Can we please have a less intensive animation for mouseover, for both right hand images?

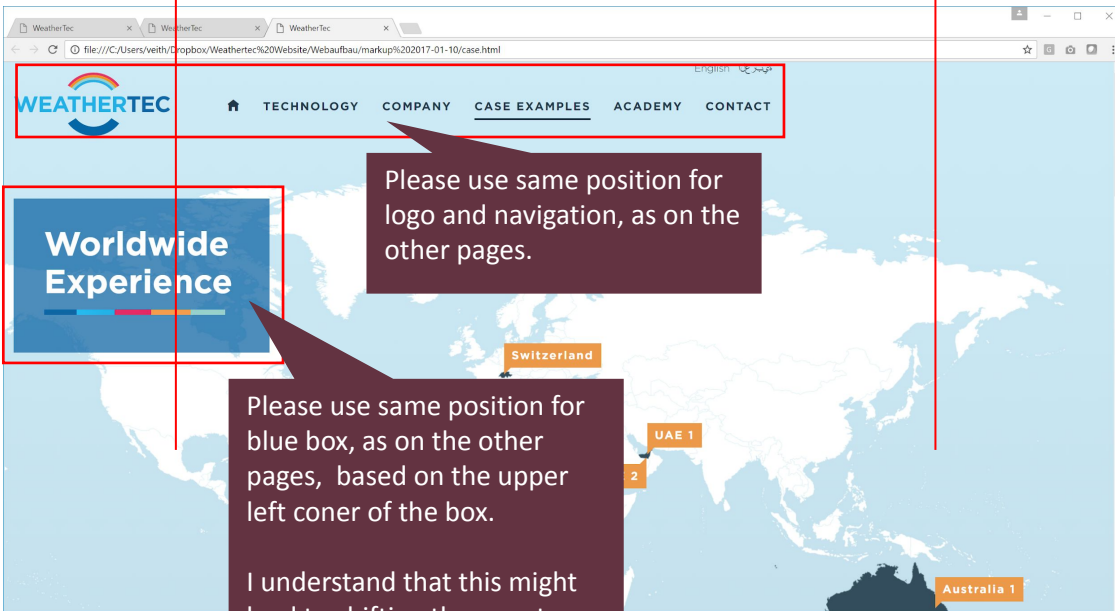

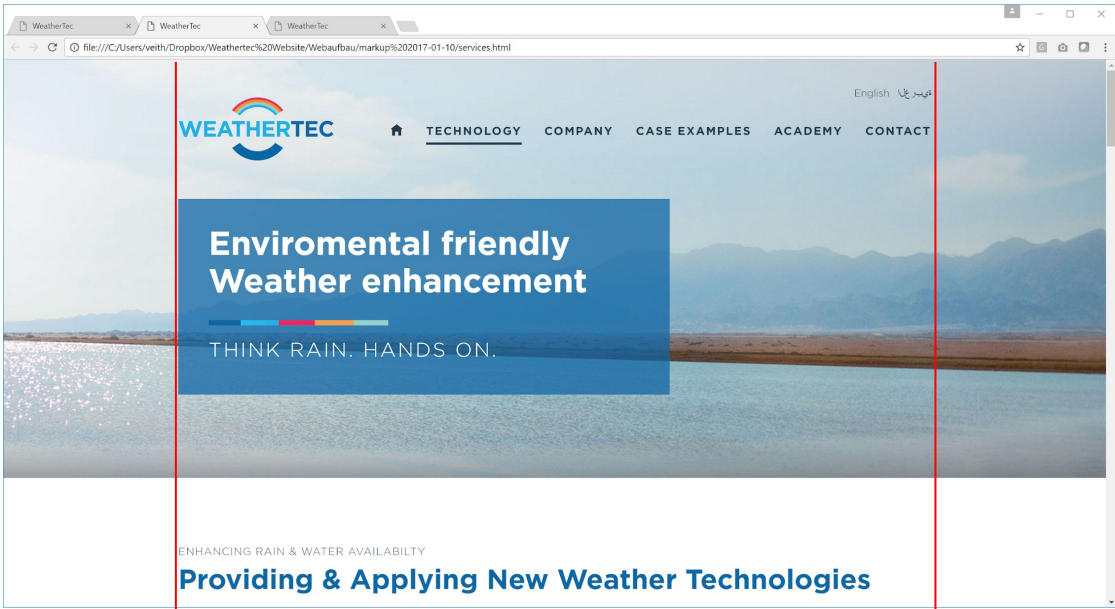

Desired solution: Only zoom in once, like the animaton for the three teaser boxes on the start page.

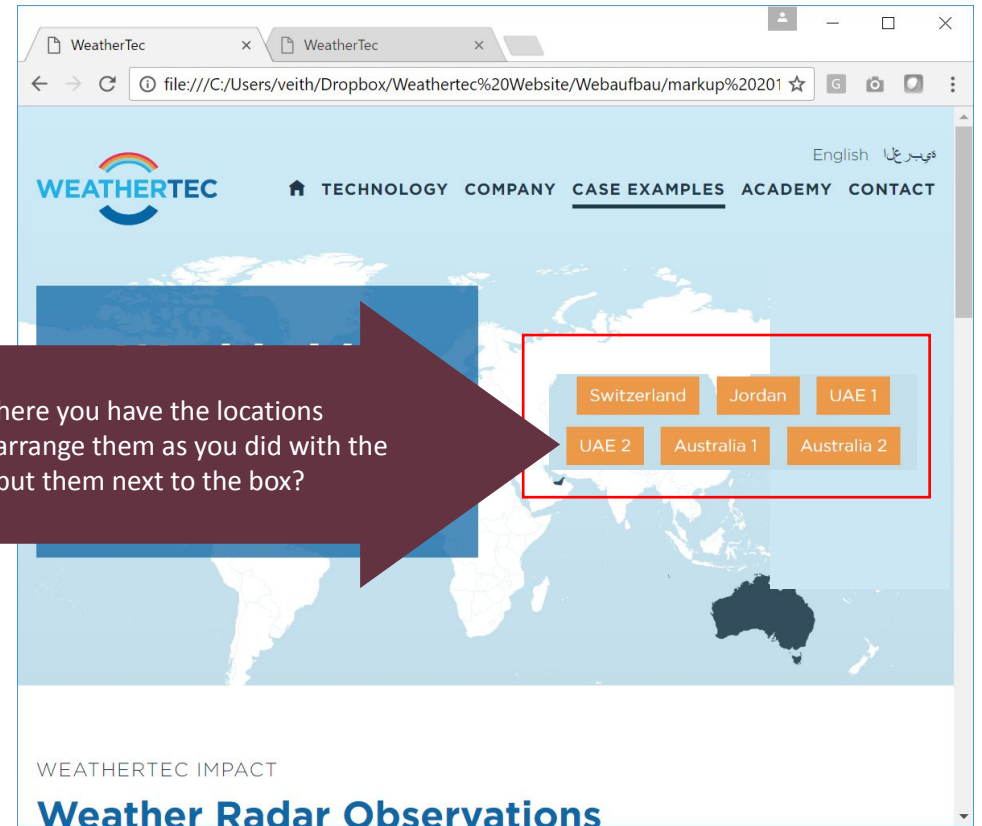

- For breakpoints, where the table is not entirely shown:
- Could you please remove the auto-rotating?
 - Please add arrows for manual rotating, left and right to the image
 - Please keep the wipe rotating

Page Case Examples

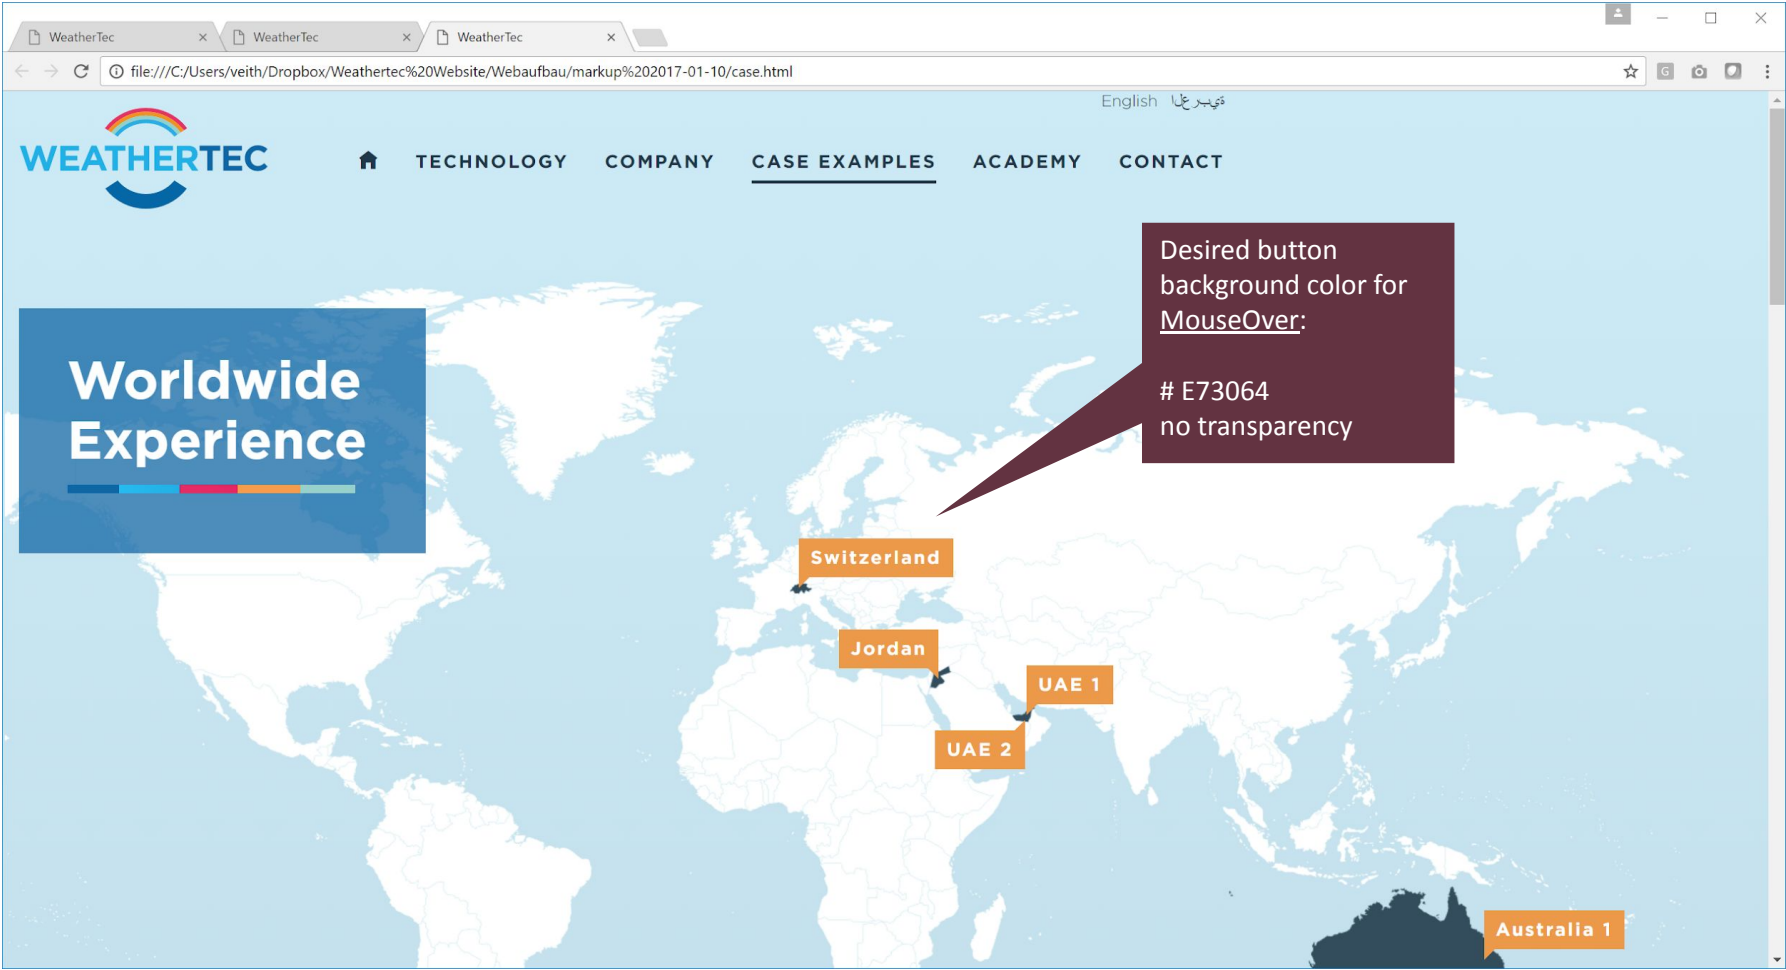

For those Breakpoints where you have the locations right-aligned, could you arrange them as you did with the smaller resolutions, but but them next to the box?
