

PARACHUTE

A parachute is a "device to reduce the speed of a body as it moves in the air" using air resistance. Used "even when landing an aircraft to shorten the braking distance"

A decorative graphic consisting of several parallel white lines of varying lengths, slanted upwards from left to right, located in the bottom right corner of the slide.

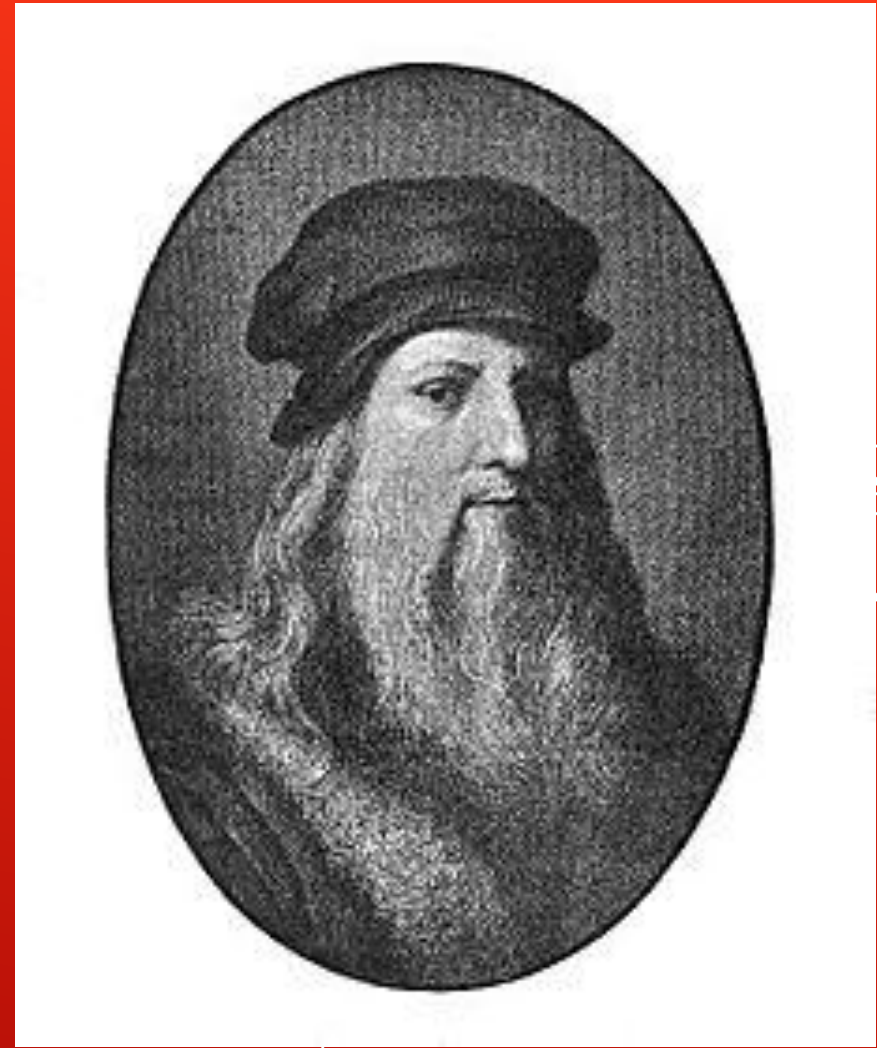

PARACHUTE HISTORY

- ▶ The idea of a parachute dates back to the Middle Ages.
- ▶ V roku 1911 Američan Grant Morton uskutočnil v Kalifornii prvý zoskok padákom z lietadla, ktorým bol Wright Model B.

- ▶ Leonardo da Vinci, full name Leonardo di ser Piero da Vinci
- ▶ Was born 15. apríl 1452, Vinci, Taliansko
- ▶ And died 2. máj 1519
