So You Think It's

**BUT HAVE YOU STOPPED
TO THINK WHAT IT CAN
DO TO YOUR BODY?**

STOMACH

Too much beer can lead to your putting on weight. In addition, heavy drinking can cause stomach ulcers¹.

HEART

Although moderate drinking can protect against heart disease; too much alcohol is connected with high blood pressure, irregular heartbeat and the risk of strokes and heart disease.

MOUTH

Heavy drinking can cause oral cancer. It also makes your breath smell. Who wants to kiss a drunk?

BRAIN

Alcohol slows down brain activity, which makes you feel more relaxed, but which also down your reactions. Consequently, drunk people are more likely to be victims of violent crime, house fires and car crashes.

Cool to Get Drunk?

OTHER PSYCHOLOGICAL EFFECTS

In the long term, heavy drinkers may risk depression and even suicide. In addition, by removing inhibitions¹, too much drink can lead to you making a fool of yourself. In extreme cases of alcohol abuse, drinkers may suffer from hallucinations and even brain disease.

OTHER PEOPLE

But it's not just your body that's at risk. If you drink heavily, it can affect those around you and disrupt² or even destroy your relationships with family and friends.

**SO IF YOU ARE GOING TO HAVE
A DRINK, JUST TAKE IT EASY!**
