Carbon dioxide

People have always polluted their surroundings. But until now pollution was not such a serious problem. In past most people lived in uncrowded rural areas and didn't have pollution-causing machines. But with the development of crowded industrial cities the problem of pollution has become more important. Using automobiles and other machines made pollution steadily worse.

Since the 1950's people have become alarmed with the danger of environmental pollution.

Air, water, and soil are necessary for existence of all living things.

But polluted air can cause illness, and even death.

Polluted water kills fish and other marine life.

On polluted soil, food products can't be grown.

In addition environmental pollution spoils the natural beauty of our planet.

Pollution is a very complicated and a serious problem.

Automobiles are polluting the air but they provide fast transportation for the people.

Plants and factories pollute the air and the water but they provide jobs for people and produce necessary goods.

On polluted soil, food products can't be grown. In addition environmental pollution spoils the natural beauty of our planet. Pollution is a very complicated and a serious problem. Automobiles are polluting the air but they provide fast transportation for the people. Plants and factories pollute the air and the water but they provide jobs for people and produce necessary goods.

The image is a vibrant, abstract landscape painting. The foreground is dominated by a lush, bright green field that transitions into a colorful forest in the middle ground. The trees are rendered in various shades of brown, orange, and red, suggesting autumn foliage. The sky is a deep blue with scattered white clouds. The overall style is expressive and textured, with visible brushstrokes and a rich color palette. The text "THE END" is overlaid in the center in a bold, green, italicized font.

THE END
