"Quality: Excellent. Value: Excellent." ... "DPGraph is one of the most exciting Windows-PC programs I've ever seen for creating beautiful, even stunning, mathematical graphics." Dr. Michael W. Ecker, Recreational & Educational Computing, and DPGraph runs under Wine on Linux, or under SoftWindows or Virtual PC on the Mac.

DPGraph: Dynamic Photorealistic 3D Graphing Software for Math and Physics Visualization

[Subscribe](#) | [List of Site Subscribers](#) | [Error Viewer](#)
[Latest news: 4 Jul 2008](#) | [Updates to newest version: 4 Jul 2008](#)
[Math Art Gallery](#) | [Documentation](#) | [Links](#) | [Privacy](#) | [Contact](#)

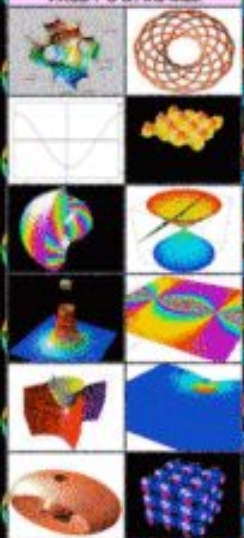

The world's most powerful software for math and physics visualization. Create beautiful, interactive, dynamic, photorealistic 2D, 3D, 4D, 5D, 6D, 7D and 8D graphs. So easy to use that even junior high and senior high students have had their graphs published. Includes hundreds of examples contributed by users from around the world.

Over two million mathematicians, physicists, teachers and students at over 1,000 colleges, universities and K-12 schools worldwide are already licensed. Comes with a free subscription to the [Flaming Thunder](#) programming language.

Optimized for the internet – search for DPGraph using your favorite search engine to find ways that people are using DPGraph for both classroom and distance learning. Used for pre-algebra, geometry, trigonometry and general physics, through multivariable calculus, field theory, quantum mechanics and gravitation.

Use time and color as extra dimensions (to create motion or encode momentum, for example). Use the scrollbar to vary parameters in realtime, to slice through graphs, or to vary transparency. Programmed entirely in assembly language for maximum speed.

Graph functions, equations, conic sections, planes, spheres, toruses, parametric curves and surfaces, implicit equalities and inequalities, volume intersections, volumes of integration, vector fields, surfaces of revolution, equipotential surfaces, and much more, in rectangular, polar, cylindrical, or spherical coordinates.

A woman with voluminous, dark curly hair is shown from the chest up, wearing a black button-down shirt. She is looking slightly to her right with a neutral expression. The background is white and filled with black line-art doodles, including faces, hands, and abstract shapes. The word 'WORK' is written in a bold, black, sans-serif font on the left side of the background. The name 'SHANTELL MARTIN' is written in a larger, bold, black, sans-serif font at the top center of the image.

Space Is The Place

Welcome to my **Space Is The Place*** home page. I have been interested in spaceflight all my life. Perhaps this resulted from my coming of age and developing an awareness of the larger world during the 1960's, when mankind made its first tentative steps beyond our protective Earth, decided that the Moon was the first goal, and **BY GOLLY GOT THERE WITHIN THAT SAME DECADE!** Pretty impressive for someone of my age in those years (i.e. 6 to 16), and proof to me that anything is possible. Mankind's destiny **has to be** in space.

- Ken R. Harman

"The dinosaurs went extinct because they didn't have a space program"

- Arthur C. Clarke, science/science fiction writer, visionary and author of "2001 - A Space Odyssey"

My **Space Is The Place** website consists of two main parts:

- **My Visits to Space Centres** - which are outlined here on the [home page](#) and on the [second page](#).
- **My Models of Spacecraft** - and some of the history behind them, which is the main topic of the [third](#), [fourth](#), [fifth](#), and [sixth](#) pages.

**Note - credit for the name of this website goes to the late jazz band leader, black prophet and native of the planet Saturn (so he claimed), [Sun Ra](#), who titled a song, album and film "[Space is the Place](#)". (note this is an MP3 file, as are other audio files on this page)*

This site is dedicated to the memory of my dear friend and fellow space enthusiast **Butch Head** 1952 - 2005, greatly missed member of the "Baikonour Boys".

Edgar Mitchell visits "the Shrine" - in June 2006 I was honoured to have Dr. Edgar Mitchell, Apollo 14 astronaut and sixth man to walk on the Moon, visit my home, and in particular the ["Shrine"](#) (click to go p 3 with "Shrine" section).
