Listen to the song on the video and complete the gaps.

- Ariel, listen to me
 - OO languages?
 - It's a mess.
 - Programming in 1. _____
 - Is better than anything
 - They got over there.
 - The 2. _____ might seem much sweeter
 - Where objects and subtypes play
 - But frills like inheritance
 - Will only get in the way!
 - Admire C's simple landscape
 - Efficiently dangerous!
- No templates or fancy pitfalls...
 - Like 3. _____ and C++!
 - Program in C
 - Program in C
 - Pointers, assembly,
 - Manage your memory
 - With malloc () and free()
 - Don't sink your app
 - With runtime bloat
 - 4. _____ in C will stay afloat
 - Do what you want there
 - Close to the 5. _____!
 - Program in C
