

Humanities and space

Made by Solomennikova A., Melekhina P., Lubyaynov G.

Plan:

- ◆ Vocabulary list;
- ◆ Some aspects of the history;
- ◆ Some achievements;
- ◆ Some problems;
- ◆ List of sources;

Vocabulary list

- ◆ **Venture**-предприятие;
- ◆ **Space junk**-космический мусор;
- ◆ **Debris**-обломки/мусор;
- ◆ **Satellite**-спутник;
- ◆ **Collision**-столкновение;
- ◆ **Velocity**-скорость;
- ◆ **Cloistered**-заточенный;
- ◆ **Gravitational embrace** – «гравитационные объятия» = гравитационная сила

Space is
always a
question

Humans and space & history aspects

- ◆ Rocket research began in the 1920s and accelerated during the Second World War
- ◆ In the late 1940s, both America and the Soviet Union used captured German scientists and technology to launch their space programs.

A significant breakthrough

- ◆ 12 April 1961 - Soviet cosmonaut Yuri Gagarin became the first human being to journey into space.

Yuri Alekseyevich Gagarin
9 March 1934 – 27 March 1968

Another one famous person

- ◆ An American astronaut and aeronautical engineer who was the first person to walk on the Moon.
- ◆ July 1969 Armstrong performed the first manned Moon landing and spent two and a half hours outside the spacecraft
- ◆ *"That's one small step for a man, one giant leap for mankind"*

Neil Alden Armstrong
August 5, 1930 – August 25,
2012

Not only humans

Belka and Strelka are Soviet dogs-astronauts who made a space flight on the ship "Sputnik-5", August 19, 1960

Space projects

- ◆ The first space station, the Soviet Salyut 1, was launched in 1971, and two years later NASA's Skylab followed

The amount of space debris

Space & Problems

!Space junk is one of the most important global problems

Possible solutions:

- Capture and return missions with special; satellites armed with nets and harpoons;
- Giant electromagnets
- Satellites with lasers
