

Hi. I am Varya Osipova from Class 11A (2021). I maybe in my twenties by the time you read this, but it doesn't matter. I want to share my experience with you)

Of course, studying is not easy. Of course, exams is not easy too... But no one died from it (I hope). And you will not :D

My English lessons was very interesting because on them we studied all other subjects, only in English, not Russian. Do you agree with me?

My achievements: understanding of many American songs, the pleasure of reading comics without a translator. And beautiful experience with beautiful teacher)

What I learned from studying? If you want to get a good mark, just do homework on time. So I became an excellent student (yes, it is true, I don't know anything)

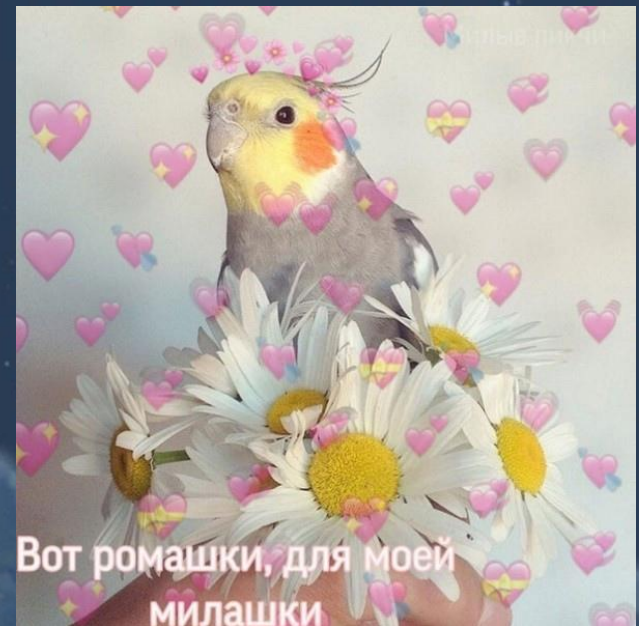

**даже сказать нечево
просто во**

If you want to get a recommendation for preparing for the exam in computer science or Physics, just email me (Alex Prier, id439415830). But I hope you don't have to pass ЕГЭ

There is one most important rule: sleep as much as necessary. Even if you can't...

Good luck, future school leavers !)
