Model types

 <p>Organizational chart Represents organizational structures. Enables you to illustrate the relationships between organizational units, roles, and persons.</p>	 <p>Process landscape Gives an overview of the value-added processes in a company. Also serves to represent hierarchies.</p>	 <p>Business process Describes a process as a sequence of events and activities (EPC, Event-driven process chain). IT systems, organizational elements or data may be added.</p>
 <p>Data model Illustrates data structures by means of data units (entities), including their relationships and properties.</p>	 <p>IT infrastructure Shows the IT infrastructure of your organization. Enables you to represent networks, including hardware and IT systems.</p>	 <p>System landscape Shows the IT systems your organization uses and the areas (application domains) into which they can be divided.</p>
 <p>BPMN diagram Enables modeling of processes according to the Business Process Modeling Notation (BPMN 2.0) – also across organizations.</p>	 <p>Whiteboard Is used to gather and structure ideas and tasks. Is similar to post-it notes used with flip charts.</p>	 <p>General diagram Provides a selection of graphic elements to which you can assign any required meaning. Here, you can represent content that is not covered by other models.</p>
