Can we please have a less intensive animation for mouseover, for both right hand images?

Desired solution: Only zoom in once, like the animation for the three teaser boxes on the start page.

Etiam ultricies nisi vel augue.

Curabitur ullamcorper Etiam.

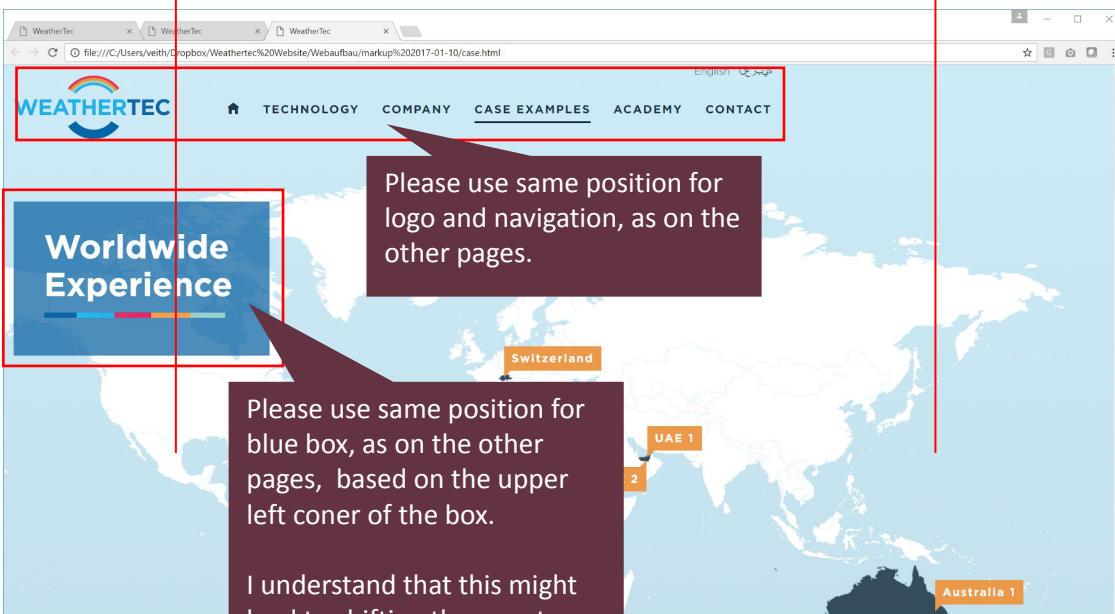

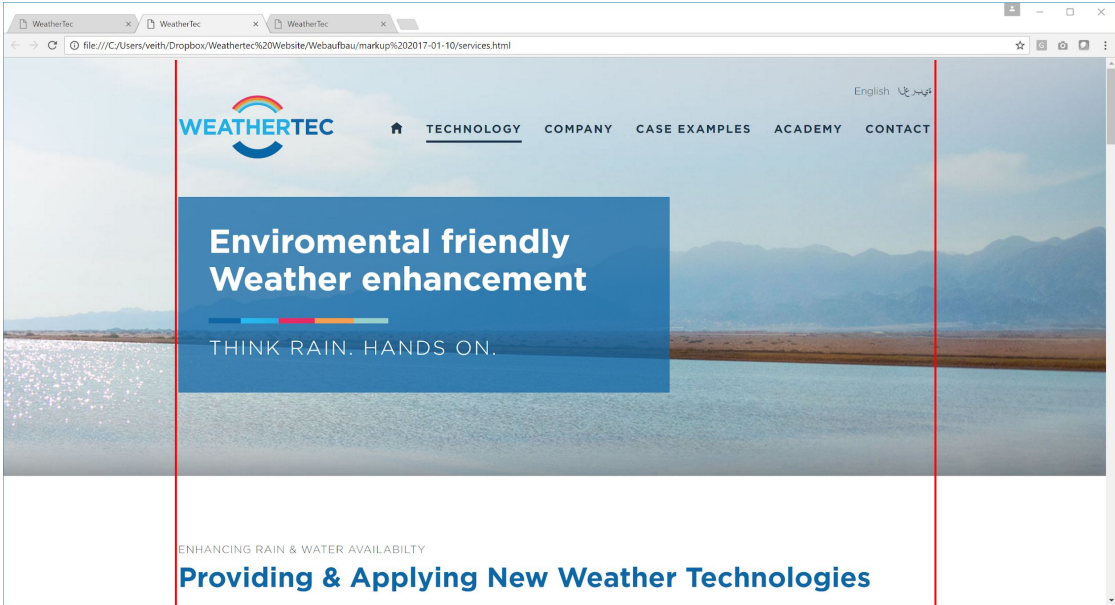

For breakpoints, where the table is not entirely shown:

- Could you please remove the auto-rotating?
- Please add arrows for manual rotating, left and right to the image
- Please keep the wipe rotating

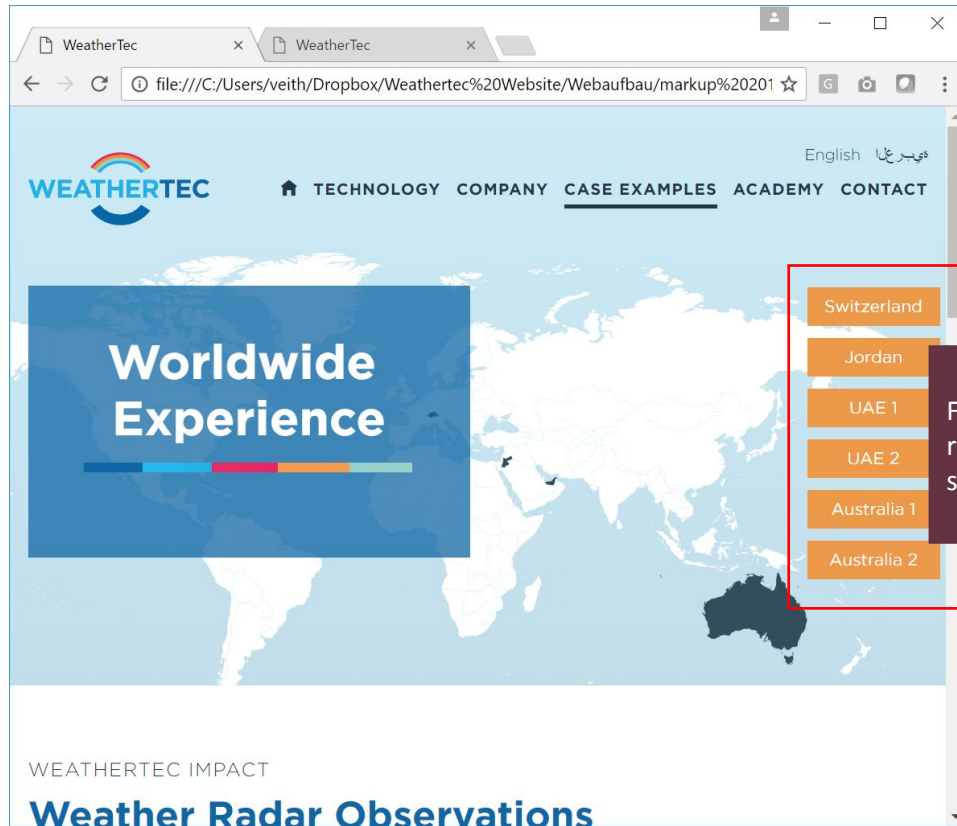

Desired solution

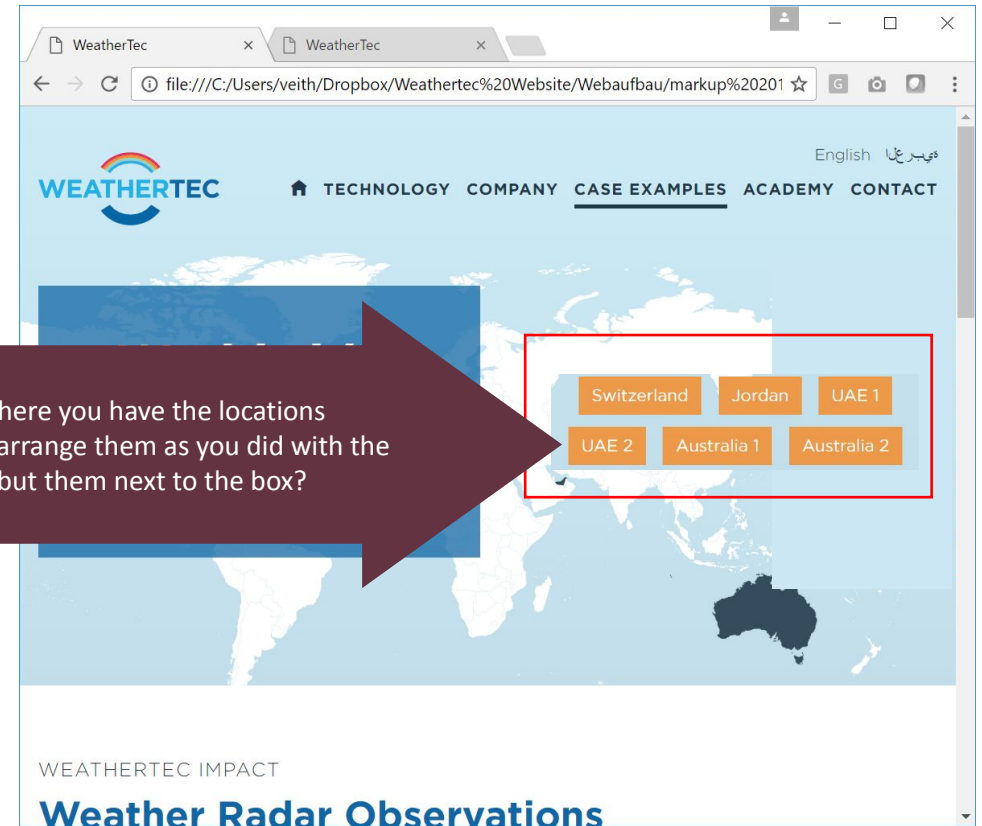

# Page Case Examples

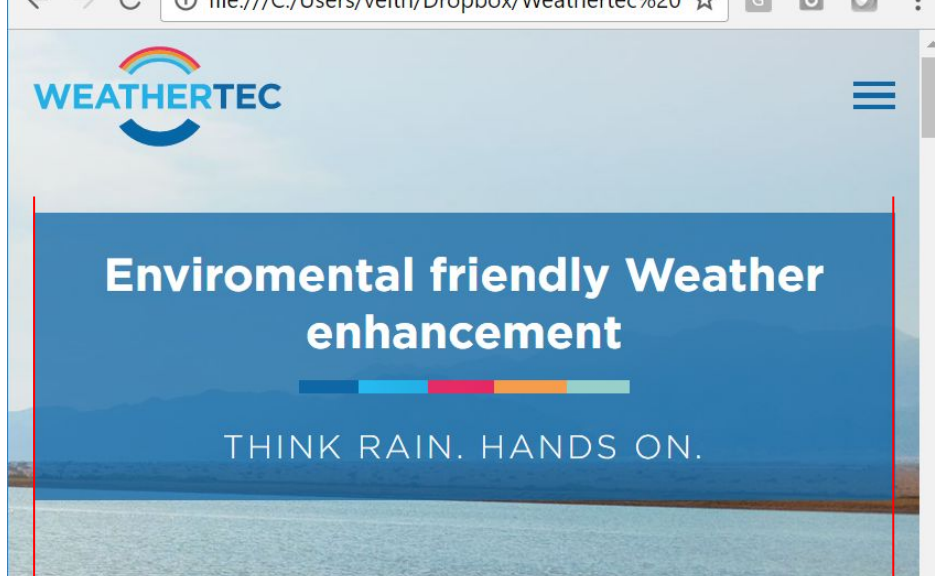

For those Breakpoints where you have the locations right-aligned, could you arrange them as you did with the smaller resolutions, but but them next to the box?

For those Breakpoints where you have the blue box full with on other pages: Could you please use the full width for the blue box here as well?

Could you shift down the map and shift up the buttons, so that the buttons are somewhere in the middle of the map, and the map is underneath the blue box?
