**People have always polluted their surroundings.
But until now pollution was not such a serious problem.
In past most people lived in uncrowded rural areas and
didn't have pollution-causing machines.
But with the development of crowded industrial cities the
problem of pollution has become more important.
Using automobiles and other machines made pollution
steadily worse.**

Since the 1950's people have become alarmed with the danger of environmental pollution.

Air, water, and soil are necessary for existence of all living things.

But polluted air can cause illness, and even death.

Polluted water kills fish and other marine life.

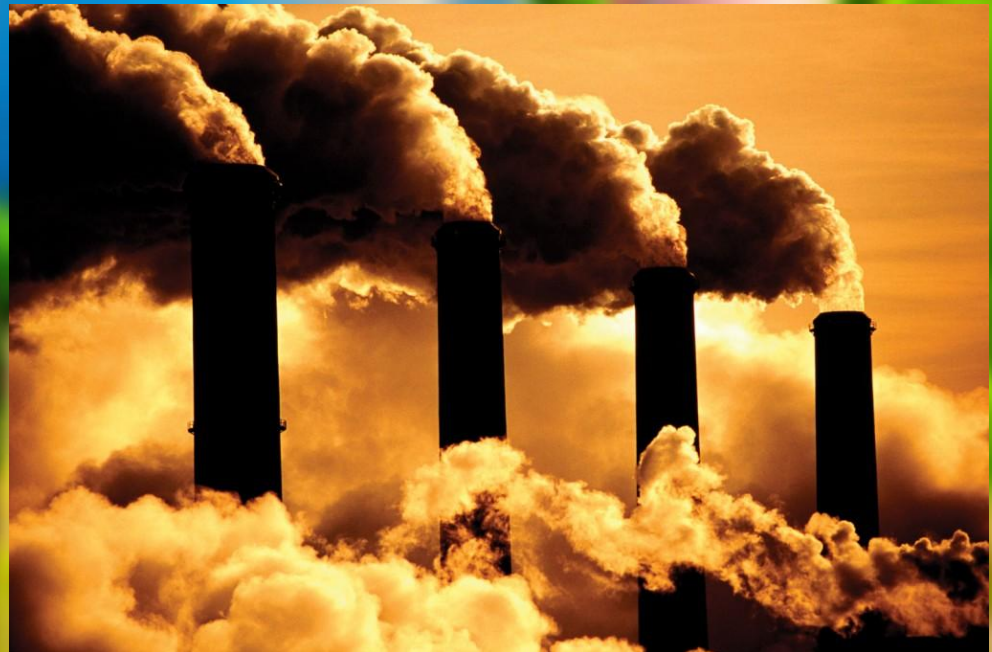

On polluted soil, food products can't be grown.

In addition environmental pollution spoils the natural beauty of our planet.

Pollution is a very complicated and a serious problem.

Automobiles are polluting the air but they provide fast transportation for the people.

Plants and factories pollute the air and the water but they provide jobs for people and produce necessary goods.

**On polluted soil, food products can't be grown.
In addition environmental pollution spoils the natural
beauty of our planet.
Pollution is a very complicated and a serious problem.
Automobiles are polluting the air but they provide fast
transportation for the people.
Plants and factories pollute the air and the water but
they provide jobs for people and produce necessary
goods.**

The background is a full-page artistic illustration in a painterly, textured style. It depicts a landscape with a bright green field in the foreground, a line of trees with autumn foliage in shades of orange, red, and brown in the middle ground, and a blue sky with white clouds. The overall effect is that of a digital painting or a high-quality texture map.

THE END
