

I am sure that everyone knows the man depicted in the photo. And everyone has heard about the poisoning of the main opposition leader.

But how will this affect the economy in the future?

- Alexey Navalny was hospitalized on 20th of August. Subsequently, the opposition leader was taken to the city hospital, where he fell into a coma and two days later was transported to the Berlin clinic "Charite".
- Later german authorities reported that Navalny was poisoned with "Novichok" poison. At the same time, doctors from the Omsk hospital, where the politician spent two days before being sent to Germany, that they did not agree with the conclusions of their Berlin colleagues.

What do you know about Nord stream?

Nord stream 2 - is a major gas pipeline under construction from Russia to Germany via the Baltic sea.

Currently, about 160 km of pipes remain to be laid. However, due to us sanctions, construction is temporarily suspended. Currently, there are calls in the EU and the US to abandon the project because of the incident with Navalny.
