

Функции

$$y = \sqrt[n]{x}$$

их свойства и график

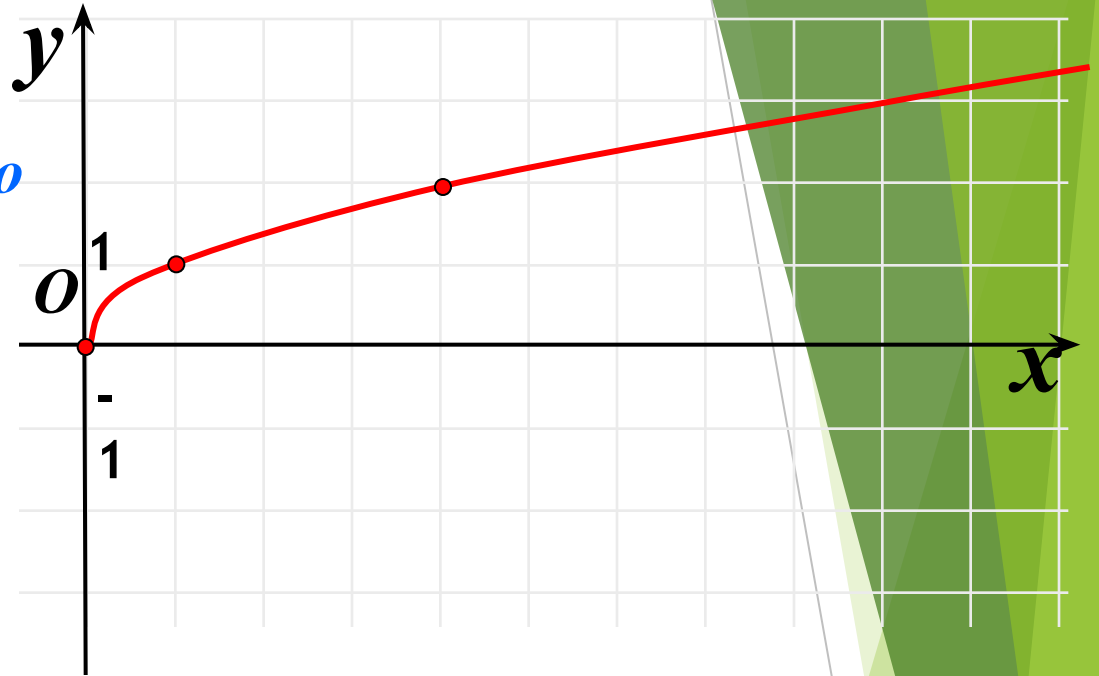

$$y = \sqrt[n]{x}$$

n – четное число

$$y = \sqrt[n]{x}$$

n – четное число

$$D(y) : x \geq 0$$

$$E(y) : y \geq 0$$

$$y = 0 \quad x = 0$$

$$y > 0 \quad x > 0$$

Функция возрастает $x \in [0; +\infty)$

$$y = \sqrt{x+4} - 2$$

← ↓

$$y = \sqrt{x-1} - 2$$

A red arrow points to the $x-1$ term, and another red arrow points to the -2 term.

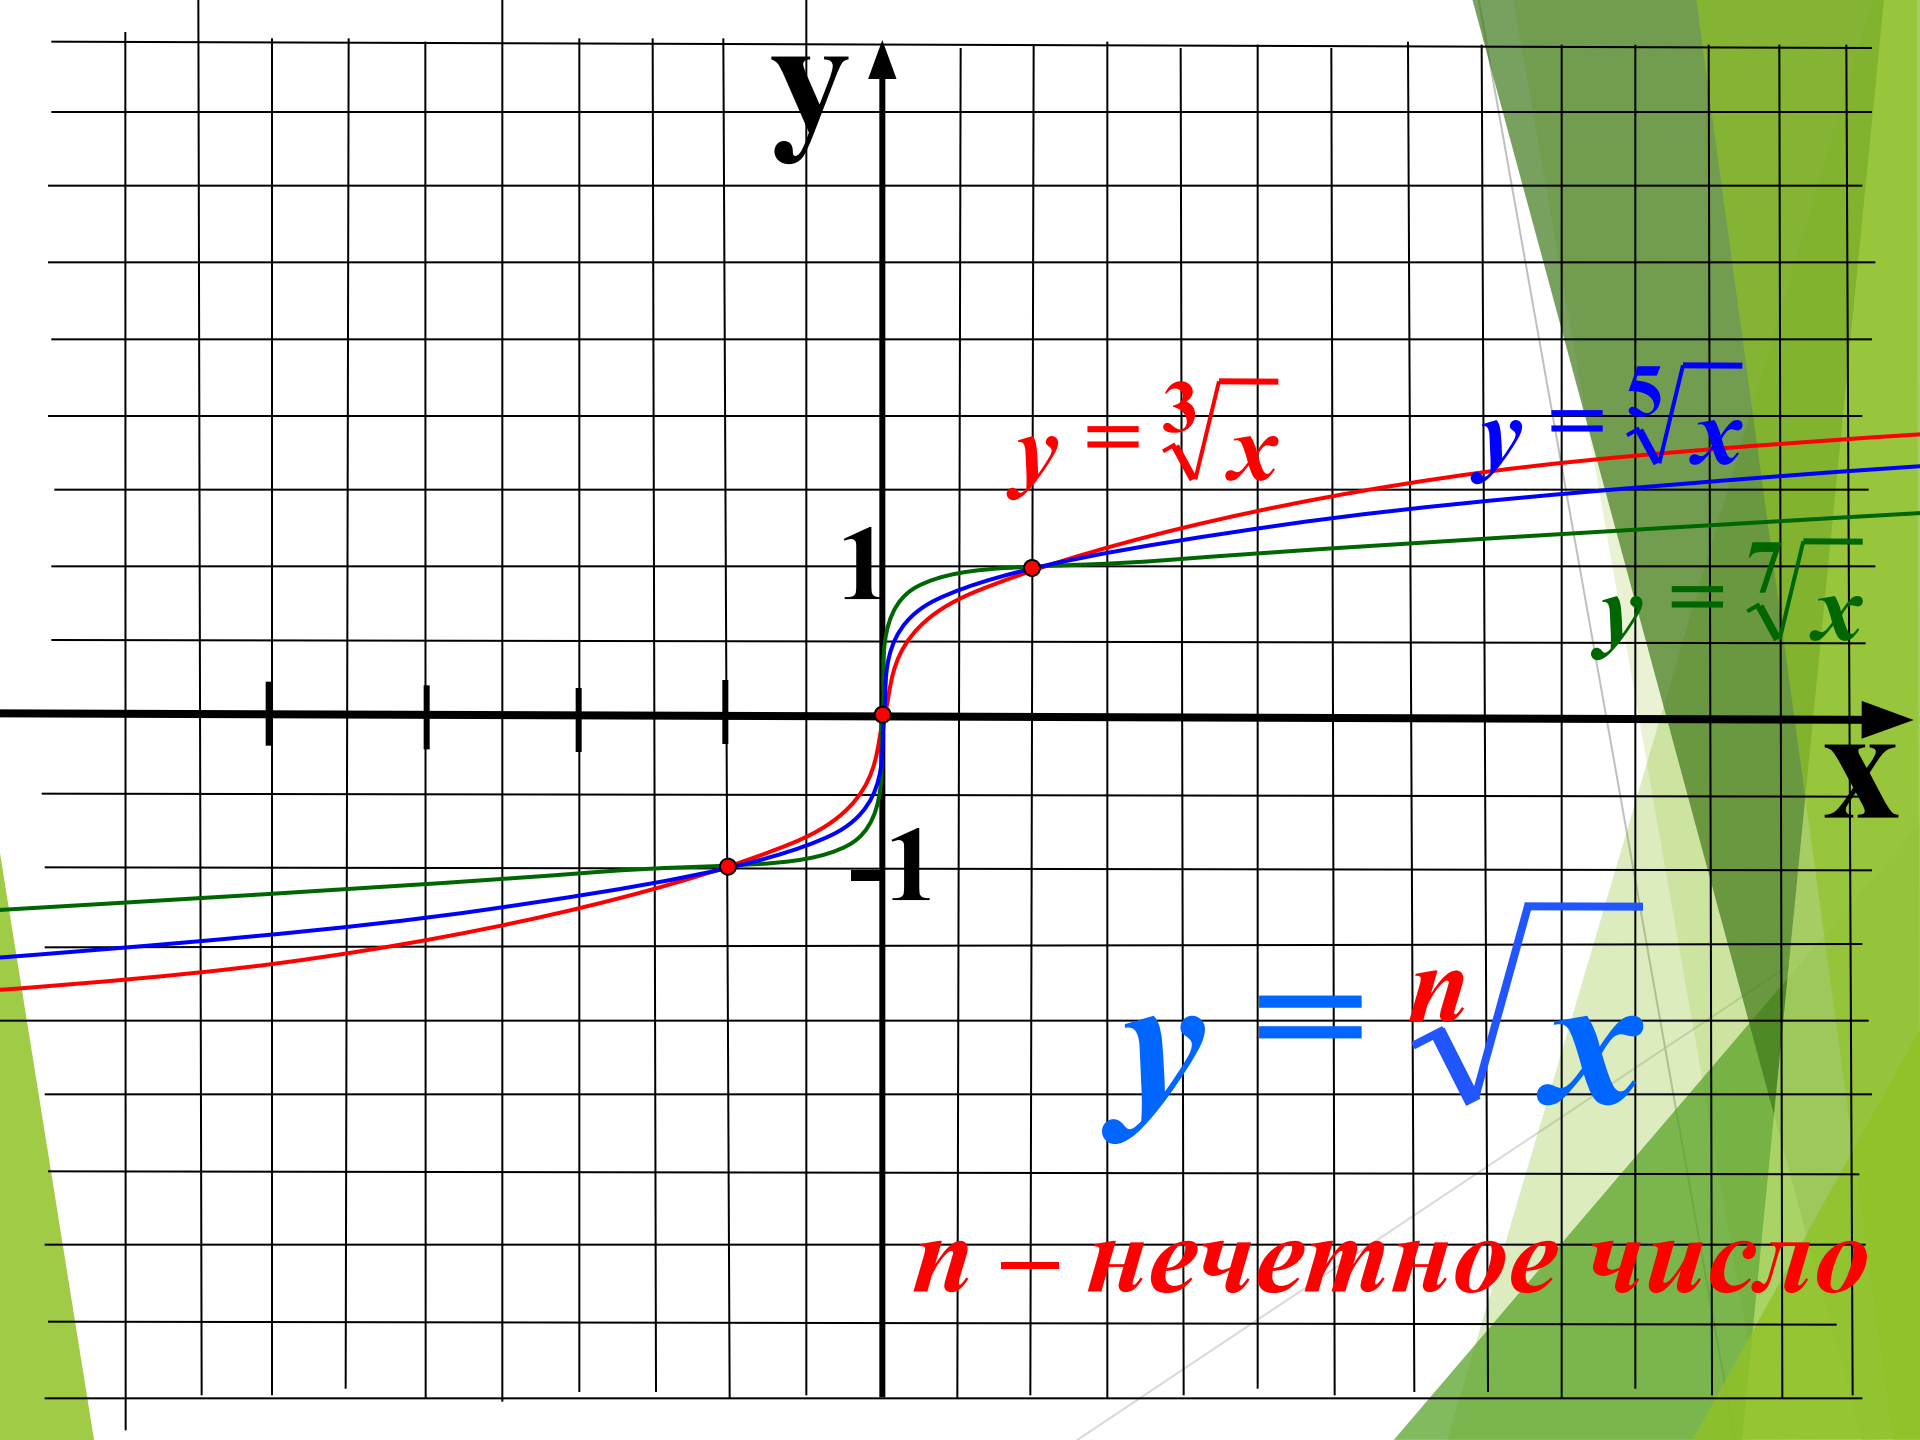

$$y = 2\sqrt{x}$$

$$y = \frac{1}{2} \sqrt{x}$$

$$y = -\frac{1}{2} \sqrt{x}$$

y

$$y = \sqrt[3]{x}$$

$$y = \sqrt[5]{x}$$

1

$$y = \sqrt[7]{x}$$

-1

x

$$y = \sqrt[n]{x}$$

n – нечетное число

$$y = \sqrt[n]{x}$$

n – нечетное число

y

$$y = \sqrt[3]{x}$$
