EnglishMag WorkBook 1Q/2020

We are excited to present you special workbook inside the magazine! Now, you can underline, highlight all the new words for you, do exercises, crosswords, and much more! If you want to practice English more, this part is made for you!

TED talks material shared with you by Creative Commons license solely for educational purposes.

01:12 – 01:09

Okay, now I don't want to alarm anybody in this room, but it's just come to my mind that the person to your right is a liar. Also, the person to your left is a liar. Also the person sitting in your very seats is a liar. We're all liars. What I'm going to do today is I'm going to show you what the research says about why we're all liars, how you can become a liaspotter and why you might want to go the extra mile and go from liaspotting to seeking, and ultimately to trust building.

Now, speaking of liars, ever since I wrote this book, "Liaspotting," no one wants to meet me in person anymore, no, no, no, no. They say, "It's okay, we'll email you." (Laughter) I can't even get a coffee date at Starbucks. My husband's like, "Honey, deception? Maybe you could have some on cooking. How about French cooking?"

01:09 – 01:58

So before I get started, what I'm going to do is I'm going to do my goal for you, which is not to teach a game of Gotcha. Liaspotting isn't those kids, those kids in the back of the room that are shouting, "Gotcha! Gotcha! Your eyebrow twitched. You flared your nostril. I watch that TV show "Lie To Me." I know you're lying! No, liaspotting is armed with scientific knowledge of how to spot liars. They use it to get to the truth, and they do what mature leaders do everyday, they have difficult conversations with difficult people, sometimes during very difficult times. And they start up that path by accepting a core value, and that proposition is the following: Lying is a bad act. Think about it, a lie has no power whatsoever by its mere utterance. Its power emerges when someone else agrees to believe the lie.

1:58 – 3:08

So I know it may sound like tough love, but look, if at some point

point you got lied to, it's because you agreed to go to. Truth number one about lying: lying's a coop act. Now not all lies are harmful. Sometimes we lie in deception for the sake of social maybe to keep a secret that should be kept secret say, "Nice song!"

"Honey, you don't look fat in that, no." Or we say, the digitratt. "You know, I just fished that email o Spam folder. So sorry." But there are times when we are unwilling partner deception. And that can have dramatic costs for a year saw 997 billion dollars in the financial crisis United States. That's an under a trillion do seven percent of revenues. Deception can Think Enron, Madoff, the crisis. Or in the double agents and traitors, like Robert Hansen o Ames, lies can our country, they can comp security, they can democracy, they can o deaths of those that defend us.

HOW TO SPOT A LIAR TED in English

LISTEN AND
READ THE SCRIPT

VK@english_mag: Dear Eng

readers, it was a while since TED video, but we didn't forg TED! Moreover, we will be mak interesting and useful releases

Pamela Meyer thinks we're facing a pandemic* (an outbreak of a disease) of deception*, but she's arming* people with tools*, that can help take back* the truth. On any given day*, we're lied* to from 10 to 200 times, and the clues* to detect* those lies can be subtle* and counter-intuitive. Pamela Meyer, the author of Liaspotting, shows the manners and "hotspots" used* by those trained to recognize* deception* — and she argues honesty* is a value* worth preserving*.

Pamela Meyer, Lie detector

(the beginning on page A)

Deception is actually serious business. This con man, Henry Oberlander, he was such an effective con man, British authories say he could have undermined the entire banking system of the Western world. And you can't find this guy on Google, you can't find him anywhere. He was interviewed once, and he said the following. He said, "Look, I've got one rule." And this was Henry's rule, he said, "Look, everyone

Now when we first hear this data, we recoil. We ca how previous lying is. We're essentially against ly you look more closely, the plot actually thickens. I strangers than we lie to coworkers. Extroverts ly introverts. Men lie eight times more about themsel they do other people. Women lie more to protect of

-- the list goes on. Lying is an attempt to bridge that gap, to connect our wishes and our fantasies about who we wish we were, how we wish we could be, with what we're really like. And boy are we willing to fill in those gaps in our lives with lies. On a given day, studies show that you may be lied to anywhere from 10 to 200 times. Now granted, many of those are white lies. But in another study, it showed that strangers lied three times within the first 10 minutes of meeting each other.

We parse it out on an as-needed basis, sometimes good reasons, other times just because we don't us the gaps in our lives. That's truth number two about We're against lying, but we're covertly for it in us our society has sanctioned for countries and continents. It's as old as breathing. It's part of our c part of our history. Think Dante, Shakespeare, the 1 of the World. 05:33 (Laughter) 05:35

Studies show that people who are overdetermined in their denial will resort to formal rather than informal language. We also heard distancing language: "that woman." We know that liars will unconsciously distance themselves from their subject, using language as their tool. Now if Bill Clinton had said, "Well, to tell you the truth..." or Richard Nixon's favorite, "In all candor..." he would have been a dead giveaway for any liaspotter that knows that qualifying language.

11:00 Now let's say you're having that exact same conversation with someone deceptive. That person may be withdrawn, look down, lower their voice, pause, be kind of henky-jenky. Ask a deceptive person to tell their story, they're going to pepper it with way too much detail in all kinds of irrelevant places. And then they're going to tell their story in strict chronological order. And what a trained interrogator does is they come in and in

Vocabulary and Notes:

say yes, we snare our means no, we use very convincing stories, we slightly shrug our shoulders. We commit terrible crimes, and we smile at the delight in getting away with it. Now, that smile is known in the trade as "slipping delight." 11:55 -- 13:44 Science has surfaced many, many more indicators. We know, for example, we know liars will shift their blink rate, point their feet towards an exit. They will take barrier objects and
