

Hello, today I will tell you about my future profession – Designer!

The presentation presents

- What is this profession
- Advantages of the profession
- Negative sides
- Positive sides
- What you need for this profession
- Why is this profession so important to me

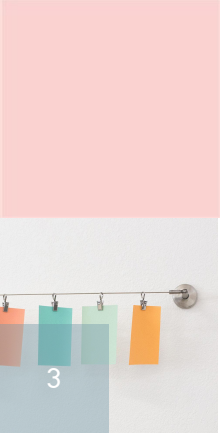

1.

What is this profession?

The profession of designer is one of the most popular in the labor market. And this is quite justified, because the designer is a specialist who makes our daily life comfortable and beautiful

2.

Advantages of the profession

-The designer embodies ideas in various areas: interior, landscape, industrial design, fashion industry, illustration and branding. Some dream of creating original design tools, others-to apply artistic abilities.

3. Negative sides

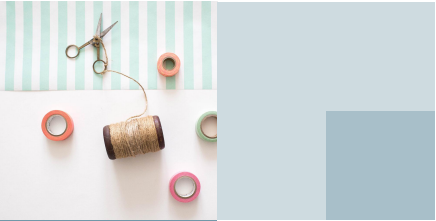

-Problems of evaluating the results of creative work that may cause disagreements with the customer

-Difficulties with self-organization

-Deadlines

-Specialists are not immune from creative crisis, chronic fatigue and colds, but to stand idle at the same time means to lose money

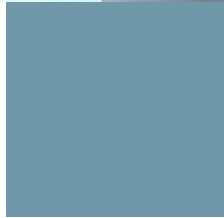

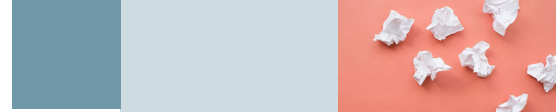

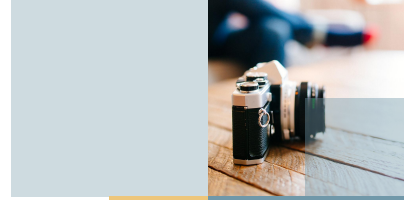

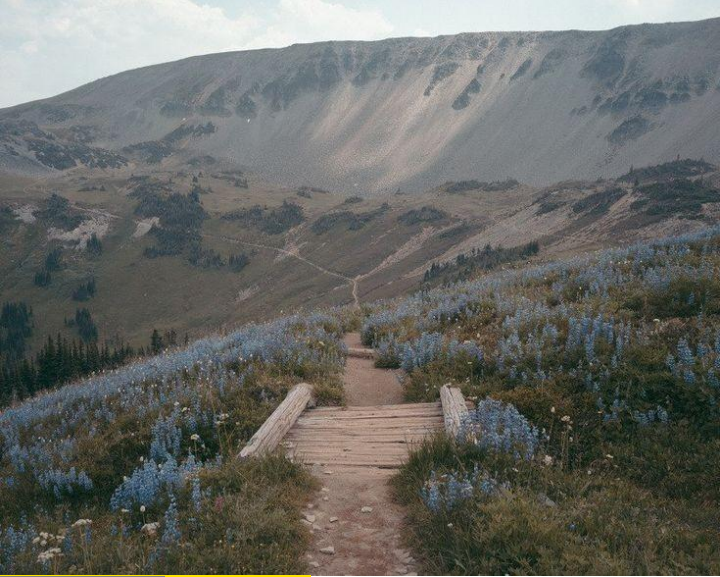

4.

Positive sides:

- *popular profession*
- *stable and decent income.*
- *mobile access to foreign markets*
- *the ability to bring your ideas to life and get satisfaction*

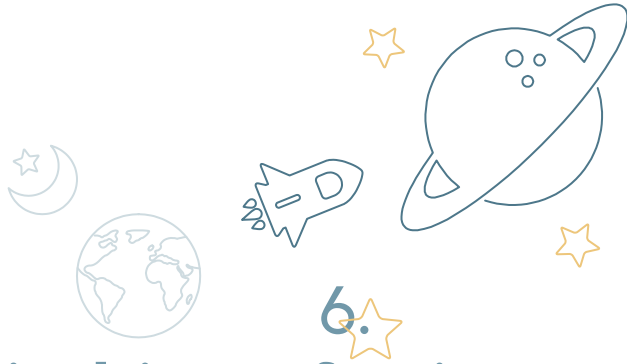

5. What you need for this profession?

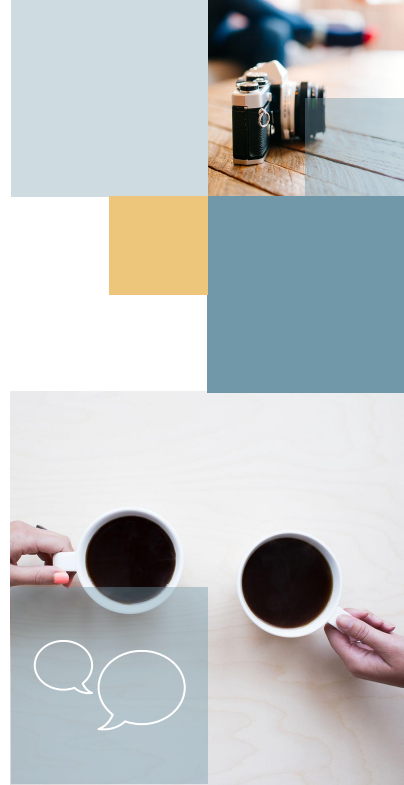

- The design profession requires stress tolerance
- Talent, perseverance and constant improvement of knowledge and skills are not the last place.
- The ability to hear and understand the customer is important, as well as the ability to conduct a constructive dialogue.

Why is this profession so important to me?

- This profession is important to me because I have dreamed of this profession since I was very young
- In addition, I have been designing for 3 years, and this is very serious for me!
