

STATE OF TEXAS

Geographical position

The largest rivers of Texas: Red River, Trinity, Brazos, Colorado and Rio Grande; set of the small rivers in the central and western parts often dry up.

The most part of Texas (the center and the north) represents the plains covered with a bush, more and more thinning to the West where steppes and deserts begin. In the east and the southeast savannas and dubovo-pine woods have remained.

Climate

For Texas frequent tornadoes in the central part and incidental tropical cyclones at the coast, leading to a serious damage.

Flora and Fauna

Texas is rich with a variety of fauna and flora. The most numerous animals are coyotes, deer, battleships.
