

Military Application Solutions

Military Approved and Listed Products

Passive Countermeasure Systems (PCMS)

Navy Approved Neoprene Tile Cleaner

Removes salt deposits, grease and scuff marks as well as all general shipboard dirt from PCMS tiles.

High Heat Blast Coating

Clear coating that resists temperatures up to 1,500F

Applied to windows and surfaces near launch areas to protect and prevent scorching and marking from exhausts and rocket fuel

Aviation Glass Coating

Prevents cracking and damage to glass structures.

Applied to glass canopies and other aviation glass structures. Designed to absorb shock and prevent cracking under extreme stress.

Advanced Products

Infrared Blocker Coating

Prevents infrared signature readings

Ready For Marketing

Applied to fabrics or metal surfaces. Ideal for masking infrared heat signatures of people or hardware.

Radar Absorbing Coating

Absorbs radar and other energy signals

In Development

Applied to ships or hardware like traditional paint. Designed to absorb radar waves and prevent or obscure signature reading

Anti-Germ Permeant Coating

Continuously disinfects surfaces against pathogens like viruses and bacteria.

Ready For Marketing

Hard semi-clear coating applied to frequently touched surfaces that disinfects continuously over 5 years
