**WASHERS**

**WASHERS**

**Flat**

A flat washer, used to distribute load. Available in SAE, USS and other patterns.

**Fender**

An oversize flat washer used to further distribute load especially on soft materials.

**Finishing**

A washer used to obtain a finished look. Usually used with oval head screws.

**Split Lock**

The most common style of washer used to prevent nuts and bolts from backing out.

**External Tooth Lock**

A washer with external teeth. Used to prevent nuts and bolts from backing out.

**Internal Tooth Lock**

A washer with internal teeth. Used to prevent nuts and bolts from backing out.

**Square**

A square shaped washer.

**Dock**

Dock washers have a larger outside diameter and are thicker than standard.

**Open**

Thick, large diameter, cast iron washers with a flared or sculpted appearance. Typically used in dock and wood construction.
