

The background is a complex digital composition. It features a large, semi-transparent teal globe in the center-left, overlaid with white circuit lines and arrows. The globe is surrounded by various geometric shapes, including triangles and circles, in shades of teal and grey. The overall aesthetic is futuristic and technological.

E-mail

History

- The creation of e-mail was preceded by the fact that in the 70 years of the 19th century was the most expensive and important technical and computer used by many people.

```
[user@server ~]$ mail
Mail version 8.1 6/6/93. Type ? for help.
"/var/mail/user": 0 messages
?
  Mail  Commands
t <message list>      type messages
n                    goto and type next message

pr <message list>    make messages go back to /var/mail
m <user list>        mail to specific users
q                    quit, saving unresolved messages in mbox
x                    quit, do not remove system mailbox
h                    print out active message headers
!                    shell escape
cd [directory]      cd to directory or home if none given

A <message list> consists of integers, ranges of same, or user names separated
by spaces.  If omitted, Mail uses the last message typed.

A <user list> consists of user names or aliases separated by spaces.
Aliases are defined in .mailrc in your home directory.
```

- 1971 programmer ray Tomlinson wrote the software that allowed to send messages to a remote computer by using SIPNET.

The advantages of e-mail

You can communicate with people who are at a far distance:

- It's much easier
- you needn't call

The disadvantages of email

- Users send spam
- You can get many advertisements sms. It can bore you.
