The screenshot shows the ARIS Community website interface. At the top, there is a search bar with the text 'ist-tutor@visu.ru' and buttons for 'forgotten?' and 'Log in | Register'. Below the search bar is a navigation menu with links: Home, ARIS Cloud, Forums, Tutorials, Universities, Help, and Blog. A 'We ♥ BPM' tag is attached to the right side of the navigation menu.

The main content area is titled 'Download ARIS Express'. It contains the following text:

ARIS Express is officially released for Microsoft Windows based operating systems such as Windows 7 and Windows Vista. ARIS Express is known to run on other operating systems such as Mac OS X or Linux, too. Select below the download method for your operating system.

**Please log in to ARIS Community and accept the License Agreement and the Export Regulation of Software AG to be able to download ARIS Express.**

Please read the [installation instructions](#), no matter which download you select. If you are unsure whether ARIS Express will run on your system, review the [system requirements](#). If you run into any trouble during download or installation, please read the [frequently asked questions \(FAQ\)](#), because your problem is probably already covered there.

The current version is ARIS Express 2.4b.

The sidebar on the left contains a 'NAVIGATION' section with the following links:

Bring your ARIS models in the cloud  
Get Your free **Process Live Trial**  
ARIS-as-a-Service

**Model types**

- Organizational chart**  
Represents organizational structures. Enables you to illustrate the relationships between organizational units, roles, and persons.
- Process landscape**  
Gives an overview of the value-added processes in a company. Also serves to represent hierarchies.
- Business process**  
Describes a process as a sequence of events and activities (EPC, Event-driven process chain). IT systems, organizational elements or data may be added.
- Data model**  
Illustrates data structures by means of data units (entities), including their relationships and properties.
- IT infrastructure**  
Shows the IT infrastructure of your organization. Enables you to represent networks, including hardware and IT systems.
- System landscape**  
Shows the IT systems your organization uses and the areas (application domains) into which they can be divided.
- BPMN diagram**  
Enables modeling of processes according to the Business Process Modeling Notation (BPMN 2.0) – also across organizations.
- Whiteboard**  
Is used to gather and structure ideas and tasks. Is similar to post-it notes used with flip charts.
- General diagram**  
Provides a selection of graphic elements to which you can assign any required meaning. Here, you can represent content that is not covered by other models.
