

A panoramic view of a Swiss lake, likely Lake Lucerne, surrounded by lush green hills and majestic mountains. The water is a vibrant turquoise color, reflecting the clear blue sky. In the foreground, there are rolling green hills with scattered trees and a few small buildings. In the middle ground, a small town or village is nestled on the shore of the lake. The background features towering mountains with patches of snow and rocky peaks under a bright, clear sky.

# The weather in Switzerland

# Winter

In winter strong warm wind blows. The temperature can be from -4 to -6 degrees. There are a lot of sunny days.

# Spring

In spring it is +20 degrees in the south of the country. Flowers are blooming all around, but snowstorms are possible in the north. It often rains, but it ends quickly.

# Summer

In summer, temperature can reach +30 degrees on sunny days, but not higher. Summers are rainy with variable weather.

# Autumn

In autumn, the temperature drops to +7 degrees. The sky gets cloudy. At night the temperature can drop to 0 degrees or lower.

# The Alps

The Alps have a temperature climate. The south of the mountains has a subtropical climate.

That is all I wanted to tell you about the weather in Switzerland. Thank you for your attention.
