 N/A

## <Repair information>

### 1. Symptoms and Causes

- a) Symptoms: 1. When exchanging main harness due to nP error  
 2. When main harness is exchanged.  
 3. When thermostat is exchanged.  
 4. When heater ASM is exchanged.
- b) Causes: If the heater is activated while the heater wire is touching the heater, the wire is disconnected by the heat of the heater.

Disconnection

- The information is available through “<https://gsfs-america.lge.com>” with a valid ID.
- The information is intended for experienced technicians, not for customer .

## 2. Repair Instruction

In the following 4 cases, assemble the heater wire from the left side.

1. When exchanging main harness due to nP error
2. When main harness is exchanged.
3. When thermostat is exchanged.
4. When heater assembly is exchanged.

Assemble to the left

## 3. Current and New (Visual / Part number & Name etc)

If the heater wire is assembled from the right side, there are some concern about wire disconnection. Except for the 4 cases presented above, If you look at the case assembled on the right, assemble it to the left.

**Incorrect(X)**

**Correct(O)**
