

Presentation on the topic: Yaroslavl railway College

**The work was performed by the
student: Maxim Kruglov
Groups: 234 PME**

History of our College

In 1870 Yaroslavl became a railway junction and there was a great need for personnel. In 1929, two buildings were built on the Suzdal highway, one of them was for theoretical training and the other a library and a hostel. In 1940 our school became a railway school. It was one of the best professional colleges in the city.

Professions

College trains on such profession as:

- electric locomotive driver assistant
- diesel locomotive driver assistant
- Master of track machines
- Conductor on railway transport

About college

Our College consists of 4 floors. On the ground floor there is a cloakroom, a dining room and a teacher's room, and on the subsequent rooms in which classes are held.

My group

I study in group 234 PME on the assistant to the driver of the electric locomotive. We have a very friendly and cheerful team in the group .

Our class teacher

Our team leader Anton Evgenievich is a very responsible, intelligent and kind person who has a lot of diplomas.

Study

In College we are taught different subjects such as mathematics, English, chemistry, biology, etc. About some, I would like to tell you.

Mathematics

Mathematics is one of the most important Sciences, thanks to it we are able to: count, calculate, multiply, divide and so on.

English

English is one of the most important subjects because English is the international language spoken by the whole world

Chemistry

Chemistry is one of the difficult subjects but very important in our life. In chemistry we build the table with chemical elements and analyze them.

Conferences & competitions

Often from College we go to different conferences and competitions where we take prizes and defend the honor of our College, Namely...

XV interregional student scientific and practical conference " natural and spiritual heritage of native land»

Scientific and practical conference in Yaroslavl theological Seminary

XIII student conference "from idea to achievement", dedicated to the Day of Russian science

My profession

Speaking of my profession we can say that the driver must have such qualities as:

- Good health
- Attentiveness
- Good knowledge
- Be responsible

Duties of the driver

The driver must :

- Know safety precautions
- have first aid skills
- Respond quickly to any emergency

Conclusion

In conclusion, I want to say that we have a very wonderful College with excellent teachers and students. It is in this College that I am happy to study and get my future profession.
