The History Of The Castle

The castle is located in the village of Yurino, on the Volga river, in the Republic of Mari El.

The main builders of the castle were V. p. Sheremetev, his wife Olga Dmitrievna and their son Peter Vasilyevich.

Construction work began in 1874 and was completed in 1915. A year later he died, Pyotr Vasilyevich

During the construction of the castle, local building materials were partially used, and rare and expensive (granite, marble, rare wood) were transported along the Volga river from Western Europe

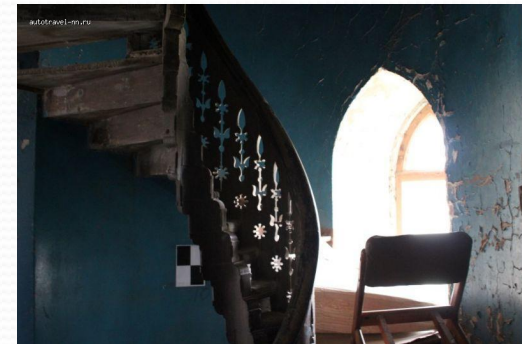

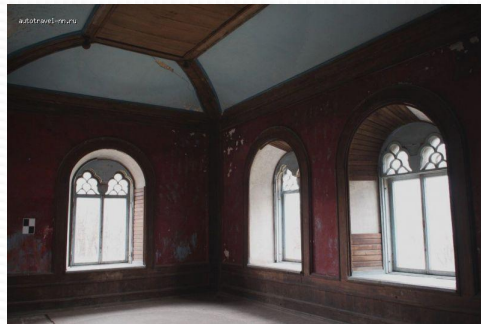

The castle used the old Russian and Romanesque architecture. Sheremetyevo castle is surrounded by two magnificent parks.

Castle problems

After the revolution, the castle of Sheremetyev in Yurino was repeatedly rebuilt for the needs of the new authorities. Expensive finishing materials were replaced with cheap ones. Some of the rooms were converted into hotel rooms. The estate was badly damaged at this time. The Cheboksary reservoir also damaged the magnificent structure-cracks began to appear in the floor and walls when the groundwater rose. Since 1993, the restoration of the castle began, which continues to this day.

Restoration of the castle

The restoration of the castle is very costly action. As resources were brought from all parts of the world.(French glass, stone fireplaces which are more than 3 thousand years and other expensive things). The castle itself is very large and some parts have already been restored. I believe that if the castle was in any property of a rich man, the castle has long been repaired, but was not allowed into the castle.
