

Topic: Virtual Reality

About me:)

Name: Anastasia

Surname: Zhilina

Age: 16 y.o.

Form: 10

Hobby: take photos

A Virtual Reality system can transport the user to exotic locations such as a beach in Hawaii or the inside of the human body.

To put a large helmet on your head to see the simulated world and you have to wear a special glove on your hand in order to manipulate the objects you see there

Lenses and two miniature display screens inside the helmet create the illusion that the screen surrounds you on every side.

You can «look behind» computer-generated objects, pick them up and examine them, walk around and see things from a different angle.

Surgeons could plan operations by first «travelling» through the brain, heart or lungs without damaging the body.

In schools pupils
could explore the
Great Pyramid or
study molecules
from the inside

Developers of Virtual Reality say its potential is powerful. The word which comes closest to describing Virtual Reality is «simulator».

A close-up photograph of a person's head wearing a white VR headset. The person has brown hair. The headset's lens is visible, showing a reflection of the person's eye. On the left side of the image, there is a semi-transparent blue overlay containing various digital interface elements, including a circular navigation pad, a list of items, and a circled number '5'.

The End
