Цель проекта

Цель проекта состоит в том, что бы реализовать локальный ресурс, доступный любому человеку. Скелет площадки, которую он сможет изменять по своему желанию. Это позволит удовлетворить потребности локальных групп людей, которые не нашли готовые реализации в Интернете.

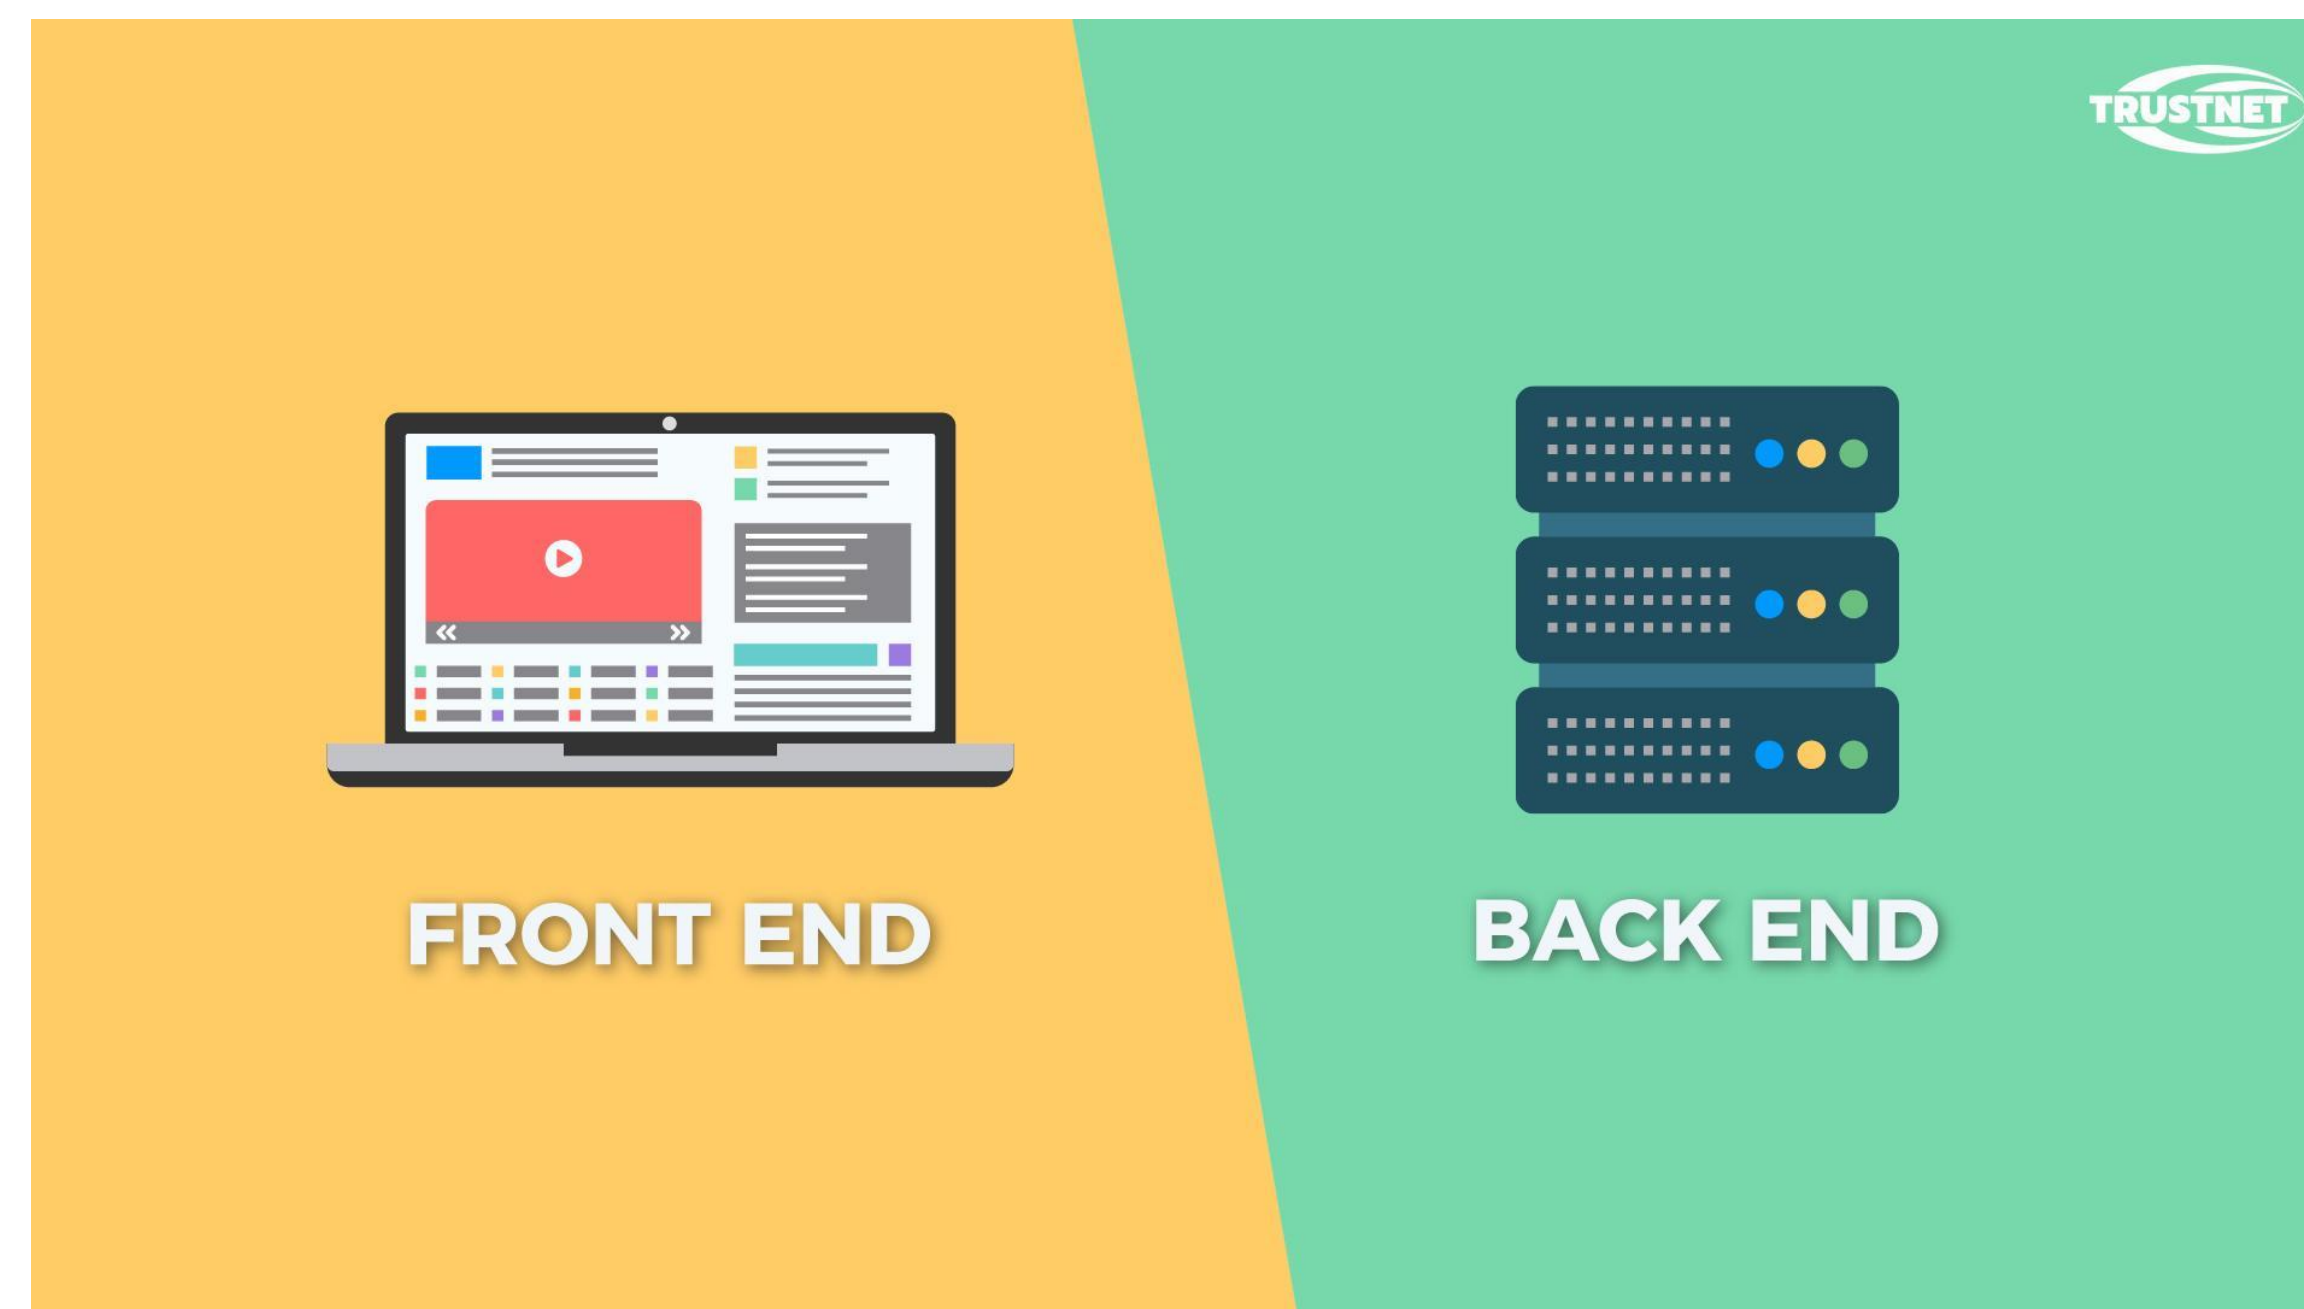

Пояснение реализации продукта

Современная веб-разработка разделяется на две части:

Лицевую(front-end) и заднюю(back-end). Лицевая часть отвечает, собственно, за лицо сайта. Это всё, что видит пользователь на своём экране.

Задняя часть же отвечает за всю логику, которая происходит на сайте. Например – регистрация и авторизация пользователя в системе.

Обычно, они не отделяются от друг друга, но современная разработка может раздробить их на отдельные слои. Так, можно написать отдельно логику, а после использовать её в любом проекте, ведь она никак не связана с реализацией лицевой части. Такая логика и является продуктом моего проекта.
