

penguin

Penguins are to нелетающим birds. White Dickey and a black coat makes them similar to the people. The body is covered with dense short tail, which does not soak. Under the skin is a thick layer of fat, so they are not cold, and may starve. Although the penguins have short wings, but they do not fly.

The structural features allow you to survive these birds in the cold, the harsh climate of Antarctica. The Imperial and Royal penguins live only there. The Emperor penguins of the largest. Their length of up to 1.2 m, weight-up to 42 kg. Live colonies of up to 300 thousand birds. Feed on fish, squid and shrimp. Food is extracted himself in the sea. - Bitten wings in the water serve as oars, tail and paws - the wheel. They can move with a speed of up to 40 km/h. (as a submarine boat, submarine).

The Imperial and Royal penguins lay in may-June, one egg right on the ice. Males put them on the legs, covering the abdominal folds and incubate their Chicks more than 60 days. Chicks are born covered with fluff and are already seeing. For by their parents dive in the sea, and in the beginning of December, when the Chicks become adults, they will be together to forage. Penguins raise to a special sympathy for the fact that they live in the ice at low temperatures and permanent snow storms Antarctica, but, despite this not leave their homes and take their eggs there

If the of a bird that can not fly

- We added "one to look" necessary to the row one hundred businesses in It life to do completed the name necessary 100 businesses" on our writing monument in expected life having time Пингвиндерді. If one on same the business looked, to smack lips be тұрарлық owner of life, he is пингвин. We try knowing to look nature Therefore in our today's conversation пингвиндердің. Though Пингвин is be a wing, and not able to fly up, first jerk stand. It from another the birds especially. Пингвиндер mostly do location South on жарты шарда. Bird, that lives basis on Антарктидада. However, go Антарктиданың пингвиндер, that live piercing cold and on another the place. For example, settles islands of Галапагостype of пингвин, that having a horse took that, "Галапаго спингвині". Him on a side year температура Цельсий according to шкаласы, 18, specify 28 degrees. Edge, that maximally gather пингвиндер on world, - on Пунта Томбо. Пингвиндердің it is possible life seventy five percents to talk at the seaside pay. They putting egg only only, come, that to wait, that she opened door light to the world, in dry land.
