, some with dashed outlines, and circular arcs with degree markings. The markings include numbers such as 140, 150, 160, 170, 180, 190, 200, 210, 220, 230, 240, 250, and 260, arranged in a circular fashion. Some of these arcs also feature small arrowheads pointing in different directions.

Explore a new
planet

- The name of our team - the Dream.
- We have found a new planet. It is unusual for her growing crystal. I after we called her "Crystal Planet". From the height, it looks very original, shimmering rainbow colors. The soil is not it is not the same as on Earth. The soil is like fine crystal. She herself was rather big, but not the size of Earth. Where nothing grows but crystals. In general, it is not like our planet Earth. All her unusual, exotic.

GOALS:

- 1) To find out whether there are conditions for living beings;
- 2) Learn the difference between this planet from the Earth.

- We found that on this planet there is no condition for living beings, because there is no water. A life without water is impossible. The planet is characterized in that the crystals grow on it.
