Antibody Production – NEW eBook

Reproducible performance of antibodies is highly critical in immunoassays-based research, immunodiagnostics, and immunotherapy. Antibodies' reproducibility is driven by their specificity and multiple factors ranging from antibody design to target validation. Our *Antibody Production eBook* provides you an overview of the complete process of antibody production by covering the following sub-topics:

- Overview of antibody production
- Antibody-based applications
- Recombinant antibody engineering
- Antibody validation standards
